SUBJECT: Implementation Status of Audit Recommendations

This semi-annual report provides the status of management's efforts in addressing internal and external audit issues and recommendations.

The Internal Audit Division uses TeamCentral, a web-based database, to track and monitor the implementation status of issues and recommendations resulting from internal and external audits, reviews, and oversight activities. Implementation status is reported in TeamCentral by the individuals identified as responsible for implementing each recommendation. On a semi-annual basis, Internal Audit will perform follow-up audit work to validate the implementation status of corrective actions taken in response to significant audit recommendations and/or related control issues.

This status report covers the period from fiscal year 2012 through March 2016. Implementation status for a total of 180 audit recommendations has been tracked in TeamCentral since fiscal year 2012. As of March 31, 2016, 89% (160 of 180) of audit recommendations have been implemented and 11% (20 of 180) were in progress.

The attached table shows the number of audit recommendations by project name that have been implemented or were in progress, as of March 31, 2016.

We appreciate management's efforts in addressing the audit issues, and in improving the agency's control environment.
