

Municipal Water Conservation Planning Tool

A Tool for Planning and Tracking Municipal Water Conservation Programs

The Texas Water Development Board announces the release of the Texas Municipal Water Conservation Planning Tool, a user-friendly resource that can be used in the development of conservation plans and regional water plans.

The Municipal Water Conservation Planning Tool:

- Contains pre-loaded baseline water use projections for more than 450 Texas municipal water systems
- Includes a library of common water conservation measures and their estimated cost and water savings, with many of the TWDB's recommended Best Management Practices
- Offers flexibility for custom water conservation measures to be entered
- Provides an accounting framework for projecting future conservation program costs and water savings as well as estimating the water savings from previous implementation of conservation measures

The Municipal Water Conservation Tool is an Excel-based model developed to assist:

Water utility staff developing conservation plans and reporting conservation savings

Regional water planning groups developing their municipal water conservation management strategies.

A training workshop/webinar is being held by the developers on December 14, 2018 from 9:30 a.m. to 11:30 a.m. central time to introduce the Tool and provide instruction on its use. The training may be attended in person at:

Freese and Nichols
10431 Morado Circle
Suite 300
Austin, TX 78759

If you are unable to attend in person, you may join the webinar live; the details are below.

Link for remote viewing: <https://meet.lync.com/freese/ijr/FPCSTFHG>

Phone numbers for remote viewing:

Toll-free number: (866) 606-1179
Toll number: (469) 206-8447
Conference ID: 15209442#

Please note that the live presentation will be conducted via Skype. Please ensure ahead of time that you have access to the Skype application so that you can join the meeting at the assigned start time.

Registration for the training in either form is not required. The webinar will be made available on the TWDB web site in the near future.

If you have any questions about the Conservation Tool, please contact wcpteam@twdb.texas.gov
