PPL Year:	2024		
Related PIFs:			
Project Name: Mooreville WSC Water System Improvements			
Project Type: Public Water System		Project Phase: P A D & Construction	
Project Description: Mooreville WSC (MWSC) water distribution system and single-phase high service pump station is old and has reached the end of its useful life and is undersized. The pump station must be upgraded to meet TCEQ requirements of 2.0 gpm per connection (total 144 gpm). Larger pumps require 3-phase power at the pump station using phase converters. A new diesel standby power generator and new 2,000-gallon hydro-pneumatic pressure tank is required. The proposed project will replace all of MWSC's distribution mains and will upsize mains that are currently undersized and result in poor water pressures and flows. The proposed project will construct new 2-inch to 4-inch water mains.

Project Name: Accelerated Drinking Water Distribution Rehabilitation and Replacement Program			
Project Type: Public Water System		Project Phase: Construction	
Project Description: Accelerated rehabilitation and replacement of small diameter (2"-20") water distribution infrastructure to address deficiencies affecting water quality, fire flow availability, water loss, sub-standard water lines, system design and asset age. Includes replacement of lines undersized for current usage, improve integrity of water supply, and replacement of end-of-life components (lines, valves, appurtenances). Work to be performed within existing city right-of-way under task order-based contracts.

SWP - Ability to Implement Best Management Practices Factor	No	0.00
SWP - Affordability Factor	No	0.00
All Proj. - In the past 5 years, has an asset management plan been adopted by the entity's governing body?	No	0.00
All Proj. - Is the entity planning to prepare an asset management plan as part of the proposed project?	Yes	0.50
All Proj. - Has asset management training been administered to the entity's governing body and employees?	No	0.00
All Proj. - Does the proposed project address specific targets, goals, or measures in a water conservation or drought contingency plan that has been adopted by the entity's governing body within the past five years?	No	0.00
All Proj. - Does the proposed project involve the use of reclaimed water?	No	0.00
All Proj. - Does the proposed project address a specific goals in a system-wide or plant-wide energy assessment, audit, or optimization study that has been conducted within the past three years?	No	0.00
All Proj. - Project implements elements contained in a state or regional water plan, watershed protection plan, integrated water resource management plan, regional facility plan, regionalization or consolidation plan, or TMDL implementation plan?	No	0.00
All Proj. - Entity qualifies as a disadvantaged community.	No	0.00
All Proj. - Entity previously received TWDB planning, acquisition, and/or design funds for this project.	No	0.00
Rating:		34.00

PPL Year:	2024		
Related PIFs:			
Project Name: Cox Addition PWS Rehabilitation or Interconnection Project			
Project Type: Public Water System		Project Phase: Planning Design & Construction	
Project Description: The project involves the planning, design, and implementation of rehabilitation and replacement, if necessary, of the existing adsorption system damaged in winter storm Uri in 2021. Interconnection with Lubbock will be explored as a more resilient long term supply. An additional storage tank is needed. An Asset Management Plan will be completed.			

	Start Date	Completion Date	Phase Cost
Planning:			\$68,000.00
Acquisition:			\$0.00
Design:			\$10,000.00
Est. Construction:	12/01/2023	12/31/2025	\$445,000.00

Green Project:	No
Green Amount:	\$0.00
