

2024-2025 Flood Intended Use Plan

Attachment 2: Project Prioritization Lists

Flood Management Evaluation (FME), Flood Mitigation Project (FMP), and Flood Management Strategy (FMS)

2024-2025 Flood Infrastructure Fund Flood Management Evaluation (FME) Prioritization List										Ranking Factor?		Yes		Yes		Yes		Yes		Yes		Yes		Yes		Yes		Yes		Yes	
										Max Values for Score Normalization		2,500,000		8,000,000		255,000		2,500		10,000		125,000		6,000,000							
										Weight Value		15.0%		15.0%		25.0%		20.0%		5.0%		10.0%		10.0%							
										Ranking Criteria		Estimated number of structures at 100-year risk		Estimated Population at 100-year flood risk		Critical facilities at 100-year flood risk (#)		Number of low water crossings at flood risk (#)		Estimated number of road closures (#)		Estimated length of roads at 100-year flood risk (Miles)		Estimated farm & ranch land at 100-year flood risk (Acres)							
FME ID	Region Number	FME Name	Sponsor	FME Type	Previously Awarded FMA 2019-2022	Federal Funds	Other Funds	Requested TWDB Funds	Total Project Cost	Structures at Risk Raw	Structures at Risk ArcSinh (Weighted)	Pop at Risk Raw	Pop at Risk ArcSinh (Weighted)	Critical Facilities Raw	Critical Facilities ArcSinh (Weighted)	LWC Raw	LWC ArcSinh (Weighted)	Road Closures Raw	Road Closures ArcSinh (Weighted)	Road Miles Raw	Road Miles ArcSinh (Weighted)	Ag Land Raw	Ag Land ArcSinh (Weighted)	Total Score (with ArcSinh Normalization)	58% of State AMHI	Total Score + FME AMHI Points ±	FIF FME Prioritization (Based on FIF Prioritization)	State Flood Plan FME Total Score ⁴	State Flood Plan FME Rank ⁴	Difference in FIF (Not including AMHI Pts) & SFP Score (FIF Score - SFP Score) ⁷	TWDB Comments Regarding Difference in FIF & SFP Scores

¹ Scoring of studies or projects using criteria, ArcSinh Normalization for select criteria, and methodology as identified in the 2024 State Flood Plan. ArcSinh is a mathematical function used to scale any real number, including both extremely large and very small values, while preserving their original magnitudes. ArcSinh uses a non-linear transformation to compress or expand datasets containing extreme values. This makes it particularly useful in project ranking as it ensures that larger, outlier projects do not distort the rank of other projects.

² Prioritization criteria in the SFY 2024-2025 Flood Infrastructure Fund Intended Use Plan states that an FME will receive an additional 10 points if the entity's study area has an average median household income (AMHI) that is 585% the statewide AMHI.

³ Basis for the current FIF cycle funding prioritization. Prioritization of FIF SFY 2024-2025 cycle studies or projects using methodology as identified in the 2024 State Flood Plan and the SFY 2024-2025 Flood Infrastructure Fund Intended Use Plan.

⁴ Score and ranking of studies or projects as identified in the 2024 State Flood Plan.

⁵ If data submitted during the regional flood planning process changed at the time of the abridged application submittal, the applicant is required to submit all pertinent data in an Excel spreadsheet template provided with the FIF Abridged Application, identify what changed, and provide a description and justification for the change. Unless the TWDB was informed otherwise, data from the regional flood plan is the default basis for ranking and prioritizing FME submitted as recommended in the

SFY 2024-2025 Flood Infrastructure Fund Project Prioritization List for Flood Management Strategies

Attachment 2

Note: Data utilized for generating this draft ranking for the state flood plan is from the revised (post-RFI) amended regional flood plans submitted by the RFPs in response to TWDB review. The original amended plans were submitted in July 2023. The revised versions were approved by the TWDB in March 2024.

									Yes		Yes		Yes		Yes
