Water Weekly
For the week of 06/03/24

Water conditions
The latest drought map for conditions as of May 28 shows a small uptick in drought from the previous week. This is the first week that drought area has increased in more than a month, and it re-emerged in an area of South Texas centered on San Patricio County.

Drought conditions
26% now  
26% a week ago  
23% three months ago  
34% a year ago

Intensity
D0 abnormally dry  
D1 moderate drought  
D2 severe drought  
D3 extreme drought  
D4 exceptional drought

Drought change in the last month
Recent rains have mostly fallen in areas of the state already out of drought. As a result, the area of drought contracted only one percentage point in the last four weeks. Drought improved in Central Texas, but conditions degraded in South Texas and the Panhandle.
