Texas Water Development Board

E.G. Rod Pittman, Chairman, Lufkin
Jack Hunt, Vice Chairman, Houston
James E. Herring, Member, Amarillo
William W. Meadows, Member, Fort Worth
Thomas Weir Labatt III, Member, San Antonio
Dario Vidal Guerra, Jr., Member, Edinburg

J. Kevin Ward, Executive Administrator
William F. Mullican III, P.G., Deputy Executive Administrator, Office of Planning
Carolyn L. Brittin, Director, Water Resources Planning Division

Section 16.051 of the Texas Water Code directs the Texas Water Development Board to prepare, develop, formulate, and adopt a comprehensive State Water Plan that incorporates the regional water plans approved under Section 16.053. The State Water Plan shall provide for the orderly development, management, and conservation of water resources and preparation for and response to drought conditions, in order that sufficient water will be available at a reasonable cost to ensure public health, safety, and welfare; further economic development; and protect the agricultural and natural resources of the entire State.

January 2007

Percent of initial groundwater availability remaining between 2010 and 2060 for the Dockum, Edwards-Trinity (High Plains), Gulf Coast, Ogallala and Seymour aquifers

Existing reuse supplies through 2060

Reuse supplies with implementation of water management strategies

Water supply needs by water use category for 2010-2060

Water management strategy evaluation process

Total new supply volumes generated by all recommended water management strategies over the planning period

Recommended new major and minor reservoirs

Recommended unique reservoir sites, including designated sites

Recommended river and stream segments of unique ecological value in Region E

Recommended river and stream segments of unique ecological value in Region H

General location of major conveyance structures recommended by the planning groups

Total capital costs for water supplies, water treatment and distribution, wastewater treatment and collection, and flood control

Total biennial appropriations required to fund $1.7 billion needed for implementation of water management strategies by 2020

Total appropriations needed for the Water Infrastructure Fund and State Participation Program

Total project financing needed from the Water Infrastructure Fund and State Participation Program

Annual appropriations for the Water Infrastructure Fund and State Participation Program

Water-related financing provided by TWDB and the open municipal bond market from 1997-2006

Statewide average annual precipitation

Global trend in average temperature for 1901-2003

Statewide average annual temperature
