RECORDS OF WATER-LEVEL MEASUREMENTS IN REEVES COUNTY, TEXAS

Compiled by

C. R. Follett, Engineer

Texas Board of Water Engineers

September 1954

This bulletin contains measurements of the depth to water in 123 wells in Reeves County, which is in the western part of Texas. It is one of a series of publications by the Texas Board of Water Engineers which contain measurements of the water levels in selected observation wells made as a part of the cooperative program of ground-water investigations throughout the State by the United States Geological Survey and the Texas Board of Water Engineers. The records for Reeves County cover the period from 1930 through 1953; however, no measurements were made during the years 1933-38 and 1943-45.

During 1939 and 1940 an inventory of water wells was made in Reeves County as part of the Pecos River Joint Investigation, which covered part or all of Crane, Loving, Pecos, Reeves, and Ward Counties in Texas, and part of southeastern New Mexico. The results of the Texas part were published by the Texas Board of Water Engineers in 1941. Water-level measurements made in Reeves County during the time of the inventory are included in this bulletin.

During 1946 and 1947 a new inventory of irrigation wells was made in Ward and Reeves Counties as a further study of the development of ground water for irrigation in the Pecos area. Some of the results were published by the Texas Board of Water Engineers as a progress report in 1947.

Usually if more than one water-level measurement is made during a month only the highest water level is given in this report. Most of the water levels are reported in feet below the land surface; those for flowing wells are indicated by a plus (+) sign preceding the figure. The accompanying map shows the locations of the observation wells. Hydrographs showing the fluctuation of water levels in 6 wells and the precipitation at Pecos and Balmorhea are given on pages 29 and 30. Records of water wells, geologic data, pumpage data, and discussion of water levels are given in the following publications.
