

FLOYD COUNTY, TEXAS

* * *

Introduction
by
Walter N. White
Senior Hydraulic Engineer
United States Department of the Interior
Geological Survey

This release contains records of wells and pumping plants in Floyd County, Texas, together with tables of well logs, and well water analyses, and a map on which all the wells listed are shown, each well being given a number on the map corresponding to the number assigned to it in the well table.

The records were obtained in the course of an investigation in the Texas High Plains comprising a part of state-wide studies of the ground-water resources of Texas. The field work was first started in 1934, a reconnaissance being made in that year and in a part of 1935, covering the southern part of the High Plains in Kansas, Oklahoma, Colorado and New Mexico, as well as in Texas. That investigation was made under the direction of C. V. Theis, Associate Geologist, Geological Survey, United States Department of the Interior, and was supported by an allocation of funds by the Administrator of Public Works. In 1936 considerable data on irrigation from wells in different parts of the Texas High Plains, including a part of Floyd County, were obtained by engineers of the Resettlement Administration. In the spring of 1937 a systematic quantitative study of the ground-water resources of the Texas High Plains was started by the Texas Board of Water Engineers in cooperation with the Geological Survey with funds appropriated by the Texas Legislature and nearly equal amounts contributed by the Federal government. The Works Progress Administration has assisted in this investigation in Floyd County by contributing data on water wells obtained under Project No. 5072 of the Administrative Field Office at Lubbock.

Approximately 80 per cent of the records listed were obtained in the summer and fall of 1937 by W. L. Broadhurst, and Joe W. Lang, in connection with the regular cooperative program. The remainder were obtained by G. H. Shafer during the period December 11, 1937 to March 10, 1938, through the Works Progress Administration project. A part of the irrigation well data gathered by the Resettlement Administration in 1936, has been incorporated in the records.

The test wells were drilled by W. P. A. labor using a soil auger, drop auger, churn drill, and a sand bucket. Samples were collected at one foot intervals by the well driller in charge of the party. Mr. Shafer studied these samples and compiled the logs.

The analyses were made by chemists employed on Works Progress Administration Project 6507-5112, under the direction of Dr. E. P. Schoch, Director of the Bureau of Industrial Chemistry of The University of Texas, and E. W. Lohr, Chemist of the Quality of Water Division, Geological Survey. This release was typed and assembled by typists employed on the Works Progress Administration project which is sponsored by the Texas Board of Water Engineers, the Geological Survey, and the Bureau of Industrial Chemistry.

Thanks are due to the owners of wells and pumping plants in Floyd County who have given their cordial cooperation and assistance. Several well drillers and representatives of different pump companies also have contributed freely of their information. Acknowledgment is due the office of the Works Progress Administration at Lubbock for their cordial interest and cooperation.

Records of wells in Floyd County, Texas

(All wells are drilled unless otherwise indicated in "Remarks" column.)

(See "Logs of W.P.A. test wells" for all records of test wells.)

TOTAL DEPTH - - - - -		4015

CASING RECORD: 915 feet of 15½-inch casing; 686 feet of 12½-inch; 785 feet of 10-inch; and 1920 feet of 8½-inch.

Logs of test wells drilled by W. P. A. labor in Floyd County, Texas
 Samples examined and classified by G. H. Shafer, Project Superintendent.

	Thickness (feet)	Depth (feet)
<u>Well 76</u>		
Bottom of draw, side of county road, SW $\frac{1}{4}$ SW $\frac{1}{4}$ sec. 3, G. C. & S. F. R. R. sur., blk. D1, 10 miles north of Lockney.		
Black surface materials -	4	4
Silty gray sand - - -	2	6
Red sand and chalk - -	11	17
Caliche - - - - -	7	24
Dec. 27, 1937.		

	Thickness (feet)	Depth (feet)
<u>Well 83</u>		
Bottom of draw, side of county road, NE $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 21, G. C. & S. F. R. R. sur., blk. D1, 10 $\frac{1}{2}$ miles northeast of Lockney.		
Black surface materials -	2	2
Soft white caliche - -	2	4
Red and gray sand and caliche	2	6
Fine-grained silty sand -	6	12
Hard caliche and sand- -	13	25
Dec. 18, 1937.		

	Thickness (feet)	Depth (feet)
<u>Well 84</u>		
Bottom of draw, side of county road, NW $\frac{1}{4}$ SW $\frac{1}{4}$ sec. 15, G. C. & S. F. R. R. sur., blk. D1, 10 miles northeast of Lockney.		
Black surface materials -	4	4
Silty gray sand - - -	3	7
Silty gray sand and caliche pebbles- - -	2	9
Red and gray sand and chalk - - - - -	7	16
Hard caliche - - - - -	7	23
Red and gray chalky clay and sand - - - - -	4	27
Dec. 27, 1937.		

<u>Well 215</u>		
Floor of canyon, Jim Taylor tract, NE $\frac{1}{4}$ SE $\frac{1}{4}$ sec. 71, G. C. & S. F. R. R. sur., blk. GM, 14 $\frac{1}{2}$ miles northeast of Lockney.		
Bluish-gray clay and silt-	24	24
(Above was black before weathered)		
Water level, 3.3 feet below top of ground 168 hours after hole completed. Water sample collected. Jan. 19, 1938.		

<u>Well 216</u>		
Floor of canyon, Jim Taylor tract, NW $\frac{1}{4}$ SE $\frac{1}{4}$ sec. 71, G. C. & S. F. R. R. sur., blk. GM, 14 $\frac{1}{2}$ miles northeast of Lockney.		
Brown surface sand - -	2	2
Brown and blue clay and sand - - - - -	3	5
Greenish-black clay (weathers gray) - -	18	23

	Thickness (feet)	Depth (feet)
<u>Well 216--Continued</u>		
Water level, 2.6 feet below top of ground 168 hours after hole completed. Water sample collected. Jan. 19, 1938.		

<u>Well 217</u>		
Floor of canyon, Jim Taylor tract, NW $\frac{1}{4}$ SE $\frac{1}{4}$ sec. 71, G. C. & S. F. R. R. sur., blk. GM, 14 $\frac{1}{2}$ miles northeast of Lockney.		
Creek bed sand and gravel-	6	6
Stopped by caving.		
Water level, 2.7 feet below top of ground 168 hours after hole completed. Water sample collected. Jan. 19, 1938.		

<u>Well 218</u>		
Floor of canyon, Jim Taylor tract, SE $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 71, G. C. & S. F. R. R. sur., blk. GM, 14 $\frac{1}{2}$ miles northeast of Lockney.		
Surface materials- - -	1	1
Bluish-colored sandy clay-	6	7
Gray and yellow clay and sand - - - - -	5	12
Fine-grained blue sand and clay - - - - -	4	16
Water level, 8.6 feet below top of ground 168 hours after hole completed. Jan. 19, 1938.		

<u>Well 219</u>		
Floor of canyon, Jim Taylor tract, SE $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 71, G. C. & S. F. R. R. sur., blk. GM, 14 $\frac{1}{2}$ miles northeast of Lockney.		
Surface materials- - -	3	3
Blue clay and sand - - -	6	9
Coarse-grained sand and gravel - - - - -	3	12
Water level, 8.7 feet below top of ground 168 hours after hole completed. Water sample collected. Jan. 19, 1938.		

<u>Well 220</u>		
Floor of canyon, Jim Taylor tract, NW $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 71, G. C. & S. F. R. R. sur., blk. GM, 14 $\frac{1}{2}$ miles northeast of Lockney.		
Creek bed surface materials	1	1
Red sand and caliche pebbles- - - - -	15	16
Loose gray caving sand and coarse-grained gravel -	3	19
Jan. 19, 1938.		

Logs of W. P. A. test wells in Floyd County--Continued

	Thickness (feet)	Depth (feet)
<u>Well 221</u>		
Floor of canyon, Jim Taylor tract, NW $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 71, G. C. & S. F. R. R. sur., blk. GM, 14 $\frac{1}{3}$ miles northeast of Lockney.		
Sand, silt, and gravel	10	10
Coarse-grained yellow sand and gravel	9	19
Struck water at 13 feet. Water level, 13.3 feet below top of ground 120 hours after hole completed. Jan. 11, 1938.		

	Thickness (feet)	Depth (feet)
<u>Well 222</u>		
Floor of canyon, Jim Taylor tract, NE $\frac{1}{4}$ NE $\frac{1}{4}$ sec. 74, G. C. & S. F. R. R. sur., blk. GM, 14 $\frac{1}{3}$ miles northeast of Lockney.		
Silty light-red sand and caliche pebbles	18	18
Gray and pink sand and gravel	5	23
Jan. 11, 1938.		

	Thickness (feet)	Depth (feet)
<u>Well 223</u>		
Floor of canyon, Jim Taylor tract, NE $\frac{1}{4}$ NE $\frac{1}{4}$ sec. 74, G. C. & S. F. R. R. sur., blk. GM, 14 $\frac{1}{3}$ miles northeast of Lockney.		
Surface sand and gravel	10	10
Yellow sand and gravel	15	25
Water level, 20.3 feet below top of ground 120 hours after hole completed. Water sample collected. Jan. 11, 1938.		

	Thickness (feet)	Depth (feet)
<u>Well 226</u>		
Floor of canyon, Walter Long tract, NE $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 80, G. C. & S. F. R. R. sur., blk. GM, 13 $\frac{1}{2}$ miles northeast of Lockney.		
Washed-in surface materials and caliche	5	5
Silty light-red sand with caliche pebbles and boulders	55	60
Dec. 27, 1937.		

	Thickness (feet)	Depth (feet)
<u>Well 227</u>		
Floor of canyon, Walter Long tract, NE $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 80, G. C. & S. F. R. R. sur., blk. GM, 13 $\frac{1}{2}$ miles northeast of Lockney.		
Washed-in surface materials	4	4
Silty light-red sand and layers of caliche pebbles	48	52
Dec. 27, 1937.		

	Thickness (feet)	Depth (feet)
<u>Well 228</u>		
Bottom of draw, side of county road, NW $\frac{1}{4}$ NE $\frac{1}{4}$ sec. 1, blk. D2, 12 miles northeast of Lockney.		
Waxy black surface materials	3	3

	Thickness (feet)	Depth (feet)
<u>Well 228--Continued</u>		
Sticky greenish-colored clay		
	3	6
Fine-grained gray sand and clay		
	2	8
Sticky olive-green clay		
	7	15
Sandy chocolate-colored clay		
	1	16
Olive-drab sand and clay		
	7	23
Brown sand and clay		
	6	29
Silty light-gray sand and clay		
	7	36
Dec. 15, 1937.		

	Thickness (feet)	Depth (feet)
<u>Well 229</u>		
Gentle slope, side of county road, NW $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 30, G. C. & S. F. R. R. sur., blk. D1, 11 miles northeast of Lockney.		
Sandy brown surface materials		
	3	3
Silty red and gray sand and caliche pebbles		
	11	14
Red clay and fine-grained sand and gravel		
	5	19
Light-red sand and chalk		
	8	27
Dec. 15, 1937.		

	Thickness (feet)	Depth (feet)
<u>Well 231</u>		
Bottom of draw, side of county road, NW $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 20, G. C. & S. F. R. R. sur., blk. D1, 11 miles northeast of Lockney.		
Brown surface materials		
	1	1
Red clay and sand		
	2	3
Green clay and sand		
	2	5
Fine-grained silty gray sand		
	2	7
Red clay, sand and caliche		
	1	8
Silty gray sand and caliche pebbles		
	3	11
Sand, gravel and caliche		
	7	18
Dec. 15, 1937.		

	Thickness (feet)	Depth (feet)
<u>Well 310</u>		
Side of draw, -- Lewis tract, NW $\frac{1}{4}$ NE $\frac{1}{4}$ sec. 25, H. & G. N. R. R. sur., blk. 1, 17 miles east of Floydada.		
Dark-brown surface materials		
	4	4
Orange-colored sand and gravel		
	5	9
Coarse-grained yellow sand, gravel and boulders		
	8	17
Brown clay and chalky sand		
	3	20
Jan. 25, 1938.		

Logs of W. P. A. test wells in Floyd County--Continued

	Thickness (feet)	Depth (feet)
<u>Well 311</u>		
Slope, -- Lewis tract, NW $\frac{1}{4}$ SW $\frac{1}{4}$ sec. 25, H. & G. N. R. R. sur., blk. 1, 16 $\frac{1}{2}$ miles east of Floydada.		
Brown surface materials -	4	4
Buff-colored sand with caliche and quartz pebbles- - - -	16	20
Orange-colored sand and boulders - - - -	3	23
Coarse-grained gray sand and gravel - - - -	8	31
Jan. 25, 1938.		

	Thickness (feet)	Depth (feet)
<u>Well 312</u>		
Bottom of draw, Matador Land and Cattle Co. tract, NW $\frac{1}{4}$ NE $\frac{1}{4}$ Matador Land and Cattle Co. subdivision, 16 miles east of Floydada.		
Silt, top soil and gravel - - - -	3	3
Red sand, quartz and caliche pebbles- - -	10	13
Loose-packed red sand and gravel - - - -	3	16
Jan. 25, 1938.		

	Thickness (feet)	Depth (feet)
<u>Well 313</u>		
Edge of scarp, Jim Taylor tract, NW $\frac{1}{4}$ NW $\frac{1}{4}$ Matador Land and Cattle Co. subdivision, 16 miles east of Floydada.		
Silty pink sand and caliche pebbles- - - -	26	26
Jan. 25, 1938.		

	Thickness (feet)	Depth (feet)
<u>Well 567</u>		
Floor of canyon, SE $\frac{1}{4}$ SW $\frac{1}{4}$ sec. 20, blk. G, 6 miles southwest of Floydada.		
Red clay and sand- - -	11	11
Water level 4.1 feet below top of ground 20 hours after hole completed. Water sample collected. Jan. 27, 1938.		

	Thickness (feet)	Depth (feet)
<u>Well 568</u>		
Floor of canyon, NE $\frac{1}{4}$ SW $\frac{1}{4}$ sec. 20, blk. G, 6 miles southwest of Floydada.		
Silty tan-colored sand and chalk - - - -	2	2
Red clay and sand- - -	5	7
Fine-grained red sand and clay - - - -	5	12
Water level, 3.9 feet below top of ground 20 hours after hole completed. Water sample collected. Jan. 27, 1938.		

	Thickness (feet)	Depth (feet)
<u>Well 569</u>		
Floor of canyon, NW $\frac{1}{4}$ SW $\frac{1}{4}$ sec. 20, blk. G, 6 miles southwest of Floydada.		
Black surface materials -	1	1
Tan-colored sand - - -	4	5
Sticky red clay - - -	4	9
Fine-grained tan-colored sand and red clay - - -	9	18
Water level, 3.6 feet below top of ground 20 hours after hole completed. Water sample collected. Jan. 27, 1938.		

	Thickness (feet)	Depth (feet)
<u>Well 570</u>		
Bottom of draw, -- Daniels tract, NE $\frac{1}{4}$ SE $\frac{1}{4}$ sec. 18, blk. G, 6 $\frac{1}{2}$ miles southwest of Floydada.		
Light-red clay and sand -	2	2
Silty buff-colored sand -	6	8
Sticky red clay and silt -	10	18
Water level, 7.8 feet below top of ground 48 hours after hole completed. Feb. 2, 1938.		

	Thickness (feet)	Depth (feet)
<u>Well 571</u>		
Bottom of draw, -- Daniels tract, NW $\frac{1}{4}$ NE $\frac{1}{4}$ sec. 18, blk. G, 6 $\frac{1}{2}$ miles southwest of Floydada.		
Caliche, surface materials, and buff-colored sand -	2	2
Fine-grained buff-colored sand - - - -	10	12
Red clay and sand with caliche pebbles- - -	2	14
Water level 2.7 feet below top of ground 48 hours after hole completed. Feb. 2, 1938.		

	Thickness (feet)	Depth (feet)
<u>Well 572</u>		
Floor of canyon, -- Daniels tract, NE $\frac{1}{4}$ NW $\frac{1}{4}$ sec. 18, blk. G, 6 $\frac{1}{2}$ miles southwest of Floydada.		
Sandy brown surface materials and reddish-colored clay - - -		
	2	2
Reddish-colored clay and sand - - - -	9	11
Silty buff-colored sand -	6	17
Water level, 11.7 feet below top of ground 48 hours after hole completed. Water sample collected. Feb. 2, 1938.		

Logs of W. P. A. test wells in Floyd County--Continued

	Thickness (feet)	Depth (feet)

Grayish-white caliche silt and gravel - - - -	2	14
Rock - - - - -		14
Feb. 28, 1938.		

Partial analyses of water from wells in Floyd County, Texas

(Analyzed at the University of Texas under the direction of Dr. E. P. Schoch, Director of the Bureau of Industrial Chemistry; by J. E. Stulken, D. F. Riddell, and H. T. Davidson, Chemists; and J. A. Hammaza Martin Wieland, and Jack Ramsey, Assistant Chemists. Nitrate determined by E. W. Lohr, U. S. Geological Survey. Results are in parts per million. Well numbers correspond to numbers in table of well records.)

Well No.	Owner	Depth of well (ft.)	Date of collection	Total dissolved solids (calculated)	Calcium (Ca)	Magnesium (Mg)	Sodium and Potassium (Na / K) (calculated)	Bicarbonate (HCO ₃)	Sulfate (SO ₄)	Chloride (Cl)	Nitrate (NO ₃)	Total hardness as CaCO ₃ (calculated)
