Introduction

by

Samuel F. Turner
Associate Hydraulic Engineer
U. S. Geological Survey

The purpose of this survey was to obtain information concerning existing wells and springs, the quantity and quality of water they yield, and to put down test holes where additional information was needed.

This project was part of a statewide Works Progress Administration project known as a "Statewide Inventory of Water Wells," sponsored by the State Board of Water Engineers. The Division of Ground Water of the U. S. Geological Survey cooperated in the technical direction of the project and the Bureau of Industrial Chemistry of The University of Texas furnished laboratory space and equipment and supervised the chemical analyses.

The analyses were made by chemists employed on Works Progress Administration Project 6507-5112 at Austin, Texas, sponsored by the State Board of Water Engineers. This release was typed and assembled by typists and draftsmen employed on this project.

The field work in Guadalupe County was started December 19, 1935, with E. S. Altgelt an engineer as project superintendent but was shut down June 18, 1936, when Mr. Altgelt resigned to accept another position. Mr. E. J. Michal, an Engineer, resumed operations September 1, 1936, and completed the county October 8, 1936. This work was done as Project 2084 of District 10 of the Works Progress Administration, San Antonio, Texas. Mr. Altgelt and Mr. Michal should be given credit for their interest in the work and for the many extra hours they spent on the project. The office of the Works Progress Administration in the San Antonio District made this work possible by their constant help and cooperation.

This release contains the well and spring records and well logs obtained by the project superintendent, logs of the test holes drilled by the W. P. A. labor, and the chemical analyses of water from privately owned wells and springs. Locations of all wells and springs listed are shown on the map in the back of the release.

The test wells were drilled by W. P. A. labor using a soil auger, drop auger, churn drill, and a sand bucket. Samples were collected at one foot intervals by the well driller in charge of the party. The project superintendent studied these samples and compiled the logs.

Records of wells and springs in Guadalupe County, Texas
 (All wells are dug unless otherwise indicated in "Remarks" column.)
 (See "Logs of W. P. A. test wells" for all records of test wells.)

Logs of test wells drilled by W. F. A. Lubor in Guadalupe County, Texas
 Samples examined and classified by Emil J. Michal,
 Project Superintendent

	Thickness (feet)	Depth (feet)
<u>Well 13</u>		
Hillside, side of county road, west side, Antonio Maria Esnaurrizar survey, near Guadalupe River, 7 miles northwest of Seguin.		
Red and yellow sand- - - -	1	1
Red sand and yellow clay -	2	3
Yellow clay- - - - - - -	3	6
Reddish yellow sand- - - -	1	7
Red clay- - - - - - - - -	4	11
No water sample collected. Sept. 10, 1936.		

	Thickness (feet)	Depth (feet)
<u>Well 16</u>		
Rolling, side of county road, William J. Ragsdale survey, 8 miles north of Seguin.		
Surface materials- - - - -	2	2
Top soil and chalk - - - -	2	4
White chalk and gray clay-	10	14
Red sand and gray clay - -	3	17
Gray sand- - - - - - - -	8	25
No water sample collected. Oct. 1, 1936.		

	Thickness (feet)	Depth (feet)
<u>Well 18</u>		
Rolling, top of hill, side of county road near intersection of highway, Wm. J. Ragsdale survey, 8 miles north of Seguin.		
Surface materials- - - - -	1	1
Gravel- - - - - - - - - -	3	4
Yellow clay and gravel - -	4	8
Chalk and soapstone- - - -	1	9
Bluish-yellow clay - - - -	2	11
Grayish-blue clay- - - - -	16	27
Gray clay and red sand - -	1	28
No water sample collected. Oct. 1, 1936.		

	Thickness (feet)	Depth (feet)
<u>Well 26</u>		
Creek bottoms, side of county road, Antonio Maria Esnaurrizar survey, 4 1/2 miles northwest of Seguin.		
Surface materials- - - - -	1	1
Red clay and chalk - - - -	2	3
Yellow clay- - - - - - - -	2	5
Yellow clay and sand - - -	3	8
Yellow clay- - - - - - - -	4	12
Yellow clay and gravel - -	1	13
Yellow clay- - - - - - - -	2	15
Bluish-gray clay - - - - -	4	19
Gray clay- - - - - - - - -	2	21
No water sample collected. Sept. 10, 1936.		

	Thickness (feet)	Depth (feet)
<u>Well 32</u>		
River bottoms, side of county road, near junction, Jos. D. Clements survey, 2 1/2 miles west of Seguin.		

	Thickness (feet)	Depth (feet)
<u>Well 32--Continued</u>		
Surface materials- - - - -	1	1
Reddish-yellow clay- - - -	23	24
Red clay and gravel- - - -	1	25
Gravel - - - - - - - - - -	1	26
Water level, 21.2 feet below top of ground, 1/2 hour after hole completed. Water sample collected. Oct. 5, 1936.		

	Thickness (feet)	Depth (feet)
<u>Well 41</u>		
Rolling, side of county road, near highway intersection, Marjita Chirino survey, 3 1/2 miles north of Seguin.		
Black surface materials -	6	6
White chalk- - - - - - - -	11	17
Chalk and sand - - - - - -	2	19
Chalky rock- - - - - - - -	4	23
Water level, 21 feet below top of ground, 3 hours after hole completed. Water sample collected. Sept. 23, 1936.		

	Thickness (feet)	Depth (feet)
<u>Well 43</u>		
Rolling, side of county road, near highway intersection, Marjita Chirino survey, 4 1/2 miles north of Seguin.		
Black surface materials -	4	4
Yellow clay- - - - - - - -	1	5
White chalk- - - - - - - -	4	9
White chalk and gray sand-	12	21
Yellow and gray sand - - -	3	24
Yellow rock- - - - - - - -	1	25
No water sample collected. Sept. 23, 1936.		

	Thickness (feet)	Depth (feet)
<u>Well 48</u>		
Rolling, side of county road, near junction, J. Ussery survey, 5 miles northeast of Seguin.		
Surface materials- - - - -	3	3
Gravel - - - - - - - - - -	3	6
Gray clay and chalk- - - -	4	10
Red clay - - - - - - - - -	4	14
Red clay and sand- - - - -	2	16
No water sample collected. Sept. 22, 1936.		

	Thickness (feet)	Depth (feet)
<u>Well 49</u>		
Near intersection of county road and railway, Griffith Stewart survey, 4 1/2 miles northeast of Seguin.		
Surface materials- - - - -	5	5
Yellow clay- - - - - - - -	2	7
Gray clay and soapstone- -	2	9
Soapstone- - - - - - - - -	2	11
Red sand and gray clay - -	1	12
Gray sand- - - - - - - - -	3	15

	Thickness (feet)	Depth (feet)
<u>Well 49--Continued</u>		
Gray sand and iron gravel-	1	17
Gray sand- - - - -	1	18
Red sand - - - - -	1	19
Grayish-black sand - - - -	1	20
Light yellow sand- - - - -	2	22
Bluish-gray clay - - - - -	1	23
Gray clay and sand - - - -	1	24
No water sample collected. Sept. 16, 1936.		

	Thickness (feet)	Depth (feet)
<u>Well 171</u>		
Hillside, C. M. Wells tract, Jose de la Baume survey, 12 miles southeast of Seguin.		
Sand and flat concretions-	6	6
Yellow sand and flat concretions- - - - -	1	7
Banded yellow, gray, orange and red sand and clay- -	1	8
Banded sand and clay - - -	5	13
No water sample collected. April 24, 1936.		

	Thickness (feet)	Depth (feet)
<u>Well 172</u>		
Hillside, A. J. Mauermann tract, Jose de la Baume survey, 11 miles southeast of Seguin.		
Sandy materials- - - - -	6	6
Red and yellow clay and sand - - - - -	1	7
Red and yellow sand and clay with soapstone- - -	3	10
Banded red, yellow, and gray sand- - - - -	5	15
Banded red, yellow, pink, and purple sand- - - - -	5	20
No water sample collected. April 20, 1936.		

	Thickness (feet)	Depth (feet)
<u>Well 173</u>		
Valley, C. M. Wells tract, H. & F. C. R. R. Co. survey 2, 10 ¹ / ₂ miles southeast of Seguin.		
Sandy materials- - - - -	6	6
Hard red sand- - - - -	4	10
Yellow, red, and gray sand and clay-- - - - -	1	11
Pink and gray sand - - - -	1	12
Yellow, pink and gray sand with clay in vertical layers (cracks)- - - - -	2	14
No water sample collected. April 20, 1936.		

	Thickness (feet)	Depth (feet)
<u>Well 174</u>		
Hillside, A. J. Mauermann tract, Jose de la Baume survey, 11 ¹ / ₂ miles southeast of Seguin.		
Loached sandy materials- -	14	14
Yellow sand and clay - - -	1	15
Gray and yellow clay and sand - - - - -	1	16
Red sand and clay- - - - -	1	17
Yellow sand and clay - - -	3	20
Red sand and clay- - - - -	2	22
Banded red, yellow, pink, and gray sand- - - - -	1	23
Red sand and clay- - - - -	1	24
No water sample collected. April 8, 1936.		

	Thickness (feet)	Depth (feet)
<u>Well 175</u>		
Hillside, C. M. Wells tract, Jose de la Baume survey, 12 ¹ / ₂ miles southeast of Seguin.		
Sandy materials - - - - -	2	2
Yellow and red clay mixed with sand- - - - -	2	4
Coarse pink and yellow sand - - - - -	3	7
Yellow, gray and pink sand - - - - -	1	8
Yellow and gray sand mixed with layers of hard sandstone- - - - -	1	9
Banded sand with mica- - -	1	10
Yellow, brown and pink sand and mica between layers of sandstone- - -	1	11
Brown and gray sand and sandstone- - - - -	1	12
Banded yellow, pink, and brown sand - - - - -	2	14
Sandstone- - - - -		14
No water sample collected. April 19, 1936.		

	Thickness (feet)	Depth (feet)
<u>Well 176</u>		
Hillside, C. M. Wells tract, Jose de la Baume survey, 12 miles southeast of Seguin.		
Sandy materials and ferruginous concretions-	4	4
Yellow clay and sand - - -	1	5
Banded red and yellow clay-	2	7
Mixed yellow, red, and gray clay - - - - -	1	8
Sandstone- - - - -		8
Struck rock at 8 feet.		
Water level, 7.5 feet below top of ground, 1 hour after hole completed.		
Water sample collected. April 11, 1936.		

Logs of W. P. A. test wells in Adalupo County--Continued

	Thickness (feet)	Depth (feet)
<u>Well 178</u>		
Hillside, C. M. Wells tract, Jose de la Baume survey, 13 miles southeast of Seguin.		
Sandy materials - - - - -	6	6
Banded red, yellow, gray and orange clay and sand-	3	9
Banded red, gray, yellow, and pink clay, soapstone and sand - - - - -	2	11
Banded gray and yellow sand- - - - -	3	14
No water sample collected. April 3, 1936.		

<u>Well 180</u>		
Creek terraces, C. M. Wells tract, Jose de la Baume survey, 13 miles southeast of Seguin.		
Sandy materials - - - - -	5	5
Struck water at 5.2 feet.		
Water level, 3.6 feet below top of ground, 1/2 hour after hole completed.		
Water sample collected. April 6, 1936.		

<u>Well 181</u>		
Flat near creek, C. M. Wells tract, Jose de la Baume survey, 13 1/2 miles southeast of Seguin.		
Sandy materials - - - - -	4	4
Yellow and gray clay streaked - - - - -	3	7
Yellow and gray sand and clay - - - - -	1	8
Yellow and gray clay - - -	1	9
Yellow and gray sand - - -	1	10
Gray sand and mica with flat concretions- - - -	1	11
Yellow and gray sand - - -	1	12
Gray sand - - - - -	2	14
Yellow sand and mica - - -	1	15
Gray sand- - - - -	2	17
Yellow and gray sand - - -	1	18
Cross-bedded gray, yellow, and pink sand- - - - -	4	22
Banded yellow and gray sand with mica - - - - -	1	23
Gray sand- - - - -	1	24
Cross-bedded pink, yellow and gray sand- - - - -	1	25
Gray sand and mica - - - -	5	30
Gray, yellow and orange sand with mica - - - - -	1	31
Gray, orange, and purple sand with mica - - - - -	1	32

	Thickness (feet)	Depth (feet)
<u>Well 181--Continued</u>		
Brown and yellow sand and purple sandstone concretions- - - - -	1	33
Light brown sand and brown sandstone with mica- - -	1	34
Black carbonaceous clay- -	7	41
Gray carbonaceous clay and sand - - - - -	1	42
Water level, 33.5 feet below top of ground, 18 hours after hole completed.		
Water sample collected. April 9, 1936.		

<u>Well 183</u>		
C. M. Wells tract, Thos. J. Weeks survey, 12 1/2 miles southeast of Seguin.		
Sandy materials - - - - -	9	9
Banded yellow, red, pink, and gray clay and sand -	2	11
Gray clay and sand - - - -	1	12
Banded yellow, gray, and pink clay and sand - - -	8	20
Yellow sand- - - - -	2	22
Struck water at 22 feet.		
Water level, 19.5 feet below top of ground, 1 hour after hole completed.		
Water sample collected. April 10, 1936.		

<u>Well 184</u>		
Hillside, C. M. Wells tract, Thos. J. Weeks survey, 12 miles southeast of Seguin.		
Sandy materials - - - - -	8	8
Yellow sand- - - - -	1	9
Coarse-grained, orange and pink sand- - - - -	1	10
Mixed gray, yellow, pink, and orange sand- - - - -	1	11
Fine-grained, yellow and gray sand- - - - -	1	12
No water sample collected. April 9, 1936.		

<u>Well 186</u>		
Hillside, C. M. Wells tract, Thos. J. Weeks survey, 11 1/2 miles southeast of Seguin.		
Sand, round and flat concretions- - - - -	10	10
Coarse brown sand- - - - -	9	19
No water sample collected. April 22, 1936.		

Logs of W. L. A. test wells in Guadalupe County--Continued

	Thickness (feet)	Depth (feet)
<u>Well 187</u>		
Hillside, C. M. Wells tract, H. & T. C. R. R. Co. survey, 11 miles southeast of Seguin.		
Sand and flat concretions-	7	7
Hard red sand- - - - -	1	8
Yellow sand and clay - - -	1	9
Yellow, gray, and pink sand - - - - -	1	10
Gray sand- - - - -	1	11
Yellow and pink sand - - -	1	12
Coarse red sand- - - - -	3	15
Yellow sand- - - - -	1	16
Gray and yellow clay and sand - - - - -	1	17
No water sample collected. April 19, 1936.		

<u>Well 188</u>		
Hillside, C. M. Wells tract, H. & T. C. R. R. Co. survey 1, 11 miles southeast of Seguin.		
Sandy materials- - - - -	11	11
Banded pink, yellow, gray and orange clay and red concretions- - - - -	1	12
Struck water at 12.1 feet.		
Water level, 11.3 feet below top of ground, 1 hour after hole completed.		
Water sample collected. April 22, 1936.		

<u>Well 189</u>		
Hillside, C. M. Wells tract, near north line, H. & T. C. R. R. Co. survey 5, 10 miles southeast of Seguin.		
Sandy materials - - - - -	5	5
Purple sand and iron stone concretions- - - - -	1	6
Brown sand and iron stone concretions- - - - -	1	7
Brown sand and clay- - - -	4	11
Yellow and purple sand and clay with concretions- -	2	13
Light red sand and clay with soft concretions- -	6	19
Yellow sand and clay- - -	1	20
No water sample collected. April 14, 1936.		

<u>Well 190</u>		
Hillside, C. M. Wells tract, H. & T. C. R. R. Co. survey 3, 9 $\frac{1}{2}$ miles southeast of Seguin.		
Sandy materials- - - - -	9	9
Hard red sand- - - - -	3	12
No water sample collected. April 14, 1936.		

	Thickness (feet)	Depth (feet)
<u>Well 195</u>		
Hillside, Eugene Atzger tract, Jos. D. Clements tract, 7 $\frac{1}{2}$ miles southeast of Seguin.		
Sand and ferruginous gravel-	1	1
Red and yellow clay- - - -	1	2
Red sand and clay- - - - -	2	4
Red sand and gray clay - -	1	5
Yellow sand- - - - -	3	8
Yellow sand and soapstone-	1	9
Gray sand, sandy concretions, and soapstone flakes - - - - -	1	10
No water sample collected. Mar. 31, 1936.		

<u>Well 196</u>		
Guadalupe River terraces, Antonio Zoboroski tract, Jos. D. Clements survey, 7 miles southeast of Seguin.		
Black surface materials- -	2	2
Gravel and black clay- - -	1	3
Yellow and gray clay - - -	1	4
Mixed yellow clay and flint gravel - - - - -	1	5
Mixed yellow clay and limestone gravel - - - -	2	7
Gravel and gray clay - - -	3	10
Water level, 8.6 feet below top of ground, $\frac{1}{2}$ hour after hole completed.		
Water sample collected. Mar. 27, 1936.		

<u>Well 204</u>		
Rolling, side of county road, near junction, A. Neil survey, 4 miles northeast of Seguin.		
Sand - - - - -	1	1
Black surface materials- -	1	2
Gray clay- - - - -	5	7
Gray clay and chalk- - - -	1	8
Gray clay and gray fuller's earth- - - - -	3	11

Water level, 5.2 feet below top of ground, 1 $\frac{1}{2}$ hours after hole completed.

No water sample collected. June 12, 1936.

Well 465

Hillside, R. Wolfhart tract, Jno. Thompson survey, 11 $\frac{1}{2}$ miles west of Seguin.

Black surface materials and flint gravel - - - -	4	4
Flint gravel - - - - -		$\frac{1}{2}$

No water sample collected. June 12, 1936.

Well 466

Gentle slope, Louie Kurrie Estate, Jno. Thompson survey, 11 $\frac{1}{2}$ miles west of Seguin.

Black surface materials- -	3	3
Gray clay and sand - - - -	2	5
Gray limestone, clay, and flint gravel- - - - -	6	11

Water level, 3.5 feet below top of ground, 16 hours after hole completed.

Water sample collected. June 10, 1936.

	Thickness (feet)	Depth (feet)
--	---------------------	-----------------

Well 467

Hilltop, Olga Hakanson tract, Jno. Thompson survey, 11 $\frac{1}{2}$ miles west of Seguin.

Black surface materials- -	5	5
Gray soil- - - - -	3	8
Yellow clay and limestone-	1	9

Water level, 3.5 feet below top of ground, 10 hours after hole completed.

Water sample collected. June 9, 1936.

Well 468

Partindale Loan Co. tract, Jno. Thompson survey, 11 $\frac{1}{2}$ miles west of Seguin.

Black surface materials- -	4	4
Gray soil and round gravel-	1	5
Gray and yellow clay and flint gravel with chalk-	17	22

Water level, 3.1 feet below top of ground, 4 hours after hole completed.

Water sample collected. June 8, 1936.

Well 471

Gentle slope, Henry Schultz tract, Jno. Thompson survey, 12 $\frac{1}{2}$ miles west of Seguin.

Black surface materials- -	4	4
Gray clay and chalk- - - -	7	11

Water level, 9 feet below top of ground, 2 hours after hole completed.

Water sample collected. June 11, 1936.

Well 472

Hillside, John Schnable tract, Jno. Thompson survey, 12 miles west of Seguin.

Black surface materials and flint gravel- - - -	5	5
Brown clay and flint gravel	2	7
Rock - - - - -		7

No water sample collected. June 8, 1936.

Well 473

Hillside, side county road, S. Williams survey, 12 $\frac{1}{2}$ miles west of Seguin.

Black surface materials and flint gravel - - - -	2	2
Gray soil and limestone- -	3	5
Chalk - - - - -	2	7

Water level, 4.2 feet below top of ground, 1 hour after hole completed.

Water sample collected. June 8, 1936.

Logs of W. P. A. test wells in Guadalupe County--Continued

	Thickness (feet)	Depth (feet)
<u>Well 474</u>		
Hillside, August Ebert tract, T. Bressard survey, 12 $\frac{1}{3}$ miles west of Seguin.		
Black surface materials and flint gravel - - - - -	5	5
Gray clay and limestone pebbles- - - - -	2	7
Gray clay and chalk- - - -	5	12
Rock - - - - -		12
Water level, 11.5 feet below top of ground, $\frac{1}{4}$ hour after hole completed.		
Water sample collected. June 10, 1936.		

	Thickness (feet)	Depth (feet)
<u>Well 475</u>		
Hillside, side county road, T. Bressard survey, 13 miles west of Seguin.		
Black surface materials and hard white gravel- -	5	5
Brown clay and chalk with red specks of clay - - -	4	9
Yellow clay and chalk- - -	2	11
Water level, 10.4 feet below top of ground, $\frac{1}{2}$ hour after hole completed.		
Water sample collected. June 11, 1936.		

Partial analyses of water from wells in Guadalupe County, Texas

(Analyzed at The University of Texas under the direction of Dr. E. P. Schoch, Director of the Bureau of Industrial Chemistry, by J. E. Stullken, C. R. Stewart, D. F. Riddell, and Alfred J. Kelly, Chemists, and J. A. Harmsza, Martin Wieland and Jack Ramsey, Assistant Chemists. Results are in parts per million. Well numbers correspond to numbers in table of well records.)
