Austin, Texas
Sept. 15, 1936

Introduction

by

Samuel F. Turner

Associate Hydraulic Engineer

U. S. Geological Survey

The purpose of this survey was to obtain all the information possible concerning the source and the quantity and quality of ground water available for domestic, stock, irrigation, industrial, and public use.

This project was part of a Statewide Works Progress Administration Project known as a "Statewide Inventory of Water Wells" sponsored by the State Board of Water Engineers. The Division of Ground Water of the U. S. Geological Survey cooperated in the technical direction of the project and the Bureau of Industrial Chemistry of the University of Texas furnished laboratory space and equipment and supervised the chemical analyses.

The analyses were made by chemists employed on Works Progress Administration Project 2992 at Austin, Texas, sponsored by the State Board of Water Engineers. This report was typed and assembled by typists and draftsmen employed on this project.

The field work was started in Henderson County on January 27, 1936 as Project 2076 of District 5 of the Works Progress Administration, Palestine, Texas. W. M. Lyle, a geologist, was project superintendent. Mr. Lyle completed the field work in the county on May 18, 1936. This project included Van Zandt and Wood Counties but since these counties were located in the Dallas and Marshall WPA Districts, work has not been started in either county.

Great credit should be given to the Palestine District office of the Works Progress Administration for their constant cooperation on this project. Mr. Lyle should be given credit for his great interest and for the many extra hours he spent on the project.

This report contains the well and spring records and well logs obtained by the project superintendent, logs of the test wells drilled by the W. P. A. labor and the chemical analyses of water from privately owned wells and springs and from the test wells. Locations of all wells and springs mentioned are shown on Plates 2 to 9, inclusive, in the back of the report. Plate 1 is an index map showing the portion of the county that is covered by each of the other plates.

The test wells were drilled by hand, using a soil auger, drop auger, small churn drill, and a sand bucket. Samples were collected at one foot intervals by the well driller in charge of the party. The project superintendent studied these samples and compiled the logs.

Records of wells in Henderson County, Texas

(All wells are bored or drilled unless otherwise noted in Remarks)

No.	Distance from Aley	Survey See Plate I	Owner	Driller	Date comple- ted.	Depth of well (ft.)	Diam- eter of well (in.)	Height of measuring point a- bove gro- und(ft.) a/

Brown clay with greenish fine sand-----	10	310	Hard gray clay-----	140	720
Gray sandy clay-----	10	320	Black clay-----	120	840
Gray water sand with 2 inch flow at surface-----	30	350	TOTAL DEPTH-----		1320

Logs of test wells in Henderson County, Texas bored by W.P.A. labor.
Samples examined and classified by W.M. Lyle, Project Superintendent.

Well 1

Located on Trinity River bottoms, 8 miles east of Aley

	Thickness (feet)	Depth (feet)		Thickness (feet)	Depth (feet)
Blue gumbo-----	2	2	Red, gray, and black variega-		
Blue gumbo and gravel---	3	5	ted sticky sand-----	2	21
Yellow gumbo and gravel--	2	7	Yellow and gray sand----	2	23
Yellow gumbo-----	1	8	Blue water sand-----	1	24
Buff shale-----	3	11	Yellow water sand-----	2	26
Brown shale-----	8	19	Yellow sand and gravel--	1	27
			Struck water at 26 feet.		
			See table of water analyses.		

Well 3

Located on Trinity River bottoms, on County line 9½ miles northeast of Aley.

Black gumbo-----	8	8	Yellow and gray sand----	1	14
Brownish black gumbo con-			Yellow and gray water sand		
taining small gravel----	3	11	containing gravel-----	1	15
Gray and brown clay con-			Gray and yellow sand----	1	16
taining gravel-----	2	13	Water at 15 feet.		
			See table of water analyses.		

Well 22

Located 2½ miles northeast of Aley.

Surface sand-----	2	2	Yellow sand-----	3	14
Yellow and red clay----	2	4	Brown sand-----	4	13
Gray and yellow sand -----	5	7	No water		
Bluish gray sand -----	4	11			

Well 24

Located 2 miles northeast of Aley

Yellow surface sand-----	1	1	Gray and yellow water		
Red clay-----	2	3	sand-----	2	9
Yellow clay containing			Brown water sand-----	1	10
iron concretions-----	3	6	Blue and brown sticky		
Gray and yellow variega-			clay-----	2	12
ted sticky sand-----	1	7	Water at 9 feet. See table of water		
			analyses.		

Well 27

Located 3 miles northeast of Aley

Buff shale, little gravel	3	3	Yellow and gray variega-		
Yellow shale, little gravel	1	4	ted clay-----	2	15
Gray and yellow shale----	3	7	Red and yellow variega-		
Yellow shale-----	3	10	ted clay-----	3	18
Red and yellow variegated			Blue shale at bottom, no water.		
clay-----	3	13			

Logs of W. P. A. test wells--Continued

Well 28

Located 3 miles northeast of Aley.

	Thickness (feet)	Depth (feet)		Thickness (feet)	Depth (feet)
Surface sand-----	1	1	Yellow and gray variegated		
Brown sand and gravel----	3	4	sticky sand containing		
Yellow clay-----	3	7	gravel-----	4	12
Yellow clay containing sand and gravel-----	1	8	Rock at 12 feet.		
			No water.		

Well 29

Located 2-3/4 miles northeast of Aley.

Surface sand-----	1	1	White and gray sticky sand		
Brown and red sticky sand	1	2	containing gravel-----	5	9
Variegated sticky sand containing small gravel-	1	3	Yellow water sand-----	4	13
Gray and yellow sticky sand-----	1	4	Water at 7 feet.		
			See table of water analyses.		

Well 49

Located 2½ miles southwest of Aley.

Black gumbo-----	6	6	Water at 17 feet.		
Brown sandy shale con- taining gravel-----	12	18			

Well 62

Located 2½ miles south of Aley.

Black surface soil-----	3	3	Gray water sand-----	2	15
Grayish brown sticky sand	1	4	Blue clay-----	1	16
Gray and yellow sticky sand	9	13	Water at 13 feet. [See table of water analyses.]		

Well 64

Located 2½ miles south of Aley.

Brown sand-----	5	5	Light yellow sand-----	6	14
Yellow coarse sand-----	3	8	No water.		

Well 69

Located 5 miles south of Aley.

Black gumbo-----	3	3	Brown sand containing gravel-----	3	17
Black gumbo containing gravel-----	3	6	No water.		
Brown shale containing small gravel-----	8	14			

Logs of W. P. A. test wells--Continued

Well 70

Located 5½ miles scuthenest of Aley.

	Thickness (feet)	Depth (feet)		Thickness (feet)	Depth (feet)
Sticky black sand-----	3	3	Gray and brown clay contain- ing gravel-----	1	12
Sticky gray sand-----	2	5	Yellow and gray sand-----	4	16
Gray and yellow sticky sand-----	3	8	Yellow sand-----	4	20
Gray and yellow sand con- taining gravel-----	2	10	Gray sticky sand-----	2	22
Gray and yellow variegated sand containing small gravel-----	1	11	Water at 18 feet. See table of water analyses.		

Well 104

Located 4-1/4 miles northwest of Eustace.

Surface soil-----	3	3	Gray shale-----	2	10
Brown and yellow sticky sand-----	1	4	Gray and red shale-----	1	11
Sticky yellow sand-----	1	5	Iron concretions at 11 foot		
Gray and yellow shale---	3	8	No water.		

Well 106

Located 4 miles northwest of Eustace.

Brown surf'cc sand. -----	2	2	Sticky yellow sand-----	2	7
Gray and red mottled clay an. sand-----	1	3	Gray water sand-----	2	9
Clay and sand-----	2	5	Water at 7 feet. See table of water analyses.		

Well 110

Located 3 miles northwest of Eustace.

Grayish red clay-----	2	2	White sand-----	1	10
Grayish yellow sand-----	1	3	White and yellow sand----	1	11
Gray and white sand-----	1	4	Yellow sand-----	1	12
Yellow and red sand-----	2	6	Blue shale-----	1	13
Yellow and white sand----	2	8	Pottery clay-----	1	14
Yellow sand-----	1	9	No water.		

Well 112

Located 1-1/4 miles northwest of Eustace.

Brown soil and sand-----	1	1	Coarse sticky yellow sand containing gr' vcl-----	1	11
Whitish yellow sand-----	4	5	Co rse gray water sand----	2	13
White and yellow sand----	1	6	Water at 7 feet.		
Red and gray sand-----	2	8			
Bluish gray and yellow sand-----	2	10			

Logs of W. P. A. test wells--Continued

Well 113

Located 1-1/4 miles northwest of Eustace.

	Thickness (feet)	Depth (feet)		Thickness (feet)	Depth (feet)
Red sand-----	10	10	White water sand-----	2	23
Red sandy shale-----	6	16	Red sand-----	2	25
Brown sandy shale-----	1	17	Brown shale and sand-----	3	28
Brown sandy shale-----	3	20	Rock at 28 feet,		
Red sandy shale-----	1	21	Water at 23 feet.		

Well 114

Located 1-1/4 miles northwest of Eustace.

Surface sand-----	1	1	Yellow and white sand-----	1	19
Red and yellow clay-----	13	14	Fine yellow sand-----	1	20
Red and gray clay-----	1	15	Buff and gray clay-----	1	21
Buff shale-----	1	16	Yellow and white shale-----	4	25
Buff and white shale-----	1	17	White chinc. clay-----	2	27
Yellow sand-----	1	18	Water at 20 feet. (See table of water analyses.)		

Well 115

Located 1-1/4 miles northwest of Eustace.

Brown surface sand-----	1	1	Coarse yellow and white sand-----	1	7
Light brown sand-----	1	2	Course yellow sand containing small flakes of biotite-----	1	8
Yellow and brown sand-----	1	3	Coarse brown, yellow, and gray sand-----	2	10
Red clay-----	1	4	Water at 8 feet,		
Red and gray clay-----	1	5			
Coarse gray sand and red clay-----	1	6			

Well 117

Located 3/4 mile northwest of Eustace.

Buff sticky shale-----	6	6	Gray and yellow sticky sand-----	2	16
Sandstone with iron concretions-----	3	9	Blue and yellow sticky shale-----	7	23
Brown surface sand -----	1	10	Water at 16 feet,		
Black surface soil-----	2	12			
Brown and gray sticky sand	2	14	'See table of water analyses.'		

Well 125

Located 5-1/4 miles west of Eustace.

Brown surface sand-----	3	3	Gray sticky shale-----	10	16
Brown sticky sand-----	3	6	No water.		

Well 127

Located 5-1/4 miles northwest of Eustace.

Red and yellow clay-----	2	2	Brown water sand-----	2	6
Coarse brown and yellow sand-----	2	4	Water at 5 feet.		

Logs of T. P. A. test wells--Continued

Well 130

Located 7 miles west of Eustace.

	Thickness (feet)	Depth (feet)		Thickness (feet)	Depth (feet)
Sticky surface soil-----	4	4	Yellow and gray sand contain- ing small gravel-----	2	16
Brown sand-----	3	7	Black, gray, and yellow, <u>streaked</u> , sticky clay con- taining iron concretions-----	12	18
Gray and brown sand-----	4	11	Water at 14 feet		
Brown sand-----	1	12	See table of water analyses,		
Gray and yellow sticky sand-----	1	13			
Yellow water sand-----	1	14			

Well 131

Located 8 miles west of Eustace.

Surface sand-----	1	1	Gray shale-----	2	20
Dark shale-----	1	2	Gray and yellow shale-----	3	23
Gray sandy shale-----	2	4	Gray shale-----	1	24
Clay and little sand-----	1	5	Yellow and gray shale-----	1	25
Mottled clay, little sand	1	6	Yellow sand-----	1	26
Yellow sand-----	3	9	Yellow and gray sand-----	1	27
White sand-----	2	11	Yellow sand-----	1	28
White and yellow sand----	2	13	Gray shale, little sand---	1	29
White sand-----	1	14	Yellow sand-----	3	31
White and yellow sand and shale-----	1	15	Gray and yellow shale with little sand-----	1	32
Iron concretions-----	1	16	White clay and sand-----	2	34
Gray shale, little sand--	1	17	No water,		
Yellow shale-----	1	18			

Well 132

Located $8\frac{1}{2}$ miles west of Eustace.

Black gumbo-----	12	12	Sticky bluish gray and brown shale -----	4	22
Bluish gray sticky clay---	4	16			
Bluish gray sticky clay--	2	18	Water at 21 feet See table of water analyses.		

Well 150

Located 5 miles south of Eustace.

Red clay-----	1	1	Brown and gray sandy shale	2	7
Red and gray clay-----	2	3	Lignite-----	1	8
Yellow and gray clay-----	2	5	Water at 7 feet See table of water analyses.		
		:			

Well 151

Located 5 miles south of Eustace.

Surface sand-----	0	2	Brown sand with black iron stain-----	2	7
Brown water sand-----	2	4			
Gray sand-----	1	5	No water,		

Logs of W. P. A. test wells--Continued

Well 157

Located $8\frac{1}{2}$ miles southwest of Eustace.

	Thickness (feet)	Depth (feet)		Thickness (feet)	Depth (feet)
Surface soil-----	1	1	Red and white coarse sand--	2	34
Red shale-----	20	21	Coarse white sand-----	1	35
Yellow sand-----	4	25	Brown and yellow sand-----	1	36
Gray and red clay-----	4	29	Brown shale and white sand-	1	37
Gray and brown sand-----	1	30	Dry buff shale-----	3	40
White and brown sand-----	1	31	No water.		
White sticky clay-----	1	32			

Well 168

Located $8\frac{1}{2}$ miles southwest of Eustace.

Black gumbo-----	4	4	Bluish gray clay and sand-	3	17
Buff gumbo and sand-----	3	7	Blue clay and sand-----	1.	18
Brown gumbo-----	4	11	Sand and gravel-----	1.	19.
Yellow clay and sand-----	3	14	Water at 16 feet. See table of water analyses.		

Well 169

Located 8 miles southwest of Eustace.

Gray sand-----	1	1	Blue and buff sticky shale and sand-----	3	8
Gray and yellow sand-----	1	2	Gray sticky sand-----	4	12
Brown sand-----	1	3	Water at 5 feet. See table of water analyses.		
Variegated brown, yellow, and white, sand-----	2	5			

Well 175

Located $10\frac{1}{2}$ miles southwest of Eustace.

Black gumbo-----	4	4	Yellow sticky clay-----	2	18
Bluish gray, sandy shale	5	9	Yellow sand-----	6	24
Buff shale containing limestone concretions---	4	13	Yellow water sand-----	1	25
Brown sticky shale-----	3	16	Water at 7 feet. See table of water analyses.		

Well 176

Located $10\frac{1}{2}$ miles sout. west of Eustace.

Gray and yellow sticky clay-----	1	1	Yellow and gray variegated shale containing lime concretions-----	2	11
Bluish gray clay-----	1	2	Yellow and white sand-----	4	15
Blue gumbo-----	1	3	Yellow clay-----	1	16
Gray gumbo-----	1	4	Gray sand-----	1	17
Yellow Clay-----	2	6	Yellow and gray sticky sand containing calcite and fossils-----	3	20
Buff shale containing lime concretions-----	2	8	Gray water sand containing gravel and shale-----	3	23
Yellow and gray variegated shale-----	1	9	Water at 20 feet.

INDEX MAP OF HENDERSON COUNTY, TEXAS, SHOWING AREAS
COVERED BY PLATES 1, 2, 3, 4, 5, 6, 7, 8, and 9.

EXPLANATION

- Well with hand pump.
- Well with windmill or small power pump.
- ◎ Well with pumping plant (5 horsepower or larger)
- Flowing well
- ◆ Well drilled to test for oil or gas
- Test well drilled by W.P.A. labor
- ◐ Spring

PLATE 2, SHOWING LOCATION OF WATER WELLS
NEAR EUSTACE, HENDERSON COUNTY, TEXAS

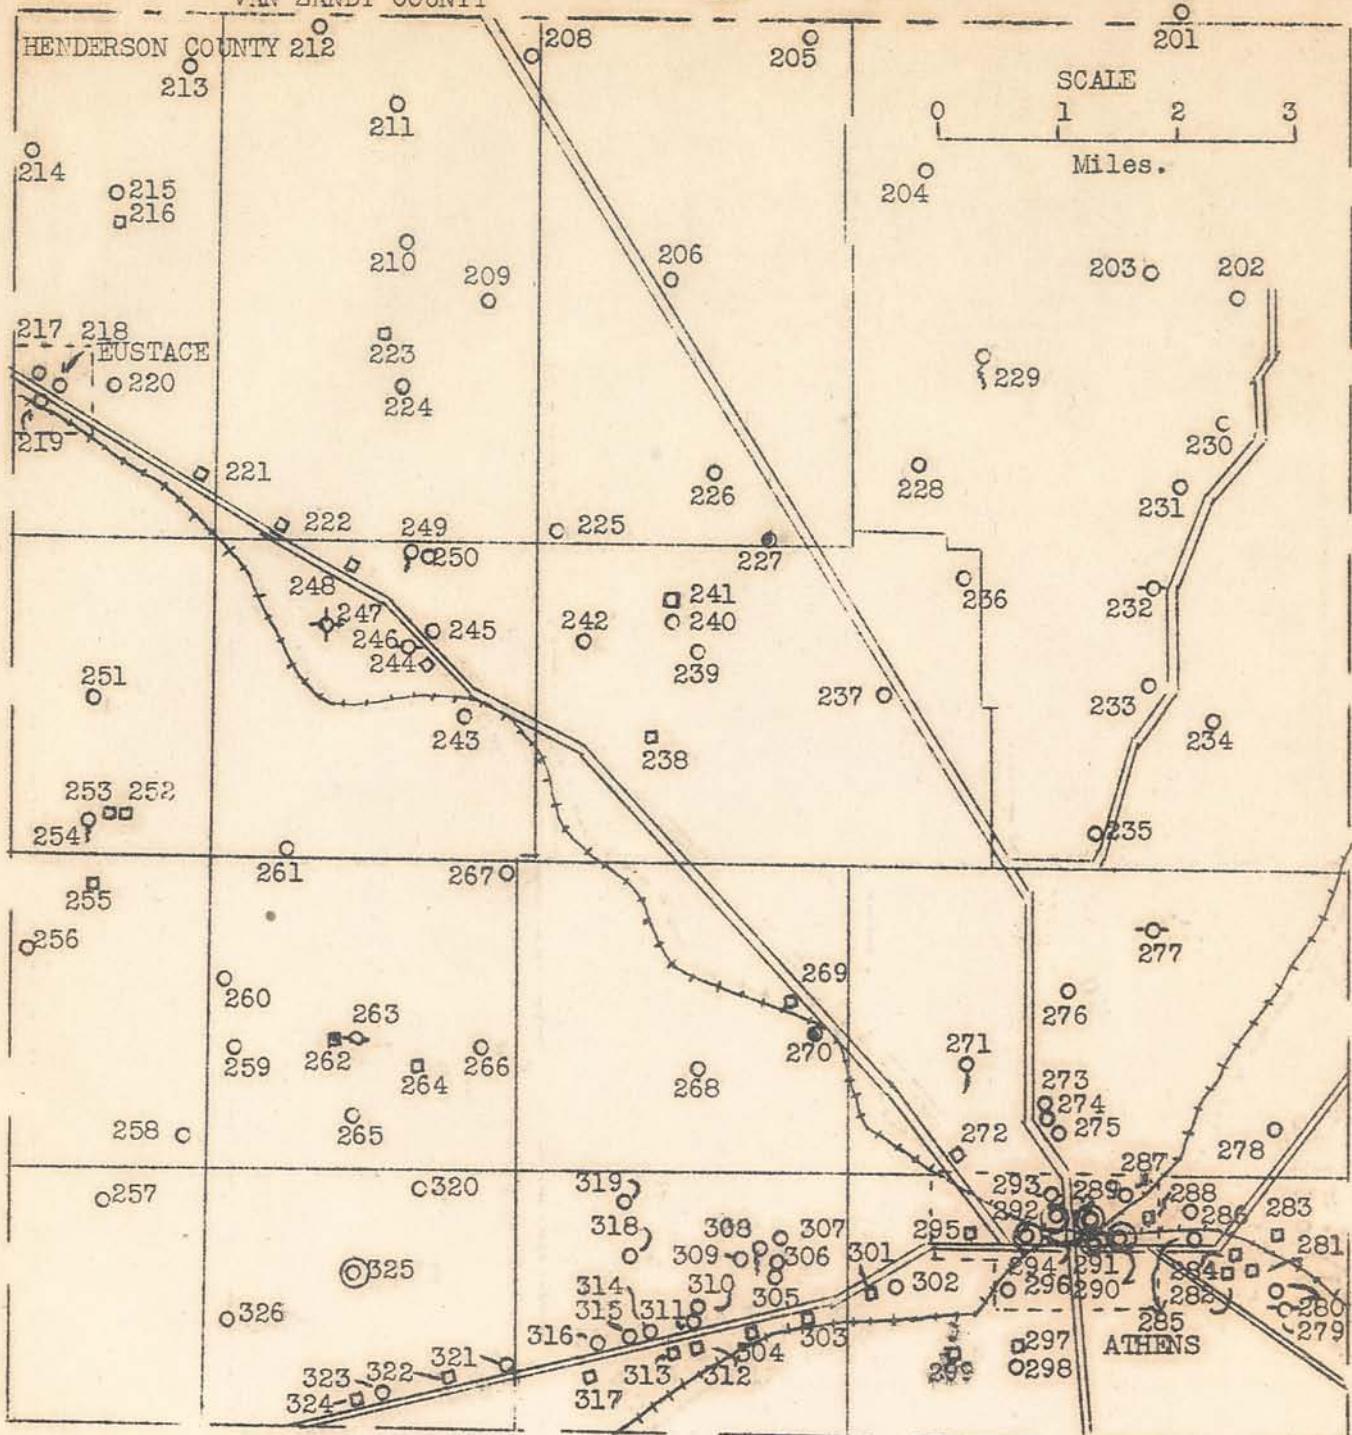

Base compiled from county ownership map
and field notes

Field work by W. M. Lyle

Texas Board of Water Engineers
assisted by U.S. Geological Survey

SCALE

0 1 2 3 Miles.

EXPLANATION

- Well with hand pump.
- Well with windmill or small power pump.
- ◎ Well with pumping plant (5 horsepower or larger)
- Flowing well.
- Well drilled to test for oil or gas.
- Test well drilled by W.P.A. labor.
- ♀ Spring.

PLATE 3, SHOWING LOCATION OF WATER WELLS NEAR ATHENS, HENDERSON COUNTY, TEXAS

Base compiled from county ownership map
and field notes

Field work by W. M. Lyle

Texas Board of Water Engineers
assisted by U. S. Geological Survey

EXPLANATION

- Well with hand pump.
- Well with windmill or small power pump
- ◎ Well with pumping plant (5 horsepower or larger).
- Flowing well
- Well drilled to test for oil or gas.
- Test well drilled by W. P. A. labor.
- Q Spring.

PLATE 5, SHOWING LOCATION OF WATER WELLS
NEAR CHANDLER, HENDERSON COUNTY, TEXAS

Base compiled from county ownership map
and field notes.

Field work by W. M. Lyle.

Texas Board of Water Engineers
assisted by U. S. Geological Survey.

EXPLANATION

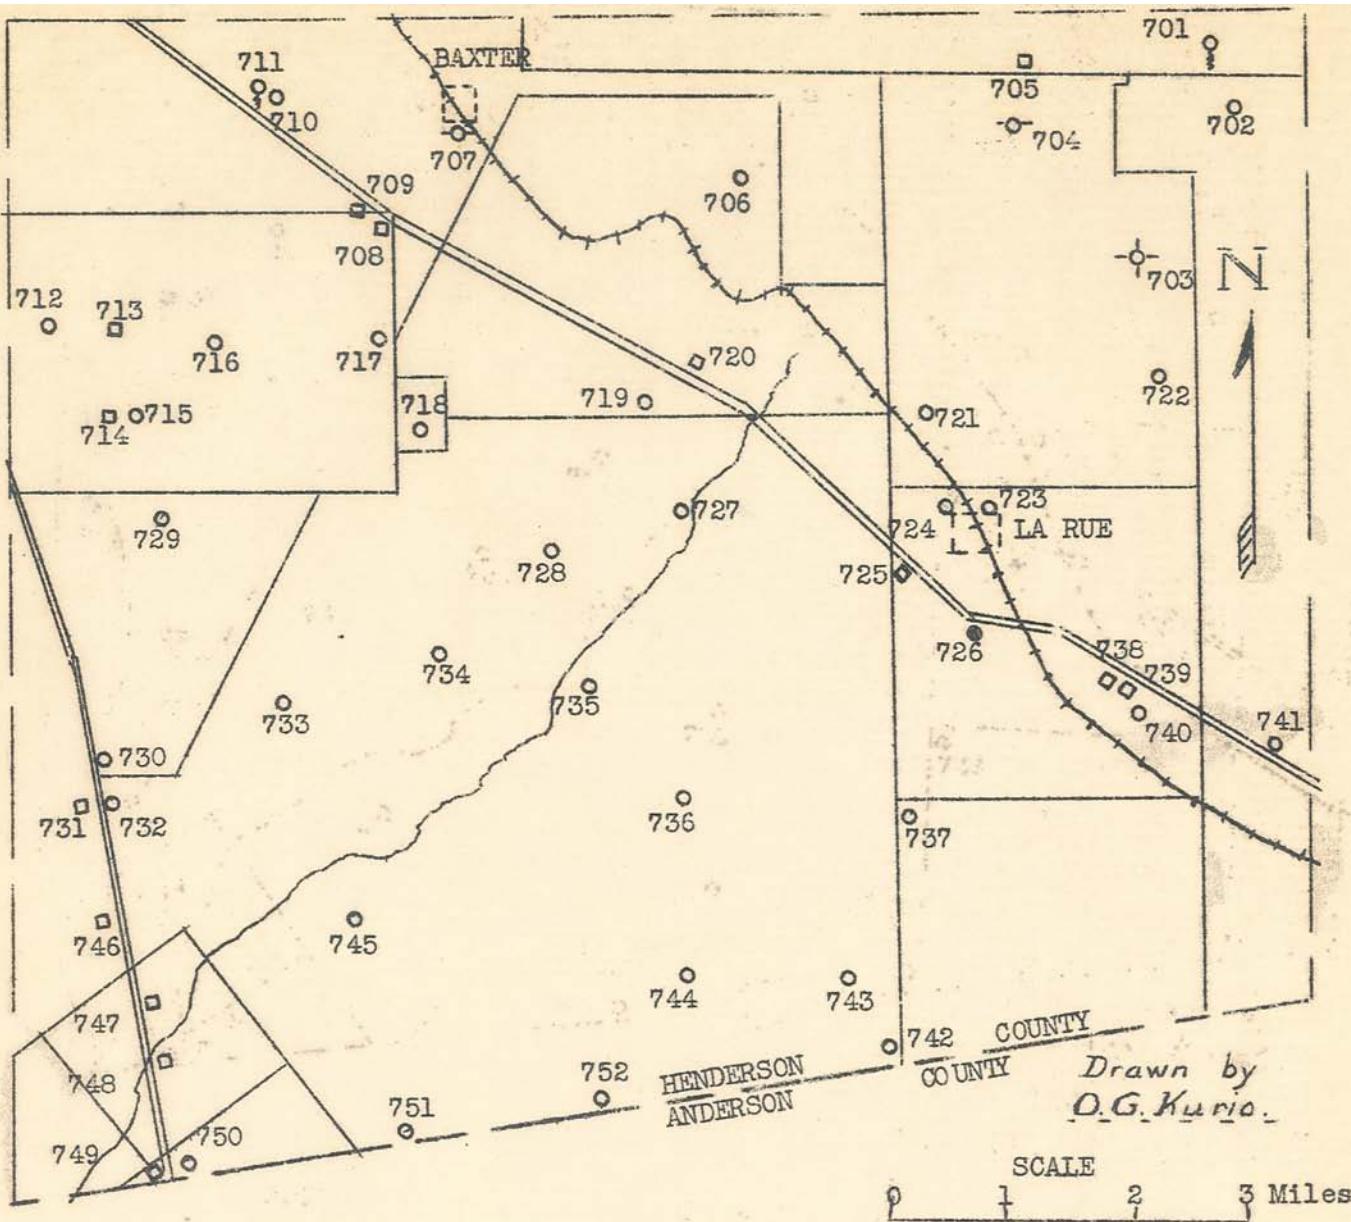

- Well with hand pump.
- ⊖ Well with windmill or small power pump.
- ◎ Well with pumping plant (5 horsepower or larger).
- Flowing well.
- △ Well drilled to test for oil or gas
- Test well drilled by W. P. A. labor
- ◐ Spring.

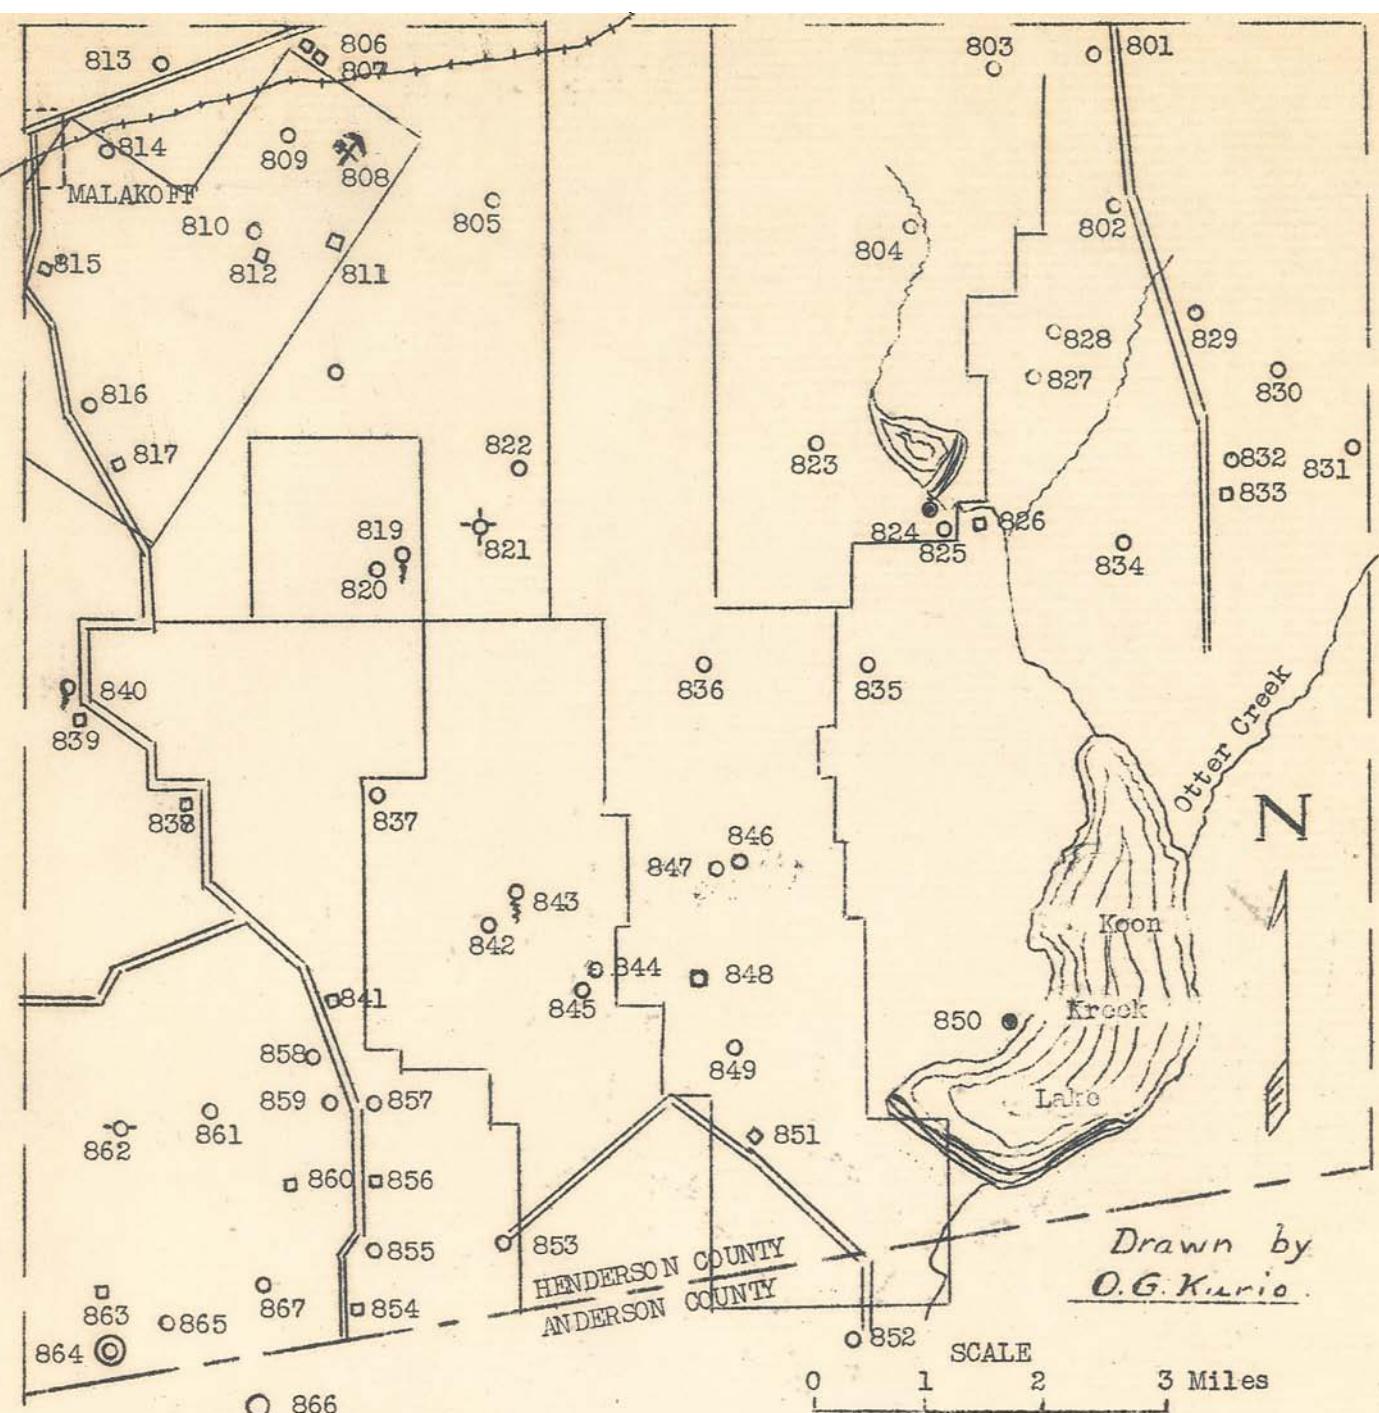

PLATE 6, SHOWING LOCATION OF WATER WELLS NEAR POYNER, HENDERSON COUNTY, TEXAS

Base compiled from county ownership map and field notes.

Field work by W. M. Lyle.

Texas Board of Water Engineers assisted by U. S. Geological Survey.

EXPLANATION

- Well with hand pump.
- Well with windmill or small power pump.
- ◎ Well with pumping plant (5 horsepower or larger).
- Flowing well.
- ◆ Well drilled to test for oil or gas.
- Test well drilled by W. P. A. labor.
- ✖ Spring.
- ❖ Mine.

PLATE 8, SHOWING LOCATION OF WATER WELLS
NEAR MALAKOFF, HENDERSON COUNTY, TEXAS.

Base compiled from county ownership map
and field notes.

Field work by W. M. Lyle.

Texas Board of Water Engineers
assisted by U. S. Geological Survey
