DEPARTMENT OF THE INTERIOR, GEOLOGICAL SURVEY

NOVEMBER 1944

TERRY COUNTY, TEXAS

Records of wells and springs, drillers' logs, water analyses,  
and map showing locations of wells and springs

TEXAS STATE BOARD OF WATER ENGINEERS

C. S. Clark, Chairman

J. W. Fritchett, Member

Prepared in cooperation with the United States  
Department of the Interior, Geological Survey

November 1944

# TERRY COUNTY, TEXAS

By

G. H. Cromack

## Introduction

This publication contains records of 195 wells and one spring, drillers' logs of 22 wells, and results of chemical analyses of water from 134 wells and one spring in Terry County, Texas. It also includes a map, showing the locations of the wells and spring, each one being given a number on the map corresponding to the number assigned to it in the records.

The field data were obtained by G. H. Cromack in June 1944 in connection with a state-wide program of ground-water investigations in Texas conducted by the State Board of Water Engineers in cooperation with the United States Department of the Interior, Geological Survey.

The water analyses were made by W. W. Hastings and J. H. Rowley, chemists of the Quality of Water Division of the Federal Geological Survey. The results of the analyses, which relate only to the mineral constituents in the water, and not to its sanitary character, are tabulated in parts per million.

The publication should serve as a guide to land owners, officials of industrial plants, well drillers, and others who need ground water information for different parts of Terry County. A limited number of copies are available for free distribution. They may be obtained by addressing a request to Mr. C. S. Clark, Chairman, Texas State Board of Water Engineers, 302 West 15th Street, Austin, Texas.

Records of wells and springs in Terry County, Texas

Partial analyses of water from wells and springs in Terry County, Texas

Analyzed at The University of Texas under the direction of W. W. Lohr and W. W. Hastings, Chemists, U. S. Department of the Interior, Geological Survey and Dr. E. P. Schoch, Director of the Bureau of Industrial Chemistry. Results are in parts per million. Well numbers correspond to numbers in table of well records.
