

Lower Sabine Update Meetings

The Texas Instream Flow Program held update meetings in Orange, TX on May 6 and 7 and in Many, LA on July 29, 2008. Topics discussed included an overview of the TIFP and a description of activities in the Lower Sabine Basin. Participants also had the opportunity to describe what they value about this portion of the Sabine River. The workgroup process that will develop an instream flow study design for the Lower Sabine was also described. Presentations and other information are provided below.

- 1) Sign-in and refreshments
- 2) Welcome and Introductions
