Application Checklist**

**I. GENERAL INFORMATION**

- ✓ 1. Legal name of applicant(s).
- ✓ 2. Regional Water Planning Group:
- ✓ 3. Authority of law under which the applicant was created.
- ✓ 4. Applicant's official representative, Name, Title, Mailing address, Phone number, Fax number, if available, E-mail Address, and Vendor ID Number.
- ✓ 5. Is this application in response to a Request for Proposals published in the Texas Register?  
Yes      ✓      No
- ✓ 6. If yes to No. 5 above, list document number and date of publication of the Texas Register.
- ✓ 7. Type of proposed planning (Check all that apply)
  - Initial scope of work ✓
  - Development of a regional water plan ✓
  - Revision of a regional water plan ✓
  - Special studies approved by TWDB ✓
- ✓ 8. Total proposed planning cost
- ✓ 9. Cash Contribution to the study.
- ✓ 10. List source of cash contribution, explanation of source of local cash contribution.
- ✓ 11. Total grant funds requested from the Texas Water Development Board.
- ✓ 12. Detailed statement of the purpose for which the money will be used. . (Not to exceed 1 page.)
- ✓ 13. Detailed description of why state funding assistance is needed. (Not to exceed 1 page.)
- ✓ 14. Identify potential sources and amounts of funding available for implementation of viable solutions resulting from proposed planning

## **II. PLANNING INFORMATION**

- ✓ 15. **A detailed scope of work for proposed planning. (Not to exceed 6 pages.)**
- ✓ 16. **Prioritization of scope of work tasks by the regional planning group.**  
Provided in Scope of Work
- ✓ 17. **A task budget for detailed scope of work by task. Example is attached.**
- ✓ 18. **An expense budget for detailed scope of work by expense category.**
- ✓ 19. **A time schedule for completing detailed Scope of Work by task.**
- ✓ 20. **Specific deliverables for each task in Scope of Work.**  
Included in Scope of Work
- ✓ 21. **Method of monitoring study progress.**  
Included in Scope of Work, Page 1.
- ✓ 22. **Qualifications and direct experience of proposed project staff.**  
See Appendices

## **III. WRITTEN ASSURANCES**

Written assurance of the following items:

- ✓ **Proposed planning does not duplicate existing projects;**
- ✓ **Implementation of viable solutions identified through the proposed planning will be diligently pursued and identification of potential sources of funding for implementation of viable solutions;**
- ✓ **If a grant is awarded, written evidence that local matching funds are available for the proposed planning must be provided when the contract is executed.**

## **IV. PROOF OF NOTIFICATION**

- ✓ **Proof of notification**

**Develop or revise regional water plans. Eligible applicants requesting funds to develop or revise regional water plans must, not less than 30 days before board consideration of the application, provide notice that an application for planning assistance is being filed with the executive administrator by:**

**(1) publishing notice once in a newspaper of general circulation in each county located in whole or in part in the regional water planning area; and**

**(2) mailing notice to each mayor of a municipality with a population of 1,000 or more or which is a county seat and that is located in whole or in part in the regional water planning area, to each county judge of a county located in whole or in part in the regional water planning area, to all districts and authorities created under Texas Constitution, Article III, §52, or Article XVI, §59, located in whole or in part in the regional water planning area based upon lists of such water districts and river authorities obtained from Texas Commission on Environmental Quality, and all regional water planning groups in the state.**

**The notice must include the following:**

- ✓ Name and address of applicant and applicant's official representative;**
- ✓ Brief description of proposed planning area;**
- ✓ Purpose of the proposed planning;**
- ✓ Texas Water Development Board Executive Administrator's name and address; and**
- ✓ Statement that any comments on the proposed planning must be filed with the applicant and the Texas Water Development Board Executive Administrator within 30 days of the date on which the notice was mailed.**

**2011 SOUTH CENTRAL TEXAS REGIONAL WATER PLAN  
REGION L  
FIRST BIENNIUM PLANNING TOPICS**

**GENERAL INFORMATION**

1. *Legal name of applicant:*

San Antonio River Authority

2. *Regional Water Planning Group:*

South Central Texas Regional Water Planning Area  
(Texas Water Development Board Region L)

3. *Authority of law under which the applicant was created:*

The San Antonio River Authority is a conservation and reclamation district of the State of Texas, created in 1937, pursuant to Article 16, Section 59 of the Texas constitution as contained in Chapter 276, Page 556, Acts of the 45th Legislature and as subsequently amended.

4. *Applicant's official representative:*

Gregory E. Rothe, General Manager  
San Antonio River Authority  
100 East Guenther Street  
P.O. Box 839980  
San Antonio, Texas 78283  
Phone: 210/302-3600  
Fax: 210/227-4323  
Email: grothe@sara-tx.org

5. *Is this application in response to a Request for Proposals published in the Texas Register?*

Yes

6. *If yes to No. 6 above, list document number and date of publication of the Texas Register.*

June 23, 2006, Volume 21, Number 25

7. *Type of proposed planning (Check all that apply)*
- |                                      |   |
|--------------------------------------|---|
| Initial scope of work                | ✓ |
| Development of a regional water plan | ✓ |
| Revision of a regional water plan    | ✓ |
| Special studies approved by TWDB     | ✓ |
8. *Total proposed planning costs:* \$1,097,325
9. *Cash contribution to the study* \$144,671
10. *List source of cash contribution, explanation of source of local cash contribution*  
See attached letters from contributors: San Antonio River Authority, San Antonio Water System, and Guadalupe-Blanco River Authority.
11. *Total grant funds requested from the Texas Water Development Board:* \$952,654
12. *Detailed statement of the purpose for which the money will be used. (Not to exceed 1 page.)*

This First Biennium Scope of Work for the South Central Texas Regional Water Planning Group's 2011 Water Plan was developed to resolve the most divisive issues that delayed adoption of the previous water plan. The approach is to continuously build consensus through an 1) extensive public outreach process, 2) concerted internal effort, and 3) sound scientific study.

As one of the largest and most geographically diverse regional planning groups in the state, the SCTRWPG faces unique challenges. Planning Group members unanimously felt that comprehensive public participation and facilitation processes were vital in overcoming substantive obstacles encountered in the 2006 planning cycle. The Biennium Work Scope should provide greater opportunity for public input, accountability to stakeholders, and consensus within the Planning Group, according to Group Members.

To ensure timely completion of its 2011 plan the group has scoped the work to address the most urgent issues (topics) of the last planning cycle in a systematic fashion. These issues were outlined in Chairman Con Mim's February 3, 2006 letter attached hereto.

During three meetings in 2006, the SCTRWPG prioritized these topics through an iterative process involving the Planning Group; the Staff Workgroup; Technical, Public Participation and Facilitation consultants; and the public.

Between the August 3, 2006 and August 31, 2006 SCTRWPG meetings, the Technical, Public Participation, and Facilitation consultants coordinated with the Staff Workgroup to define specific elements of the topics of study and assign a budget to each topic, resulting in a draft Scope of Work for final consideration by the SCTRWPG.

On August 31, 2006, the SCTRWPG approved the First Biennium Scope of Work at a public meeting. The scope includes nine (9) prioritized Planning Topics to be submitted for funded study through a grant application to the Texas Water Development Board.

The nine Planning Topics were screened down from a preliminary list of 30 potential ones on the basis of prospects for resolving problems remaining from the 2006 Regional Water Plan and meeting projected needs for additional water supply. Voting members of the SCTRWPG scored the potential topics as a way of prioritizing them.

Another six topics are of “significant interest,” though no scope of work or budget was developed. A final nine topics are addressed as routine “process and policy activities.”

The approved Scope of Work begins with the Administrative and Public Participation Activities Funding Base and follows with the Topics for Study and budget summary tables.

*13. Detailed description of why state funding assistance is needed. (Not to exceed 1 page.)*

The proposed planning is mandated by the state and is not included in the current appropriations for planning for this region. The work to be performed is not just for the San Antonio River Authority, but is region-wide.

*14. Identify potential sources and amounts of funding available for implementation of viable solutions resulting from proposed planning.*

Solutions resulting from proposed planning will be undertaken by the appropriate entity or purveyors of Region L for which the solution is intended. Funding will be provided by the parties benefiting most directly from the solutions through their own budgetary process and federal, state, or local grant and matching funds available.

**PLANNING INFORMATION**

**2011 SOUTH CENTRAL TEXAS REGIONAL WATER PLAN  
REGION L  
FIRST BIENNIUM PLANNING TOPICS  
SCOPE OF WORK**

**STATEMENT OF PURPOSE**

This First Biennium Scope of Work for the South Central Texas Regional Water Planning Group's 2011 Water Plan was developed to resolve the most divisive issues that delayed adoption of the previous water plan. The approach is to continuously build consensus through an 1) extensive public outreach process, 2) concerted internal effort, and 3) sound scientific study.

As one of the largest and most geographically diverse regional planning groups in the state, the SCTRWPG faces unique challenges. Planning Group members unanimously felt that comprehensive public participation and facilitation processes were vital in overcoming substantive obstacles encountered in the 2006 planning cycle. The Biennium Work Scope should provide greater opportunity for public input, accountability to stakeholders, and consensus within the Planning Group, according to Group Members.

To ensure timely completion of its 2011 plan the group has scoped the work to address the most urgent issues (topics) of the last planning cycle in a systematic fashion. These issues were outlined in Chairman Con Mim's February 3, 2006 letter attached hereto.

During three meetings in 2006, the SCTRWPG prioritized these topics through an iterative process involving the Planning Group; the Staff Workgroup; Technical, Public Participation and Facilitation consultants; and the public.

Between the August 3, 2006 and August 31, 2006 SCTRWPG meetings, the Technical, Public Participation, and Facilitation consultants coordinated with the Staff Workgroup to define specific elements of the topics of study and assign a budget to each topic, resulting in a draft Scope of Work for final consideration by the SCTRWPG.

On August 31, 2006, the SCTRWPG approved the First Biennium Scope of Work at a public meeting. The scope includes nine (9) prioritized Planning Topics to be submitted for funded study through a grant application to the Texas Water Development Board.

The nine Planning Topics were screened down from a preliminary list of 30 potential ones on the basis of prospects for resolving problems remaining from the 2006 Regional Water Plan and meeting projected needs for additional water supply. Voting members of the SCTRWPG scored the potential topics as a way of prioritizing them.

Another six topics are of "significant interest," though no scope of work or budget was developed. A final nine topics are addressed as routine "process and policy activities."

The approved Scope of Work begins with the Administrative and Public Participation Activities Funding Base and follows with the Topics for Study and budget summary tables.

Monitoring Study Progress

Study progress will be monitored by the San Antonio River Authority in consultation with the TWDB, SCTRWPG, and the South Central Texas Staff Workgroup on the bases of quality and timeliness of Deliverables, invoices, and monthly progress reports to be submitted by the Technical, Public Participation, and Facilitation consultants.

## **ADMINISTRATIVE AND PUBLIC PARTICIPATION ACTIVITIES FUNDING BASE**

The following Technical, Public Participation, and Facilitation services, including development of the Scope of Work, comprise the Administration and Public Participation Activities Funding Base for this Planning Grant Application. Funding requested from the TWDB for Administration and Public Participation Activities totals \$80,950 and is summarized by consultant and/or activity below.

### **Technical**

**\$0**

Included in Topics for Study.

### **Public Participation**

**\$43,600**

1. General Group Meetings. Provide planning, attendance and follow-up for the regularly scheduled meetings of SCTRWP. Tasks include preparing for and responding to the public participation process, including organizing and categorizing public comment in the electronic data base (\$33,000).
2. Website Improvements: In the process of developing the 2011 Regional Water Plan, an important and essential tool for the South Central Texas Regional Water Planning Group (SCTRWPG) is to maintain a useful, up to date, interactive website to accomplish its public participation goals. The SCTRWPG will use their website to specifically accomplish Public Participation by making all important information publicly available and maintaining useful and up to date content; and interaction with the Public by providing an online means of one and two-way communication between the Group and the public. The website will be updated and several features will be updated or newly implemented. The tasks include:
  - a) Ongoing Maintenance:
    - 1) Posting minutes of SCTRWPG meetings. Citizens that could not attend meetings would be able to read the minutes to ensure that all citizens have the opportunity to stay up to date on any meeting held by the Group, especially a meeting which affected his or her area.
    - 2) Posting region specific technical documents, such as study findings, in an easily accessible area of the website. By placing these documents online, all citizens could have access to important data.
    - 3) Maintaining an up to date calendar of events. This would give all citizens knowledge of the movements of the planning group. The public could stay up to date on workshops and meetings of interest and increase the public's participation in the entire process.
    - 4) Updating Group member biographies and contact information.
  - b) Changing the URL: The current URL, [www.watershedexperience.com](http://www.watershedexperience.com), is difficult to remember for the Group and for the public. By changing the URL to something more memorable the Group hopes to increase website traffic.
  - c) Streamlining website navigation: In order to make the website more user-friendly, to increase use by the public, and to prevent frustration, a web designer would update the navigation and style of the website. This would also include:
    - 1) Tracking Traffic. Knowing how many people visit the website, what areas are most popular and which documents are accessed the most will help the Group know which issues are most important to the public.

- 2) Developing a Style Guide. By making the site's graphics, layout, content and navigation consistent and by providing helpful information such as file size and dates, users will have a more productive visit to the website. This information would be documented so that all future additions to the website would follow the same guidelines.

(All base website tasks \$9,100)

3. General Communications Materials and Information. Logo/Letterhead - a consistent and memorable brand is necessary for the SCTRWPG to gain recognition throughout the region (\$1,500)

Deliverables:

1. General group meetings.

Public Participation Consultant would provide planning, attendance and follow-up for the regularly scheduled meetings of SCTRWP. Tasks include preparing for and responding to the public participation process, including organizing and categorizing public comment in the electronic data base.

2. Website Improvements:

The tasks include:

- a. Ongoing Maintenance:

1. Posting minutes of SCTRWPG meetings.
2. Posting region specific technical documents, such as study findings, in an easily accessible area of the website.
3. Maintaining an up to date calendar of events.
4. Updating Group member biographies and contact information.

- b. Changing the URL.

Streamlining website navigation.

Tracking Traffic.

Developing a Style Guide.

3. General Communications Materials and Information:

- a) Logo/Letterhead

**Facilitation**

**\$23,950**

1. Meet individually (in person or by telephone) with each member of the SCTRWPG to assess interests, positions, concerns, and information needs. (\$12,750)
  - a) Determine particular needs of new members and what members who have joined the since the first planning period wish they had had in terms of orientation.
  - b) Field questions and provide answers or resources as required in order to facilitate integration into the group and to strengthen group cohesion.
  - c) Analyze issues raised.
  - d) Develop process for addressing questions and concerns.
  - e) Meet with all members as soon as possible. Depending upon the need, follow-up sessions may be scheduled with some members during the biennium. (One hour per member + travel, assessment, and response: 30 @\$425).
2. Facilitate nine SCTRWPG quarterly meetings in San Antonio. (\$11,200) (see Topic 1 below for travel expenses associated with regionally held meetings)

Deliverables:

1. Summary report on the interviews conducted.
2. Agenda for each of the nine quarterly meetings, including outcomes, next steps and supporting reports or documentation as necessary.
3. Scope of work.

<b>Development of Scope of Work</b>		<b>\$14,050</b>
Technical Consultant	\$ 8,550	
Public Participation Consultant	\$ 3,750	
Facilitation Consultant	<u>\$ 1,750</u>	
Subtotal	\$13,400	

**TOPICS FOR STUDY**

The nine topics selected for study are listed in order of priority. Another six topics are of “significant interest,” though no scope of work or budget was developed. A final nine topics are considered “Process and Policy Activities,” presented as Topics numbered 16 through 24; no scope of work or budget was developed.

**2011 SOUTH CENTRAL TEXAS REGIONAL WATER PLAN  
REGION L  
FIRST BIENNIUM PLANNING TOPICS  
SCOPE OF WORK  
TOPIC 1: EXPANDED PUBLIC PARTICIPATION AND OUTREACH**

**STATEMENT OF PURPOSE**

This First Biennium Scope of Work for the South Central Texas Regional Water Planning Group's 2011 Water Plan was developed to resolve the most divisive issues that delayed adoption of the previous water plan. The approach is to continuously build consensus through an 1) extensive public outreach process, 2) concerted internal effort, and 3) sound scientific study.

As one of the largest and most geographically diverse regional planning groups in the state, the SCTRWPG faces unique challenges. Planning Group members unanimously felt that comprehensive public participation and facilitation processes were vital in overcoming substantive obstacles encountered in the 2006 planning cycle. The Biennium Work Scope should provide greater opportunity for public input, accountability to stakeholders, and consensus within the Planning Group, according to Group Members.

To ensure timely completion of its 2011 plan the group has scoped the work to address the most urgent issues (topics) of the last planning cycle in a systematic fashion. These issues were outlined in Chairman Con Mim's February 3, 2006 letter attached hereto.

During three meetings in 2006, the SCTRWPG prioritized these topics through an iterative process involving the Planning Group; the Staff Workgroup; Technical, Public Participation and Facilitation consultants; and the public.

Between the August 3, 2006 and August 31, 2006 SCTRWPG meetings, the Technical, Public Participation, and Facilitation consultants coordinated with the Staff Workgroup to define specific elements of the topics of study and assign a budget to each topic, resulting in a draft Scope of Work for final consideration by the SCTRWPG.

On August 31, 2006, the SCTRWPG approved the First Biennium Scope of Work at a public meeting. The scope includes nine (9) prioritized Planning Topics to be submitted for funded study through a grant application to the Texas Water Development Board.

The nine Planning Topics were screened down from a preliminary list of 30 potential ones on the basis of prospects for resolving problems remaining from the 2006 Regional Water Plan and meeting projected needs for additional water supply. Voting members of the SCTRWPG scored the potential topics as a way of prioritizing them.

Another six topics are of "significant interest," though no scope of work or budget was developed. A final nine topics are addressed as routine "process and policy activities."

The approved Scope of Work begins with the Administrative and Public Participation Activities Funding Base and follows with the Topics for Study and budget summary tables.

The nine topics selected for study are listed in order of priority. Another six topics are of "significant interest," though no scope of work or budget was developed. A final nine topics are considered "Process and Policy Activities," presented as Topics numbered 16 through 24; no scope of work or budget was developed.

**Topic 1: Expanded Public Participation and Outreach Programs  
(Regional Outreach Tour)**

**\$ 288,625**

Develop expanded public participation and outreach programs focusing upon resolution of outstanding issues from the 2006 Regional Water Plan and promote early consensus in development of the 2011 Regional Water Plan.

**Overview**

Members of the SCTRWPG found themselves unable to reach consensus on many points in the development of their 2006 Regional Water Plan. The inability to find common ground on these issues led to the regional plan being delivered late to the TWDB. Late delivery could have resulted in the state taking over planning for the region, rather than in the "bottom-up" planning approach envisioned by the authors of the Senate Bill 1 water planning process.

Six specific concerns and additional general concerns were enumerated by planning group chair Con Mims in his February 3, 2006 letter to the TWDB that accompanied the week-late Region L regional plan. As the new planning cycle begins, the SCTRWPG has devised a Regional Outreach Tour to help ensure that those enumerated concerns and any others that may arise will not result in another such impasse at the end of this new planning cycle.

The objective of this top-ranked topic is to plan and hold group meetings in eight cities around the region in a bid to promote consensus building early in the planning cycle and to put the planning group in a much better position to write a water plan sensitive to everybody in the region. The initiative calls for a 2-year, 8-city "road show" designed to let planning group members familiarize themselves with the people, places and water issues throughout the diverse and sprawling 20 1/2-county district for which they must develop an updated water plan for 2011.

The Regional Outreach Tour would also allow regional residents to become better acquainted with the planning group, its mission and procedures. It is envisioned that some visits on the Regional Outreach Tour could be completed in a single day, while others may require overnight accommodations. It is further envisioned the Tour could continue after the 2-year funding cycle ending in late 2008.

**Technical**

**\$108,805**

- a) Prepare and deliver technical presentations as necessary to support public participation and outreach programs at SCTRWPG meetings and/or workshops throughout the planning region. Presentations at each meeting site will focus upon water resources, projected needs, water management strategies (including conservation), and issues of particular local interest and regional relevance. See Public Participation item (e) for likely subjects of technical presentations at each meeting site (\$54,805).
- b) Technical consultant budget for this topic includes preparation for, active participation in, and follow-up to up to nine (9) meetings of the SCTRWPG and nine (9) meetings of the South Central Texas Staff Workgroup. Such standard Technical consultant activities for these 18 meetings are budgeted at \$3,000 per meeting for an estimated total of \$54,000 and do not include activities described in item (a) above.

If this topic (5) is not funded by the TWDB, a minimum of \$54,000 will need to be allocated to funded topics in order to provide for standard Technical consultant activities and support during scheduled quarterly meetings (\$54,000).

Deliverables :

Eight technical presentations to support expanded public participation and outreach programs.

Public Participation

\$129,820

- a) Arrange field trips in which planning group members view sites associated with the regional water plan, including such places as proposed water project venues; springs, rivers, lakes and other sources of water; high-growth areas that must be served by new water supplies; operating water-supply projects; habitat of endangered species; the J-17 monitoring well in San Antonio; tracer-dye test sites at Comal Springs; and other such venues.
- b) Arrange for planning group members or others familiar with viewed sites and relevant issues to act as tour guides and "technical briefing" leaders. Trips to sites would be made on charter buses or in 15-passenger vans.
- c) Arrange social gatherings, typically catered luncheons and dinners, at which planning group members can informally meet with residents and hear their concerns in an effort to "walk a mile in their shoes" while sharing with residents the need for a regional approach and give-and-take in the development of a water plan. Seek in-kind contributions for social events.
- d) Arrange public meetings of the planning group at which residents can officially register their public comments and observe as the SCTRWPG goes about its business of creating a regional water plan. Agenda items would include technical briefings or presentations by Technical Consultant in which the impact of the regional plan on the area being visited as well as unresolved issues of interest to the area would be outlined.
- e) The draft list of Regional Outreach Tour stops and topics is as follows (subject to change):
  - 1) 1st Qtr. 2007: Seadrift area (coastal), to discuss such topics as the LGWSP for GBRA Needs, bay inflows & related issues, area industrial needs, seawater desalination & brackish groundwater desalination.  
Suggested tour site: The Aransas National Wildlife Refuge to view the endangered whooping crane habitat.  
Suggested meeting sites: Falcon Point resort in Seadrift; the Dow Chemical plant or other coastal industrial facility.
  - 2) 2nd Qtr. 2007: Gonzales, to discuss such topics as Carrizo Aquifer withdrawals and the predominance of groundwater use in the regional plan.  
Suggested meeting site: Gonzales Knights of Columbus Hall.  
Suggested tour site: Carrizo Aquifer well fields.
  - 3) 3rd Qtr. 2007: Floresville in Wilson County, to discuss such topics as Wilson County groundwater use and the San Antonio Water System's ASR project.  
Suggested meeting site: The Wilson County Showbarn.  
Suggested tour site: SAWS' ASR project.

- 4) 4th Qtr. 2007: San Antonio, to discuss such topics as Bexar County area needs & plans; Edwards Aquifer pumping issues.  
Suggested meeting site: SAWS headquarters.  
Suggested tour sites: J-17 monitoring well.
- 5) 1st Qtr. 2008: San Marcos, to discuss such topics as Comal and San Marcos springs issues, population growth/new supply issues, Canyon Reservoir issues.  
Suggested meeting site: The Texas River Center.  
Suggested tour site: San Marcos Springs & River Center exhibits.
- 6) 2nd Qtr. 2008: Uvalde, to discuss such topics as water marketing-, Kinney County-, recharge dam-related issues.  
Suggested meeting site: Willie DeLeon center; junior college  
Suggested tour site: Frio River at Concan and US 90.
- 7) 3rd Qtr. 2008: Boerne in Kendall County, to discuss such topics as Trinity Aquifer issues & area growth/new supply.  
Suggested meeting site: Cibolo Creek Wildlife Natureplex; Community Center  
Suggested tour site: Honey Creek range management study area.
- 8) 4th Qtr. 2008: Victoria, to discuss such topics as the newly created technical evaluation of the LGWSP for GRBA needs; Coletto Creek power station issues.  
Suggested meeting site: Victoria Community Center.  
Suggested tour site: GBRA's Salt Water Barrier.

Regional Outreach Tour (work elements a through e):

Planning	\$17,600
Consultant travel and attendance	32,265
Rental fees (equipment, facilities)	8,200

- f) Follow up after meetings such as responding to public comment and databasing (\$8,600).
- g) Consultants will create materials that will explain the water planning process, the initially prepared plan, environmental initiatives the Group supports and other topics throughout the planning cycle. The goal is to educate the public on these various topics in an engaging way, so as to provoke the public's interest and potential desire to participate in planning process. Communications Materials will include:
  - 1) Introductory brochure - this is a comprehensive piece that explains the region, the process, and the schedule and provides information on how to participate in the process (\$6,200).
  - 2) FAQs - these Frequently Asked Questions will be prepared for all Group members and SCTRWPG staff to assist in answering difficult questions concerning the regional water plan. These FAQs will help provide accurate consistent answers to the public and media (\$2,900).
- h) News releases will be prepared to alert the media, the public and targeted stakeholders about each coming public meeting (\$17,600).
- i) Catering is not a state-reimbursable expense and so must be provided by donors cost-free or on a pay-per-plate basis.
- j) Consultants will attend SCTRWPG Staff Workgroup meetings prior to each quarterly Group meeting. These are held to coordinate and plan the quarterly Group meetings

with the Chair of the Group, selected members of the Group and other consultants (\$36,455).

Deliverables:

Resolution of Carrizo Aquifer Issues:

Part 1: Analytical tool development: Research and suggest the stakeholder groups to be included in the task forces; plan, stage and provide follow-up for the six workshops; handle the associated public participation process; create a fact sheet on the issue for the public; prepare news releases and e-mail alerts.

Part 2: Planning group discussions: - A Flash Points Report would be developed. A Public Comment Recap would be developed.

Facilitation

\$50,000

- a) Facilitation associated with the item is in addition to base activity, in that it is associated with and a part of the proposed new design for public participation/educational meeting formats (as described in Topic 1 Public Participation sections a-d) for the SCTRWPG. The regionally distributed meetings proposed would require additional time and travel on the part of the Facilitation Consultant, in addition to assistance with additional portions of the program/meeting design. (\$16,350) (\$6,500 travel) (\$1,500 expenses associated with travel)
- b) Consult with the Chair, Administrator, and Staff Workgroup regarding the objectives, content, and conduct of nine quarterly SCTRWPG meetings, including an orientation session (review of bylaws, consensus process, Group structure, and other mechanics, in addition to providing briefings on the Plan and the proposed activities for the next biennium). Review proposed agenda, make recommendations and receive guidance regarding elements requiring special facilitation, and prepare for the conduct of the meetings. All meetings of Staff Work Group held in San Antonio. (\$12,950)
- c) Investigate Supplementary Funding Options — Investigate and analyze mechanisms for increasing available funding from sources other than the TWDB. Report to the Group on options, benefits and downsides, best organizational structures for securing additional funding (e.g., through SARA as Administrator, form a separate 501(c)(3)), etc.). Focus on regional consensus-building activities, collaborative issues resolution, water stewardship, and natural resource protection. Determine whether there are operations within member organizations that might be of assistance. Make recommendations to the SCTRWPG and facilitate a discussion of funding options. (\$8,500)
  - 1) Investigate and prepare a report for presentation to the Group; facilitate discussion and decision-making process.
  - 2) Develop draft boilerplate proposal/letter of intent for funders.
  - 3) Identify potential grant sources.
  - 4) IRS/State submissions for tax-exempt status, if required.
- d) Increase Financial Participation in the Region — Approach, in association with the Chair, members of various interest groups both serving and being represented on the SCTRWPG. Explain the benefits received region-wide from the Group's efforts and urge them to make financial contributions to the conduct of the Group's business and the progress toward a sustainable regional water plan. (\$4,200)

- 1) Identify companies, organizations, and governmental entities and appropriate decision-makers.
- 2) Write letters and follow up by phone and/or in person.

Deliverables:

- a. Regional Outreach Meetings
  - Agenda for each of the nine quarterly meetings, including outcomes, next steps and supporting reports or documentation as necessary.
- b. Investigate Supplementary Funding Options
  - Presentations regarding various avenues for securing additional project funding.
  - Boilerplate proposals/letters of intent for potential funders
  - IRS/State submissions for tax-exempt status, if required
- c. Increase Financial Participation in the Region
  - Database of companies, organizations, and governmental entities and appropriate decision-makers.

**2011 SOUTH CENTRAL TEXAS REGIONAL WATER PLAN  
REGION L  
FIRST BIENNIUM PLANNING TOPICS  
SCOPE OF WORK  
TOPIC 2**

**STATEMENT OF PURPOSE**

This First Biennium Scope of Work for the South Central Texas Regional Water Planning Group's 2011 Water Plan was developed to resolve the most divisive issues that delayed adoption of the previous water plan. The approach is to continuously build consensus through an 1) extensive public outreach process, 2) concerted internal effort, and 3) sound scientific study.

As one of the largest and most geographically diverse regional planning groups in the state, the SCTRWPG faces unique challenges. Planning Group members unanimously felt that comprehensive public participation and facilitation processes were vital in overcoming substantive obstacles encountered in the 2006 planning cycle. The Biennium Work Scope should provide greater opportunity for public input, accountability to stakeholders, and consensus within the Planning Group, according to Group Members.

To ensure timely completion of its 2011 plan the group has scoped the work to address the most urgent issues (topics) of the last planning cycle in a systematic fashion. These issues were outlined in Chairman Con Mim's February 3, 2006 letter attached hereto.

During three meetings in 2006, the SCTRWPG prioritized these topics through an iterative process involving the Planning Group; the Staff Workgroup; Technical, Public Participation and Facilitation consultants; and the public.

Between the August 3, 2006 and August 31, 2006 SCTRWPG meetings, the Technical, Public Participation, and Facilitation consultants coordinated with the Staff Workgroup to define specific elements of the topics of study and assign a budget to each topic, resulting in a draft Scope of Work for final consideration by the SCTRWPG.

On August 31, 2006, the SCTRWPG approved the First Biennium Scope of Work at a public meeting. The scope includes nine (9) prioritized Planning Topics to be submitted for funded study through a grant application to the Texas Water Development Board.

The nine Planning Topics were screened down from a preliminary list of 30 potential ones on the basis of prospects for resolving problems remaining from the 2006 Regional Water Plan and meeting projected needs for additional water supply. Voting members of the SCTRWPG scored the potential topics as a way of prioritizing them.

Another six topics are of "significant interest," though no scope of work or budget was developed. A final nine topics are addressed as routine "process and policy activities."

The approved Scope of Work begins with the Administrative and Public Participation Activities Funding Base and follows with the Topics for Study and budget summary tables.

The nine topics selected for study are listed in order of priority. Another six topics are of "significant interest," though no scope of work or budget was developed. A final nine topics are considered "Process and Policy Activities," presented as Topics numbered 16 through 24; no scope of work or budget was developed.

## **Topic 2: Resolution of Carrizo Aquifer Issues**

**\$132,135**

Develop a process and analytical tools for evaluating the impacts of potential water projects or permitted pumpage that takes water from rural areas on the environmental, economic, and social well-being of the source areas and establish an impact threshold. Seek resolution of issues associated with Carrizo Aquifer exports.

### **Overview**

A high priority for the South Central Texas Regional Planning Group is finding consensus on the most contentious issue remaining from the 2006 planning cycle: The plan's proposed export of Carrizo Aquifer water from Gonzales and Wilson counties to the San Antonio area.

Planning group chair Con Mims, in his February 3, 2006 letter to the TWDB, described the points of contention. In summary, they are:

- The combined water management strategies in the regional plan that rely on Carrizo Aquifer water from Gonzales County exceed Gonzales County Groundwater District estimates of availability. Some planning group members are concerned that if the larger supply is produced the result would be mining of the aquifer and local damages.
- The proposed export of 11,000 acre-feet of groundwater per year from Wilson County received extensive public objection in which residents argued that the water is needed to meet local future growth, that well levels will fall and springs would go dry, and that the 11,000 acre-feet can easily be replaced by San Antonio from other sources.
- In December, 2005, the planning group voted 13-7 to remove the pumping from the plan, but the vote failed to get the needed two-thirds majority.

The planning group on Aug. 3, 2006, identified two "tasks" associated with the effort to find consensus on the Carrizo exports question. They are described as:

Task A) Seek resolution of issues associated with Carrizo Aquifer exports through review of previous public comment and a "Flashpoint Report" that recaps points of contention, identifies positions held by Group members, and suggests options for consensus.

Task B) Develop an analytical tool to identify and evaluate the impacts upon local areas of exports of large quantities of groundwater.

A task force would develop the tool, which is a model, by determining the elements to be included in it. Elements to be considered for inclusion in the analytical tool would be such things as potential hydrologic, environmental, social and economic impacts.

The matrix would be prepared by Technical Consultant. No new technical information would be developed.

The initial task force's draft list of potential impact elements will be circulated to the regional planning group and to the TWDB for comments.

The resulting analytical tool will predict a wide range of impacts of Carrizo groundwater exports on rural Gonzales and Wilson counties - and will help planning group members in their decision making regarding the Carrizo Aquifer conflicts already under discussion via the Task A process described above.

The tool is also envisioned as a test or pilot model that could become a standard implement for general use across all applicable aquifers if proven in testing on the Carrizo exports issue.

The objective of efforts described under this topic is to assist the planning group in coming to consensus regarding Carrizo Aquifer-related water management strategies to be included in the 2011 regional plan. Consensus could result, for example, in some or all Carrizo-related water management strategies being replaced by other water sources, in strategies being reduced or expanded in terms of groundwater amounts exported, or in strategies remaining as they are now planned.

Technical

\$62,985

- a) Prepare and deliver a technical presentation reviewing modeling and modeling results used in technical evaluation of Carrizo Aquifer water management strategies in the 2006 Regional Water Plan at up to three (3) workshops focused on development of a process and analytical tools for evaluation of groundwater exports from rural areas (\$22,470).
- b) Using results of the stakeholder participation process conducted by the Public Participation and Facilitation consultants (matrix elements), construct an analytical tool in electronic format for consideration of example transfers from the 2006 Regional Water Plan by the SCTRWPG (\$18,045).
- c) Using available Carrizo Aquifer model simulations from the 2006 Regional Water Plan, provide technical support to the Public Participation and Facilitation consultants in up to three (3) workshops involving initial applications of the analytical tool (\$22,470).

Deliverables:

Presentation reviewing models and modeling results used in technical evaluation of Carrizo Aquifer water management strategies. Analytical tool in electronic format for consideration of example transfers.

Public Participation

\$49,025

- a) The first track is aimed at "Task A," seeking resolution of issues associated with Carrizo Aquifer exports. It would take place as a parallel effort to "Task B" (development of an analytical tool) and would give the planning group an early start in working toward resolution of this issue. This track would be especially valuable if the planning group were to decide, for instance, to replace the Carrizo water with water supplied by another strategy. In which case, the damage assessment being undertaken via the analytical tool task could be unnecessary. Methods and procedures for "Task A" include:

- 1) Public Comment Recap. Compile and to provide to planning group members review materials showing public comment previously recorded on the Carrizo issue in order to acquaint them with that comment. The planning group, under Senate Bill 1, was created to prepare a "bottom up" water plan guided by public input. Reviewing previously gathered comment, it is believed, could help the planning group members in coming to an agreement on the issue. The planning group members could examine this "Public Comment Recap" in certain of its regularly scheduled meetings. New public comment on the issue would be added as it is collected (\$2,325).
  - 2) Flash Point Report. Develop a "Flash Point Report" to be used at certain regularly scheduled meetings to guide the planning group's consensus-finding discussions on Carrizo issues. The Flash Point Report would recap the points of contention, describe positions on the matter held by various Group Members, and, importantly, suggest and solicit options for consensus (\$1,200).
  - 3) Hold a "field trip" to allow the members of the planning group to view the areas of Gonzales and Wilson counties where Carrizo water-export facilities are now in place or would be built. The field trip would be part of a larger 8-stop regional outreach tour designed to build consensus on the new regional water plan (*See Topic 1, Public Participation, e2*).
- b) The second track is aimed at "Task B," the creation of the analytical tool. Methods and procedures for "Task B" include:
- 1) Formation of a planning group committee to identify "stakeholder groups" from which representatives will be chosen to sit on an initial "task force" of 25 to 30 people that will develop the analytical tool, a model or matrix. The Public Participation Consultant would recommend to the planning group committee a roster of stakeholder groups to be represented on the task force. The planning group committee would pick individual representatives from each stakeholder group. The Public Participation Consultant also would assist in creation of a second task force, made up of individuals different than those who will sit on the initial task force, will test the analytical tool by using it to examine specifically the impacts of Carrizo Aquifer exports on Gonzales and Wilson counties (\$1,200).
  - 2) Plan, hold and follow up on 6 workshops (perhaps two in San Antonio and two each in Gonzales and Wilson counties) of members of the two task forces. Opportunities for public comment will be provided at each task force meeting (\$31,400).
  - 3) News releases will be prepared to alert the media, the public and targeted stakeholders about each coming task force meeting (\$6,600).
  - 4) E-mail alerts will be prepared to alert targeted stakeholders about each coming workshop other relevant Group activities (\$4,000).
  - 5) An initial general fact sheet explaining the overall effort will be prepared for public consumption and task force use (\$2,300).

Facilitation

\$20,125

- a) The Facilitation Consultants will work closely with the Public Participation Consultants, using a two-or-three phase approach to developing an evaluative matrix tool for Water Management Strategy (WMS) evaluation: (\$7,450):
    - 1) Identify and select stakeholders (in association with the SCTRWPG) to participate in an initial task force to identify the components necessary to thoroughly evaluate one or more WMSs, including technical, societal, environmental, and economic impacts, both positive and negative. These elements are to be used to develop a matrix model to compare, evaluate, and guide selection of best alternatives.
    - 2) Develop a structured method (task-force model) for effective, meaningful, productive participative stakeholder involvement, with the objectives of:
      - i. Drawing out from the participants the various issues, investments, and concerns associated with the evaluation of WMSs in terms of stakeholder impacts, interests, and assessments, how these interact, and how they affect their decision-making process regarding the acceptability or desirability of WMSs.
      - ii. Ensuring that the elements of importance to stakeholders are represented in balance with technical and other components of WMS design and evaluation.
      - iii. Improving stakeholder understanding and support for the decisions and decision-making processes of the SCTRWPG.
    - 3) Through the task force(s):
      - i. Achieve consensus on the elements of an evaluative matrix.
      - ii. Determine the thresholds of importance and tolerance regarding identified elements to assist in preliminary development of the matrix and in designing weighting formulae for matrix evaluation in part II of this process.
  - b) In collaboration with the Technical Consultant and the Public Participation Consultant, identify stakeholders for a second task force, and convene and conduct one or more workshops to test and validate the functionality of the model, tools, and techniques developed from the experience of the initial task force. (\$6,300)
    - 1) Using the above, evaluate the suitability of the process, models, and tools for the purposes intended. The proposed first test case is to address the question of Carrizo Aquifer uses: what is the water supply potential of the Carrizo Aquifer and whether and how the region wishes to employ that resource in its long-term water plan. For example, elements to consider will include but not be limited to previously proposed Carrizo groundwater withdrawals, their potential impacts in various sectors of concern, their acceptability within the region, and their effectiveness at achieving desired outcomes, compared with an array of alternative scenarios.
    - 2) Based upon results, assist with refining the process, models, and tools, as well as the mechanisms for presentation to the public and design for use in evaluating other projects or arrays of alternatives.
  - c) Meet with SCTRWPG members to manage or avoid situations in which conflict may arise. (\$6,375)
- Deliverables:
- a. An evaluative matrix tool for Water Management Strategy (WMS) evaluation
  - b. Structured process for applying the tool

- c. List of stakeholders to participate in task force activities
- d. Two workshops to test and validate the functionality of the model, tools, and techniques with supporting documents

**2011 SOUTH CENTRAL TEXAS REGIONAL WATER PLAN  
REGION L  
FIRST BIENNIUM PLANNING TOPICS  
SCOPE OF WORK  
TOPIC 3**

**STATEMENT OF PURPOSE**

This First Biennium Scope of Work for the South Central Texas Regional Water Planning Group's 2011 Water Plan was developed to resolve the most divisive issues that delayed adoption of the previous water plan. The approach is to continuously build consensus through an 1) extensive public outreach process, 2) concerted internal effort, and 3) sound scientific study.

As one of the largest and most geographically diverse regional planning groups in the state, the SCTRWPG faces unique challenges. Planning Group members unanimously felt that comprehensive public participation and facilitation processes were vital in overcoming substantive obstacles encountered in the 2006 planning cycle. The Biennium Work Scope should provide greater opportunity for public input, accountability to stakeholders, and consensus within the Planning Group, according to Group Members.

To ensure timely completion of its 2011 plan the group has scoped the work to address the most urgent issues (topics) of the last planning cycle in a systematic fashion. These issues were outlined in Chairman Con Mim's February 3, 2006 letter attached hereto.

During three meetings in 2006, the SCTRWPG prioritized these topics through an iterative process involving the Planning Group; the Staff Workgroup; Technical, Public Participation and Facilitation consultants; and the public.

Between the August 3, 2006 and August 31, 2006 SCTRWPG meetings, the Technical, Public Participation, and Facilitation consultants coordinated with the Staff Workgroup to define specific elements of the topics of study and assign a budget to each topic, resulting in a draft Scope of Work for final consideration by the SCTRWPG.

On August 31, 2006, the SCTRWPG approved the First Biennium Scope of Work at a public meeting. The scope includes nine (9) prioritized Planning Topics to be submitted for funded study through a grant application to the Texas Water Development Board.

The nine Planning Topics were screened down from a preliminary list of 30 potential ones on the basis of prospects for resolving problems remaining from the 2006 Regional Water Plan and meeting projected needs for additional water supply. Voting members of the SCTRWPG scored the potential topics as a way of prioritizing them.

Another six topics are of "significant interest," though no scope of work or budget was developed. A final nine topics are addressed as routine "process and policy activities."

The approved Scope of Work begins with the Administrative and Public Participation Activities Funding Base and follows with the Topics for Study and budget summary tables.

The nine topics selected for study are listed in order of priority. Another six topics are of "significant interest," though no scope of work or budget was developed. A final nine topics are considered "Process and Policy Activities," presented as Topics numbered 16 through 24; no scope of work or budget was developed.

**Topic 3: Lower Guadalupe Water Supply Project (LGWSP) for GBRA Needs \$87,988**

Update the technical evaluation of the Lower Guadalupe Water Supply Project for GBRA Needs. Refine the design and operation of this water management strategy, to minimize adverse impacts on the environment and local economic conditions. Update cost and describe how it will be funded.

Technical

\$78,113

- a) Refine composition of potential water sources including: GBRA/UCC water rights, new surface water appropriations, groundwater from the Carrizo/Simsboro Aquifer, and/or water from Canyon Reservoir. Up to three (3) scenarios of source composition and facilities will be evaluated (\$11,440).
- b) Refine facility components and configurations including: pump station(s), off-channel storage, transmission pipeline alignment, and delivery point(s). Up to three (3) scenarios of source composition and facilities will be evaluated (\$8,964).
- c) Evaluate changes in instream flows and/or freshwater inflows to the Guadalupe Estuary (\$8,210).
- d) Update environmental issues assessment (\$13,477).
- e) Update project cost estimates and describe potential means of funding project implementation (\$11,652).
- f) Evaluate potential local economic impacts of the project in the source and terminus areas using data developed by the TWDB (\$10,295).
- g) Update documentation of technical evaluation of project (\$14,075).

Deliverables:

Documentation of technical evaluations of up to three configurations of the LGWSP for GBRA Needs.

Public Participation

\$0

Included in Administrative and Public Participation Activities Funding Base (Item P1).

Facilitation

\$9,875

- a) Monitor this newly redesigned project to discover residual concerns, problems, or side-effects and address them individually or in small groups with SCTRWPG members and, if appropriate, with stakeholders. Any negative regional impacts should be resolved as early as possible in the planning cycle. The Facilitation Consultant will work with the SCTRWPG to ensure that concerns expressed by individuals, as well as potential solutions, are brought to the group for resolution and action, as needed. (\$3,500)
- b) Meet with SCTRWPG members to manage or avoid situations in which conflict may arise. (\$6,375)

Deliverables:

- a. Tracking document containing concerns and presentations to group illustrating concerns and potential solutions

**2011 SOUTH CENTRAL TEXAS REGIONAL WATER PLAN  
REGION L  
FIRST BIENNIUM PLANNING TOPICS  
SCOPE OF WORK  
TOPIC 4**

**STATEMENT OF PURPOSE**

This First Biennium Scope of Work for the South Central Texas Regional Water Planning Group's 2011 Water Plan was developed to resolve the most divisive issues that delayed adoption of the previous water plan. **Topic 4: Brackish Groundwater Supply Evaluation**

**\$51,313**

Identify brackish groundwater sources and evaluate desalination as a water management strategy to meet projected needs.

Technical

*\$51,313*

- a) Identify proximate water user groups with needs and target areas for development of brackish groundwater supplies from the Edwards and Gulf Coast Aquifers (\$4,646).
- b) Research information regarding water quality, describe and evaluate potential treatment processes, and prepare cost estimates for up to three (3) projects for representative water user groups potentially including SAWS, Woodsboro, and Seadrift (\$23,998).
- c) Review and refine technical information regarding one brackish groundwater supply project from the Wilcox Aquifer being evaluated by SAWS under separate contract for consistency with TWDB guidelines for regional water planning (\$2,500).
- d) Prepare documentation of technical evaluations of up to four potential projects (\$20,169).

Deliverables:

Documentation of technical evaluations of up to four water management strategies using brackish groundwater supplies.

Public Participation

*\$0*

Included in Administrative and Public Participation Activities Funding Base (Item P1).

Facilitation

*\$0*

Included in Administrative and Public Participation Activities Funding Base (Item F2).

A final nine topics are considered "Process and Policy Activities," presented as Topics numbered 16 through 24; no scope of work or budget was developed.

**Topic 5: Groundwater and Surface Water Modeling Tools Refinement** **\$34,456**

Refine surface water and groundwater modeling tools. Consider results of surface water/groundwater interaction studies and apply tools developed in these studies in the planning process. *(Note: Potential refinements of the Guadalupe – San Antonio River Basin Water Availability Model (WAM) and/or various Edwards, Carrizo, Gulf Coast, and Trinity Aquifer models or Groundwater Availability Models (GAMs) could easily require funding allocations well in excess of \$2,000,000. In light of funding constraints, work elements associated with major modeling tool refinement have not been listed or budgeted herein. Work elements providing supplemental information relevant to ongoing model development and/or applications of existing models are summarized below.)*

Technical \$34,456

- a) Prepare and present comparisons of input recharge and results obtained (e.g., springflow, monitoring well levels, etc.) from current Edwards Aquifer models. Comparisons will be based on existing input files and available historical pumpage simulation results from up to four Edwards Aquifer models (\$18,134).
- b) Prepare and present comparisons of results obtained from ongoing HSPF modeling studies of surface water / groundwater interactions focusing upon the Carrizo and Gulf Coast Aquifers in the San Antonio River Basin with information presented in the 2006 Regional Water Plan (\$8,999).
- c) Prepare and present comprehensive mass balance summaries for simulated period of record operations of Coletto Creek Reservoir subject to the presently authorized consumptive use of water (12,500 acft/yr) (\$7,323).

Deliverables:

Three technical presentations focused upon Edwards Aquifer models, HSPF modeling studies of surface water / groundwater interactions, and Coletto Creek Reservoir operations.

Deliverables:

Regional Outreach Tour: Public Participation Consultants would provide planning, support and follow-up for:

- Eight field trips in which planning group members view sites associated with the regional water plan.
- Eight social gatherings, catered luncheons and dinners at which planning group members and residents can informally meet.
- Eight public meetings of the planning group to be held at locations across the region.

Deliverables include news releases, introductory brochure & FAQs.

Public Participation \$0

Included in Administrative and Public Participation Activities Funding Base (Item P1).

Facilitation \$0

**Topic 6: Enhanced Water Conservation, Drought Management,  
and Land Stewardship**

**\$191,179**

Review and refine conservation recommendations of the 2006 Regional Water Plan, including consideration of practices such as condensate collection, rainwater harvesting, and drought management as well as land stewardship.

**Overview**

The South Central Texas Regional Water Planning Group on Aug. 3, 2006, identified as one of its top priorities for funding in the new planning cycle this task: The development of an expanded public participation and education program focusing upon such topics as water conservation and land stewardship. The planning group feels widespread public knowledge and acceptance of water conservation and land stewardship practices will result in accelerated implementation of these practices and a reduced need for the development of costly new water supplies and will reduce projected water shortages, thereby delaying or eliminating the need for implementation of other water management strategies having greater associated environmental impacts. As a parallel effort, the planning group also seeks funding for an initiative aimed at reviewing and refining conservation recommendations including the consideration of practices such as drought management, rainwater harvesting, and condensate collection.

Because of the central role of conservation in achieving the water supply objectives of the South Central Texas Regional Plan, the SCTRWPG has adopted Water Conservation Implementation Task Force recommendations, but recognizes that the creation of conservation programs and the selection of specific conservation technologies is a matter of local choice. In order to facilitate understanding of the importance of conservation efforts and the wide range of methods available for use, as well as to encourage local implementation, the planning group hopes to publicize the benefits of conservation through its own to-be-developed program and via linkages to existing statewide public education programs, such as Water IQ, and by referencing recommended practices such as those outlined in the Water Conservation Best Management Practices Guide, TWDB Report 362. Municipal water conservation practices as well as irrigation and industrial conservation practices could be targeted.

The SCTRWPG encourages the use of rainwater harvesting in both commercial and residential new development. The SCTRWPG recommends the TWDB develop programs to educate the public and building industry on the benefits of the practice. The educational programs should include distribution of materials to the building industry to encourage use of these systems. Advocates say harvesting of rainwater would ease pressure on other water supplies. In several parts of the South Central Texas Regional Planning Area, rainwater harvesting systems have been constructed with success. Rainwater harvesting involves the capture and storage of rainwater from roofs of homes for both potable and non-potable purposes. A rainwater harvesting system collects water as it runs off roofs into gutters that convey it into a cistern or storage tank. This harvested rainwater can then be used for household potable use, landscape irrigation, or other uses. Collection of condensation from air conditioning systems has also been done with some success by the University of Texas at Austin and others. The collected water can be recycled for various uses, reducing the amount of other water supplies needed. The planning group is interested in determining whether conservation strategies and methods in the plan can be added to or refined. Viable and

beneficial new strategies and/or refinements could result in a reduced need for the development of costly new water supplies.

Advocates for land stewardship say the practice replenishes aquifers, reduces floods, keeps natural systems healthy and enhances water supplies. Advocates also argue that education on land management is necessary in order to overcome, in an increasingly urbanized state, the lack of understanding about how natural processes on the land influence water supplies. The SCTRWPG encourages state support of implementing or enhancing land stewardship management practices that are shown to augment the quality and quantity of the state's surface water and groundwater resources. Also, the SCTRWPG encourages the Legislature to increase funding to the Texas State Soil and Water Conservation Board for the purpose of increasing brush-control programs integrated with proven rangeland management practices. The interest in brush management as a means to increase water supply has its roots in the observation that Texas rangelands changed after settlement and use by Europeans from predominantly open grasslands to increasing domination of brush and the significantly greater interception of water by brush than grasses. The former suggests that the "natural" character of Texas rangelands would be grasslands. The latter suggests the possibility of increasing aquifer recharge and streamflow by controlling and limiting growth of brush and trees in areas where grasslands would have naturally dominated.

Drought management is not yet incorporated as a recommended water management strategy in the Regional Water Plan, but advocacy groups believe it would make sense to include water savings available through drought management (which restricts such practices as lawn watering, car washing and filling pools during droughts) in the regional water plan. Water user groups, specifically municipal water suppliers, are, already required to articulate drought contingency planning in documents filed with the Texas Commission on Environmental Quality (TCEQ). On the other hand, analyses of drought management as a water management strategy undertaken during the development of the 2006 Regional Water Plan resulted in unacceptably high projections of business, personal income, and tax revenue losses. The question remains whether water purveyors would implement drought management as a strategy. The SCTRWPG recommends that a more thorough analysis of drought management as a water management strategy be conducted.

Objectives of activities associated with this topic include trumpeting the benefits of water conservation and land management in order to produce a more widespread understanding of their principles and practices among the general public as well as a larger acceptance of and adherence to those principles and practices. The planning group feels such widespread public knowledge and acceptance will result in a reduced need for the development of costly new water supplies. Additionally, the strategies effectively reduce projected water shortages, thereby delaying or eliminating the need for implementation of other water management strategies having greater associated environmental impacts. Further technical evaluation of drought management as a water management strategy will provide additional quantitative information regarding potential water demand reductions and associated economic implications. *(Note: TWDB Regional Water Planning Rules and Guidelines direct that water management strategies be included in the Plan to meet the projected needs of the water user group for projected Drought of Record conditions; i.e. enough water supply available annually to meet the projected municipal water demand curve that is based upon per capita water use for drought of record conditions. The Drought Management Water Management Strategy would involve using "Drought Management"*

*measures to reduce the annual demand by some specified quantity during the Drought of Record. Such a reduction in demand during drought periods would, in effect, shift the projected municipal water demand curve downward, thereby delaying or reducing the quantities of new water supplies needed.)*

Technical

\$50,729

- a) Excerpt information from 2006 Regional Water Plan about the following water conservation practices of the 2006 Plan (\$4,629):
  - 1) Plumbing retrofit with low flow plumbing fixtures;
  - 2) Lawn watering water conservation;
  - 3) Water reuse;
  - 4) Rainwater harvesting;
  - 5) Condensate collection (technical and cost information outlined below); and
  - 6) Land stewardship (i.e., brush management).
- b) Prepare preliminary cost estimates to install air-conditioning systems with condensate collection facilities and plumbing to deliver the water for use either as landscape irrigation or for other uses, such as toilet flushing and sanitation (\$8,101).
- c) Quantify and evaluate Drought Management as a water management strategy for Region L (\$37,999).
  - 1) Excerpt information from 2006 Regional Water Plan regarding Drought Management and drought contingency planning.
  - 2) For a representative municipal water user group (city) in each county of Region L, obtain the Drought Contingency Plan from TCEQ and determine quantities of water expected to be “saved” as result of implementation of various stages of such plans. Obtain and plot municipal water use data for the past 10 years (or suitable alternative length of time) for comparison to projected drought of record water use, in order to quantify the difference between actual use during “Normal” conditions and during “Drought” conditions.
  - 3) From the results of the action listed immediately above, calculate the quantities of water needed resulting from drought conditions, shift the projected municipal water demand curve downward to eliminate the quantity of water “saved” by implementation of the Drought Management water management strategy, and adjust other water management strategies accordingly.
  - 4) Describe potential effects of Drought Management strategy upon water management strategies (quantities and time needed) for representative water user groups of the Region L plan.
  - 5) Calculate potential savings or “Benefits” associated with the Drought Management water management strategy.
  - 6) Calculate economic impacts of not having quantities of water “saved” via the Drought Management water management strategy.

Deliverables:

Presentation materials regarding referenced water management strategies in the 2006 Regional Water Plan, preliminary cost estimates for condensate collection facilities, and documentation of technical evaluation of Drought Management as a water management strategy.

Public Participation

\$133,450

- a) Hold a series of public workshops, as many as 10, in targeted cities around the region to trumpet the benefits of adopting water conservation and land management programs and to take public comment. Take public comment on the strategies under discussion. (\$59,300).
- b) Build relationships with agencies that have already operating public-education programs in order to procure generic, statewide-use materials for distribution in Region L (\$1,400).
- c) Design and publish Region L-specific brochures and fact sheets, as necessary, outlining the need and benefits of the practices in local areas (\$23,600).
- d) Develop news releases, including workshop notices and monthly how-to or educational pieces, such as best times to water a lawn or information on low-water use appliances (\$37,400).
- e) E-mail alerts will be prepared to alert targeted stakeholders about each coming workshop other relevant Group activities (\$6,150).
- f) Research and present to the planning group for its consideration "papers" on the various conservation strategies already in the regional plan as well as other strategies not now included (\$3,450).
- g) Procure speakers and experts, including technical consultants, water purveyors, environmental groups, users of rainwater harvesting and condensation collection systems and others interested in expressing views on the various topics, to make presentations to the planning group at regularly scheduled meetings (\$1,225).
- h) Presentations to 3 Planning Group meetings (\$925)

Deliverables:

Enhanced Water Conservation, Drought Management and Land Stewardship

Public Participation Consultants would provide planning, support and follow-up for:

In Part 1, a water conservation and land stewardship publicity campaign:

- Holding and taking public comment at a series of 10 public workshops around the region.
- Building relationships with agencies such as Water IQ that have already operating public-education programs.
- We would design and publish Region L-specific brochures and fact sheets.
- We would develop news releases and e-mail alerts, including workshop notices, as well as monthly how-to or educational pieces, such as best times to water a lawn or information on the availability of low-water use appliances.

In Part 2, a planning group REVIEW and REFINEMENT OF CONSERVATION STRATEGIES, we would:

- Research and present to the planning group "papers" on the various conservation strategies.
- Procure speakers to make presentations to the planning group.

Facilitation

\$7,000

- a) As many as four workshops will be held in association with this topic over the two-year period. The Facilitation Consultant will work with the Public Participation

Consultant to design and conduct the workshops, which will involve SCTRWPG members and/or stakeholders.

Deliverable:

- a. Four workshops and supporting documentation

Funding

San Antonio Water System	\$94,014.50
Texas Water Development Board	\$94,014.50

**2011 SOUTH CENTRAL TEXAS REGIONAL WATER PLAN  
REGION L  
FIRST BIENNIUM PLANNING TOPICS  
SCOPE OF WORK  
TOPIC 7**

**STATEMENT OF PURPOSE**

This First Biennium Scope of Work for the South Central Texas Regional Water Planning Group's 2011 Water Plan was developed to resolve the most divisive issues that delayed adoption of the previous water plan. The approach is to continuously build consensus through an 1) extensive public outreach process, 2) concerted internal effort, and 3) sound scientific study.

As one of the largest and most geographically diverse regional planning groups in the state, the SCTRWPG faces unique challenges. Planning Group members unanimously felt that comprehensive public participation and facilitation processes were vital in overcoming substantive obstacles encountered in the 2006 planning cycle. The Biennium Work Scope should provide greater opportunity for public input, accountability to stakeholders, and consensus within the Planning Group, according to Group Members.

To ensure timely completion of its 2011 plan the group has scoped the work to address the most urgent issues (topics) of the last planning cycle in a systematic fashion. These issues were outlined in Chairman Con Mim's February 3, 2006 letter attached hereto.

During three meetings in 2006, the SCTRWPG prioritized these topics through an iterative process involving the Planning Group; the Staff Workgroup; Technical, Public Participation and Facilitation consultants; and the public.

Between the August 3, 2006 and August 31, 2006 SCTRWPG meetings, the Technical, Public Participation, and Facilitation consultants coordinated with the Staff Workgroup to define specific elements of the topics of study and assign a budget to each topic, resulting in a draft Scope of Work for final consideration by the SCTRWPG.

On August 31, 2006, the SCTRWPG approved the First Biennium Scope of Work at a public meeting. The scope includes nine (9) prioritized Planning Topics to be submitted for funded study through a grant application to the Texas Water Development Board.

The nine Planning Topics were screened down from a preliminary list of 30 potential ones on the basis of prospects for resolving problems remaining from the 2006 Regional Water Plan and meeting projected needs for additional water supply. Voting members of the SCTRWPG scored the potential topics as a way of prioritizing them.

Another six topics are of "significant interest," though no scope of work or budget was developed. A final nine topics are addressed as routine "process and policy activities."

The approved Scope of Work begins with the Administrative and Public Participation Activities Funding Base and follows with the Topics for Study and budget summary tables.

The nine topics selected for study are listed in order of priority. Another six topics are of "significant interest," though no scope of work or budget was developed. A final nine topics are considered "Process and Policy Activities," presented as Topics numbered 16 through 24; no scope of work or budget was developed.

**Topic 7: Environmental Studies****\$156,579**

Continue environmental studies focused on bays & estuaries, instream flows, bottomland hardwoods, endangered species, and other relevant subjects of interest to the regional water planning group.

Technical

\$51,659

- a) Research and refine estimates of historical diversions and effluent discharges affecting flows in the lower Guadalupe River and freshwater inflows to the Guadalupe Estuary prior to 1977. Evaluate potential effects on fisheries harvest equations for selected species of interest (Blue Crabs, White Shrimp, Brown Shrimp, Eastern Oyster, Black Drum, Red Drum, and Spotted Seatrout). Provide results and technical documentation (\$25,728).
- b) Perform ecologically-based streamflow assessments (similar to those for the Guadalupe Estuary in the 2006 Regional Plan) for the Guadalupe River at Victoria and the San Antonio River at Falls City. Provide documentation of analyses and results (\$13,212).
- c) Develop and deliver presentation materials and GIS-based graphics to support SCTRWPG and education programs focused on regulatory processes, endangered species habitat ranges, and other factors potentially affecting implementation of planned strategies (\$7,747).
- d) Provide limited technical support to ongoing research by Texas A&M University by providing relevant freshwater inflow data from simulations including planned water management strategies and/or resulting from work element (a) of this topic (\$4,972).

Deliverables:

Documentation of historical diversions and effluent discharges, potential effects on fisheries harvest equations, and ecologically-based streamflow assessments. Presentation materials focused on regulatory processes, endangered species, and other factors affecting implementation of recommended water management strategies.

Texas A&M University Ecosystem Modeling

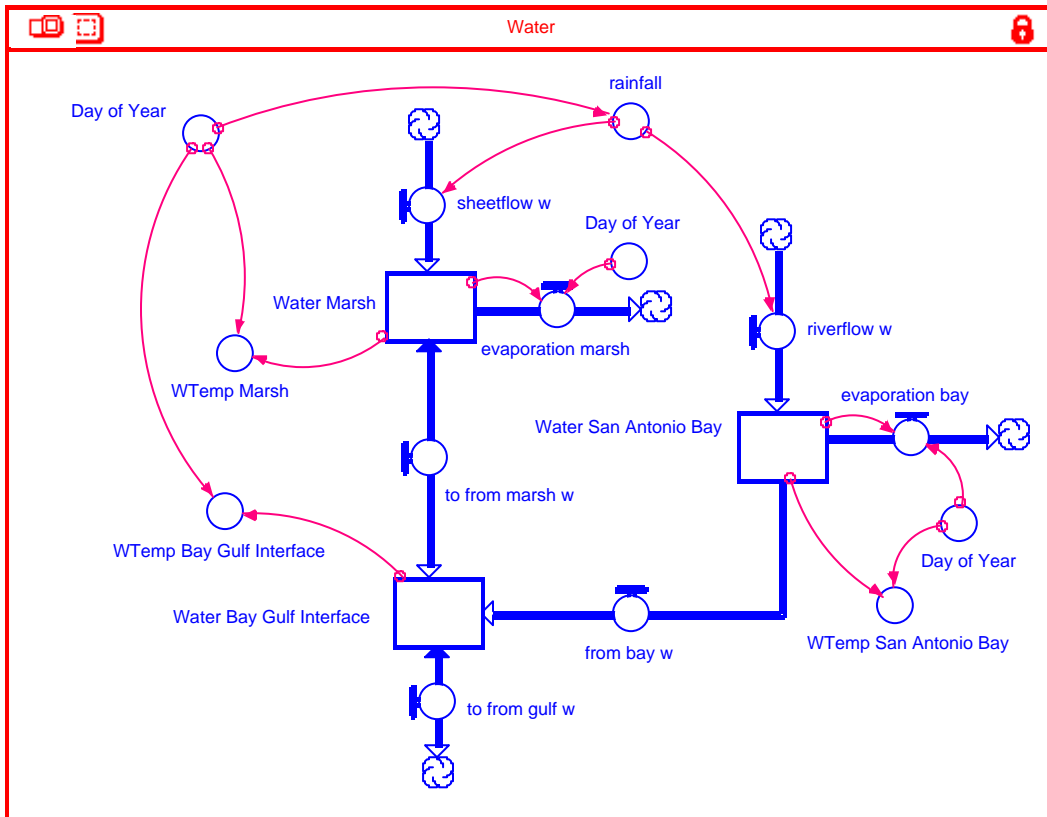

\$104,920

Since 2002, the San Antonio Water System, San Antonio River Authority and the Guadalupe-Blanco River Authority have sponsored a study by Texas A&M University linking freshwater inflows and marsh community dynamics in San Antonio Bay to whooping cranes. To-date, this research by Texas A&M University has been funded by SAWS, GBRA, and SARA collectively in the amount of \$1,228,000. Extensive field data and observations have been collected and are available for use in the development and calibration of an ecosystem model. Texas A&M University will provide ecosystem modeling services in the continued development of a simulation model linking freshwater inflows to marsh ecosystem dynamics in San Antonio Bay.

The goal of the model is to integrate project field data with information from the scientific literature to project possible ecosystem responses to variation in freshwater inflows. The Deliverables will be a model consisting of six submodels that link freshwater inflows and marsh community dynamics in San Antonio Bay to Whooping Crane populations (Figure 1). Submodels represent the dynamics of (a) water, (b) salt, (c) macrophytes, (d) blue crabs, and (e) Whooping Crane numbers and (f) body weight in

the salt marsh community and adjacent waters. The model will be developed as a stochastic compartment model based on difference equations using a one-day time step.

**Figure 1. Diagram of Conceptual Model Linking Freshwater Inflows and Marsh Community Dynamics in San Antonio Bay to Whooping Crane Populations**

- The water submodel will represent the entry of overland sheet flow into the marsh, the ebb and flow of water between the marsh and the near-shore waters of the Gulf, the entry of river water into San Antonio Bay, the mixing of San Antonio Bay water with the near-shore waters of the Gulf, and the evaporation of water from the marsh and bay (Figure 1). Freshwater inflows (sheet flow and river flow) will be represented as functions of rainfall, which will be calculated as a function of day of year (season). Water temperatures in the marsh, San Antonio Bay, and near-shore waters of the Gulf will be represented based on day of year and volume of water in the respective compartments. Evaporation from the marsh and bay will be represented as functions of day of year and the volume of water in the respective components.
- The structure of the salt submodel will parallel that of the water submodel but will represent the quantities of salt in solution in the marsh, San Antonio Bay, and near-shore waters of the Gulf, from which the respective salinities will be calculated.
- The macrophyte submodel will represent the net primary production, senescence, and decomposition of macrophytes in the marsh (Figure 1). Net primary production will be represented as a function of day of year, water level, and salinity, and senescence and decomposition will be represented as a function of day of year and water level.

- d) The blue crab submodel will represent the recruitment, mortality, and movement of blue crabs among areas of marsh, San Antonio Bay, and near-shore waters of the Gulf (Figure 1). Movement of adult female blue crabs offshore, and subsequent reproduction and recruitment will be represented as a function of day of year and abundance of reproductive females offshore. Movement of crabs between the marsh and the bay will be represented as a function of water temperature and salinity in the marsh, and similarly crabs in the marsh will burrow into the mud as a function of water temperature and salinity. Mortality of crabs in the marsh will be represented as a function of the biomass of macrophytes and litter, the number of Whooping Cranes in the marsh, and the abundance of other birds, fish, and fishermen (crabbers). Mortality of crabs in the bay will be represented as a function of abundance of other birds, fish, and fishermen; and offshore mortality will be represented as a function of fish abundance.
- e) The crane numbers submodel will represent the reproduction and mortality of Whooping Cranes on the northern breeding grounds, their migration to the marsh community, their movement between the marsh and inland areas, and their mortality in each of these areas (Figure 1). Crane natality will be represented as a function of a body weight index and day of year, and mortality will be represented as a function of a body weight index. Crane migration will be represented as a function of day of year, whereas crane movements between the marsh and the inland areas will be represented as a function of relative food availability in these two areas.
- f) The crane weight index submodel will represent the changes in a body weight index of Whooping Cranes (Figure 1). Weight index gain will be represented as a function of the availability of blue crabs and other marsh foods in the marsh and the availability of food in the upland area. Weight index loss will be represented as a function of energy expenditures, which will vary depending on the time spent searching for food items, which will depend on food availability.

Funding for Texas A&M Modeling:

<u>San Antonio River Authority</u>	<u>\$12,500</u>
<u>Guadalupe-Blanco River Authority</u>	<u>\$12,500</u>
<u>Texas Water Development Board</u>	<u>\$79,920</u>
<u>Total A&amp;M Funding</u>	<u>\$104,920</u>

Public Participation

\$0

Included in Administrative and Public Participation Activities Funding Base (Item P1).

Deliverables:

Environmental Evaluations of Water Management Strategies

Public Participation Consultant would:

- Plan and state an environmental workshop at which a planning group subcommittee or task force would take public comment.
- Develop workshop handouts containing excerpted information from environmental evaluations in each current water management strategy.
- News releases will be prepared to alert the media, the public and targeted stakeholders about task force meeting.

Facilitation

\$0

Included in Administrative and Public Participation Activities Funding Base (Item F2).

Topic 7 Funding Request Summary:

TAMU Ecosystem Modeling Cost	\$104,920
Minus SARA Match	-\$12,500
Minus GBRA Match	<u>-\$12,500</u>
Total Request for Modeling	\$79,920
Request for Technical tasks	<u>\$51,659</u>
Total Request for Topic 7	\$131,579

**2011 SOUTH CENTRAL TEXAS REGIONAL WATER PLAN  
REGION L  
FIRST BIENNIUM PLANNING TOPICS  
SCOPE OF WORK  
TOPIC 8**

**STATEMENT OF PURPOSE**

This First Biennium Scope of Work for the South Central Texas Regional Water Planning Group's 2011 Water Plan was developed to resolve the most divisive issues that delayed adoption of the previous water plan. The approach is to continuously build consensus through an 1) extensive public outreach process, 2) concerted internal effort, and 3) sound scientific study.

As one of the largest and most geographically diverse regional planning groups in the state, the SCTRWPG faces unique challenges. Planning Group members unanimously felt that comprehensive public participation and facilitation processes were vital in overcoming substantive obstacles encountered in the 2006 planning cycle. The Biennium Work Scope should provide greater opportunity for public input, accountability to stakeholders, and consensus within the Planning Group, according to Group Members.

To ensure timely completion of its 2011 plan the group has scoped the work to address the most urgent issues (topics) of the last planning cycle in a systematic fashion. These issues were outlined in Chairman Con Mim's February 3, 2006 letter attached hereto.

During three meetings in 2006, the SCTRWPG prioritized these topics through an iterative process involving the Planning Group; the Staff Workgroup; Technical, Public Participation and Facilitation consultants; and the public.

Between the August 3, 2006 and August 31, 2006 SCTRWPG meetings, the Technical, Public Participation, and Facilitation consultants coordinated with the Staff Workgroup to define specific elements of the topics of study and assign a budget to each topic, resulting in a draft Scope of Work for final consideration by the SCTRWPG.

On August 31, 2006, the SCTRWPG approved the First Biennium Scope of Work at a public meeting. The scope includes nine (9) prioritized Planning Topics to be submitted for funded study through a grant application to the Texas Water Development Board.

The nine Planning Topics were screened down from a preliminary list of 30 potential ones on the basis of prospects for resolving problems remaining from the 2006 Regional Water Plan and meeting projected needs for additional water supply. Voting members of the SCTRWPG scored the potential topics as a way of prioritizing them.

Another six topics are of "significant interest," though no scope of work or budget was developed. A final nine topics are addressed as routine "process and policy activities."

The approved Scope of Work begins with the Administrative and Public Participation Activities Funding Base and follows with the Topics for Study and budget summary tables.

The nine topics selected for study are listed in order of priority. Another six topics are of "significant interest," though no scope of work or budget was developed. A final nine topics are considered "Process and Policy Activities," presented as Topics numbered 16 through 24; no scope of work or budget was developed.

**Topic 8: Environmental Evaluations of Water Management Strategies** **\$50,462**

Improve or expand environmental evaluations of water management strategies. Provide greater focus on endangered species issues and on ensuring consistency with resource agencies.

**Overview**

The SCTRWPG has been singled out for praise by state officials for providing in-depth evaluations of the potential environmental impacts associated with the various water management strategies in its regional plan. Among the region's accomplishments in that area:

- The longest, at 72 pages, of any Chapter 7 (Consistency with Long-Term Projections of the State's Water, Agricultural and Natural Resources) produced in the regional plans of the state's 16 planning regions.
- The only plan to include ecologically-based assessment of estuarine inflow changes.
- The only plan to include environmental comparisons to past state water plans.
- One of only two regional plans to include an overall quantitative environmental assessment of the regional plan.
- Other analyses in the Region L plan include a tabulation of endangered and threatened species as well as stream flow and freshwater inflow comparisons.

But while the region's environmental efforts have been strong, some planning group members believe the current environmental assessments could be even better. As a result, the planning group is interested in doing more to ensure that environmental impacts are minimized, that environmental concerns are fully evaluated, and that environmental assessments are customized for each water management strategy. On August 3, 2006, the planning group voted to seek state funding for an initiative to improve or expand environmental evaluations of water management strategies. The group deemed this initiative one of its top priorities for state funding.

**Technical**

**\$33,027**

- a) Prepare and deliver technical presentations and provide technical support through participation in two (2) SCTRWPG subcommittee or task force workshops regarding environmental evaluations in the 2006 Regional Water Plan, comparison of these evaluations to those performed by other planning regions, and solicitation of comments regarding potential improvements to be considered for integration into environmental evaluations for the 2011 Regional Water Plan (\$17,762).
- b) Document potential refinements to methodologies for environmental evaluations and budgetary implications of such refinements in accordance with results of the two subcommittee workshops and prepare and deliver a presentation to the SCTRWPG (\$9,868).
- c) Document proposed refinements to environmental evaluations in accordance with SCTRWPG recommendations (\$5,397).

**Deliverables:**

Technical presentation of environmental evaluations in the 2006 Regional Water Plan and documentation of potential refinements of environmental evaluations.

**Public Participation**

**\$13,410**

- a) Hold one environmental workshop at which a planning group subcommittee or task force of 10 to 15 would take public comment concerning suggested issues or points to be added to current environmental evaluations. The subcommittee would also consider the best new format and elements to use for the revamped environmental evaluations to be included with water management strategy descriptions. The subcommittee would later present its recommendations for improving environmental assessments to the entire planning group (\$6,910).
- b) Public Participation consultants would develop workshop handouts containing excerpted information from environmental evaluations in each current water management strategy (\$2,100).
- c) News releases will be prepared to alert the media, the public and targeted stakeholders about each coming task force meeting (\$4,400).

Facilitation

\$4,025

- a) Review the comments received on the 2006 plan on this topic. (\$525)
- b) Convene a workshop with the principal commentators on the 2006 plan and the Technical Consultant to clarify concerns and identify perceived shortcomings in the environmental evaluations performed to date by the SCTRWPG. Compile the responses. (\$1,225)
- c) In association with the SCTRWPG, identify and work with member delegates and the Technical Consultant at a second small-group workshop to discuss the needs, gaps, and proposed solutions and report back to the full SCTRWPG. (\$1,225)
- d) Facilitate SCTRWPG discussions seeking consensus as to appropriate environmental evaluations for regional water supply planning in accordance with TWDB rules. (\$1,050)

**2011 SOUTH CENTRAL TEXAS REGIONAL WATER PLAN  
REGION L  
FIRST BIENNIUM PLANNING TOPICS  
SCOPE OF WORK  
TOPIC 9**

**STATEMENT OF PURPOSE**

This First Biennium Scope of Work for the South Central Texas Regional Water Planning Group's 2011 Water Plan was developed to resolve the most divisive issues that delayed adoption of the previous water plan. The approach is to continuously build consensus through an 1) extensive public outreach process, 2) concerted internal effort, and 3) sound scientific study.

As one of the largest and most geographically diverse regional planning groups in the state, the SCTRWPG faces unique challenges. Planning Group members unanimously felt that comprehensive public participation and facilitation processes were vital in overcoming substantive obstacles encountered in the 2006 planning cycle. A final nine topics are considered "Process and Policy Activities," presented as Topics numbered 16 through 24; no scope of work or budget was developed.

**Topic 9: Monitoring of Population Trends**

**\$23,637**

Monitor population trends based on local/county data relative to projections provided by the TWDB and consider growth management concepts.

Technical

\$23,637

- a) Refer to Texas State Data Center interim estimates (\$8,848).
- b) Collect utility connection data from representative cities of the Region, compare to TWDB population projections used in 2006 Regional Water Plan, and prepare and deliver a presentation to the SCTRWPG (\$14,789).

Deliverables:

Technical presentation of utility connection and population projection comparisons for representative cities.

Public Participation

\$0

Included in Administrative and Public Participation Activities Funding Base (Item P1).

Facilitation

\$0

Included in Administrative and Public Participation Activities Funding Base (Item F2).

**2011 SOUTH CENTRAL TEXAS REGIONAL WATER PLAN  
REGION L  
FIRST BIENNIUM PLANNING TOPICS  
SCOPE OF WORK  
TOPICS OF SIGNIFICANT INTEREST**

**STATEMENT OF PURPOSE**

This First Biennium Scope of Work for the South Central Texas Regional Water Planning Group's 2011 Water Plan was developed to resolve the most divisive issues that delayed adoption of the previous water plan. The approach is to continuously build consensus through an 1) extensive public outreach process, 2) concerted internal effort, and 3) sound scientific study.

## PROCESS AND POLICY ACTIVITIES

During the process to identify topics for study, a number of important process and policy activities that need to be carried out by the SCTRWPG were identified. These are listed below,

together with budgets needed for Technical, Public Participation, and Facilitation consultant support to allow the SCTRWPG to accomplish these activities.

- 16. Timely Integration from Public Participation** **\$0**  
Improve timely integration of summary information from the public participation process into development of the regional water plan.  
*Technical*  
*Public Participation*  
*Facilitation*
- 17. Timely Comment Consideration** **\$0**  
Consider comments received from public entities and resource agencies early in the planning process.  
*Technical*  
*Public Participation*  
*Facilitation*
- 18. LCRA-SAWS Water Project** **\$0**  
Monitor progress of the LCRA-SAWS Water Project.  
*Technical*  
*Public Participation*  
*Facilitation*
- 19. Future Desired Conditions (HB1763)** **\$0**  
Follow HB1763 process for future desired conditions in assessment of available groundwater supply for planning purposes.  
*Technical*  
*Public Participation*  
*Facilitation*
- 20. Water Demand Projection Methodology** **\$0**  
Encourage the TWDB to review and refine water demand projection methodologies.  
*Technical*  
*Public Participation*  
*Facilitation*
- 21. Brush Management/Land Stewardship** **\$0**  
Support studies of brush management and land stewardship as water management strategies and make recommendations.  
*Technical*  
*Public Participation*  
*Facilitation*
- 22. Weather Modification** **\$0**  
Evaluate and support funding for weather modification programs.  
*Technical*

Public Participation  
Facilitation

- 23. Ecologically Unique Stream Segments** **\$0**  
Consider recommendations for designation of ecologically unique stream segments.  
Technical  
Public Participation  
Facilitation
- 24. Projects in Expansion** **\$0**  
Define process and procedures for appropriately addressing projects in expansion.  
Technical  
Public Participation  
Facilitation
- 25. Timely Regional Water Plan Evaluation** **\$0**  
Evaluate regional water plan as a whole early in the process.  
Technical  
Public Participation  
Facilitation
- 26. Recharge and Recirculation** **\$0**  
Perform more detailed technical evaluations of aquifer recharge & recirculation concepts.  
Technical  
Public Participation  
Facilitation
- 27. Drought Contingency Plans/Conservation Initiatives** **\$0**  
Develop contingency plans for the current drought and/or a new drought of record integrating conservation initiatives.  
Technical  
Public Participation  
Facilitation

**FROM:** South Central Texas Regional Water Planning Group (SCTRWPG)

**DATE:** July 2, 2006

**SUBJECT:** Notice of Public Meeting to Receive Input on Scope of Work for the Third Cycle of Regional Water Planning; and, Application for Water Planning Grant

## **NOTICE OF PUBLIC MEETING** **REGIONAL WATER PLANNING**

The South Central Texas Regional Water Planning Group (**Region L**) will receive suggestions and recommendations from the public on the issues that should be addressed or provisions that should be included in the scope of work for the amended regional water plan during the third cycle of regional water planning at a public meeting. Notice is also given that the San Antonio River Authority (SARA) will submit a grant application for financial assistance to the Texas Water Development Board (TWDB) to carry out the scope of work to be submitted on or before September 14, 2006. Region L consists of a 20 1/2 -County planning area, which includes Uvalde, Zavala, Dimmit, Frio, La Salle, Medina, Atascosa, Bexar, Wilson, Karnes, Goliad, Refugio, Calhoun, Victoria, DeWitt, Gonzales, Guadalupe, Caldwell, Comal, Kendall and the southern half of Hays Counties.

**The public meeting** will be held in conjunction with the Region L Planning Group meeting at the San Antonio River Authority Central Office, 100 E. Guenther Street, San Antonio, Texas, on Thursday, August 3, 2006 at 10:00 a.m. Written and oral comments (not to exceed five (5) minutes per speaker) will be accepted at this meeting.

**Copies of the grant application** may be obtained from the SARA when it becomes available. Written comments on the grant application must be filed by September 29, 2006, with both the applicant (SARA) and the TWDB as follows:

Steven J. Raabe P.E.  
Administrative Agent for Region L  
San Antonio River Authority  
P.O. Box 839980  
San Antonio, Texas 78283-9980

J. Kevin Ward  
Executive Administrator  
Texas Water Development Board  
P.O. Box 13231  
Austin, Texas 78711-3231

**For additional information**, please contact: Robert "Bob" Perez, San Antonio River Authority, c/o Region L, P.O. Box 839980, San Antonio, Texas 78283-9980 or Phone (210) 302-3279/email: [rperez@sara-tx.org](mailto:rperez@sara-tx.org).

**LEGALS 650**

I, Milton Wingenroth, will not be responsible for any debts incurred by anyone other than my own.

**NOTICE OF PUBLIC MEETING REGIONAL WATER PLANNING**

The South Central Texas Regional Water Planning Group (Region L) will receive suggestions and recommendations from the public on the issues that should be addressed or provisions that should be included in the scope of work for the amended regional water plan during the third cycle of regional water planning at a public meeting. Notice is also given that the San Antonio River Authority (SARA) will submit a grant application for financial assistance to the Texas Water Development Board (TWDB) to carry out the scope of work to be submitted on or before September 14, 2006. Region L consists of a 20 1/2 - County planning area, which includes Uvalde, Zavala, Dimmit, Frio, La Salle, Medina, Atascosa, Bexar, Wilson, Karnes, Goliad, Refugio, Calhoun, Victoria, DeWitt, Gonzales, Guadalupe, Caldwell, Comal, Kendall and the southern half of Hays Counties.

**THE PUBLIC MEETING** will be held in conjunction with the Region L Planning Group meeting at the San Antonio River Authority Central Office, 100 E. Guenther Street, San Antonio, Texas, on Thursday, August 3, 2006 at 10:00 a.m. Written and oral comments (not to exceed five (5) minutes per speaker) will be accepted at this meeting.

**COPIES OF THE GRANT APPLICATION** may be obtained from the SARA when it becomes available. Written comments on the grant application must be filed by September 29, 2006, with both the applicant (SARA) and the TWDB as follows:

Steven J. Raabe P.E. Administrative Agent for Region L San Antonio River Authority P.O. Box 839980 San Antonio, Texas 78283-9980

J. Kevin Ward Executive Administrator Texas Water Development Board P.O. Box 13231 Austin, Texas 78711-3231

For additional information, please contact: Robert "Bob" Perez, San Antonio River Authority, c/o Region L, P.O. Box 839980, San Antonio, Texas 78283-9980 or Phone (210) 302-3279; email: rperez@sara-tx.org.

**NOTICE OF SALE OF**

**LEGALS 650**

Way Agent at (210) 615-6239 or Jerry W. Reavis, SR/WA, District Right of Way Administrator at (210) 615-6234.

**NOTICE**

The Housing Authority of Bexar County wishes to announce the temporary suspension of placement of families on the waiting list for the Public Housing Program effective August 1, 2006 due to a waiting period of more than two years.

**LAURA D. MORALES**  
EXECUTIVE DIRECTOR

Attn: Mr. Matt Nelson

Dear Mr. Ward:

The San Antonio River Authority hereby gives written assurance on behalf of the South Central Texas Regional Water Planning Group, that the proposed planning does not duplicate existing projects; and implementation of viable solutions identified through the proposed planning will be diligently pursued; and potential sources of funding have been identified for implementation of viable solutions.

If you have any questions please contact Steve Raabe or Robert Perez at (210)-227-1373.

**RE: 2011 SOUTH CENTRAL TEXAS REGIONAL WATER PLAN FIRST BIENNIUM  
PLANNING TOPICS**

Dear Mr. Raabe,

This letter reflects changes proposed by HDR on September 8, 2006. This letter is to confirm and convey the intent of the San Antonio Water System (SAWS), subject to formal approval by our Board of Trustees, to provide additional financial support to the South Central Texas Regional Water Planning Group (hereinafter "Region L"), in support of research, public outreach, and facilitation activities associated with brackish groundwater desalination, conservation, and land stewardship.

At the August 31<sup>st</sup> Region L meeting, members reached consensus on a set of topics that will be presented to the Texas Water Development Board (hereinafter "TWDB"), in response to its request for planning group grant applications. In an effort to promote sound scientific evaluation and to encourage public participation in the planning process, SAWS staff conveyed its interest, pending approval by our Board of Trustees, in providing 50% of the funds required to undertake research on two topics: (i) the Brackish Groundwater Supply and (ii) Enhanced Water Conservation, Drought Management, and Land Stewardship. As related at the meeting, our support is contingent upon the brackish groundwater supply evaluation being expanded to include an assessment of both the Wilcox and Edwards Aquifers.

The total estimated cost of these two studies is \$239,342.00. As such, the total value of SAWS cash contribution is \$119,671.00. I believe that these local matching funds, which are in addition to the annual financial support that SAWS provides to assist with the basic administrative costs of Region L, will encourage TWDB to reflect favorably on our collaborative efforts to provide sufficient, reliable water supplies for the region over the next 50 years. Please do not hesitate to call me at (210) 233-3862 if you have any questions.

Sincerely,

  
Janelle Okorie  
Vice President

September 6, 2006

Bill Mullican  
Director  
Texas Water Development Board  
P.O. Box 13231  
Austin, TX 78711-3231

Re: South Central Texas Regional Water Plan  
Scope of Work

Dear Mr. Mullican:

Regarding the proposed simulation modeling project by Texas A&M University, which will link fresh water inflow to marsh ecosystem dynamics, GBRA is highly supportive of this effort. If the project is approved by the TWDB, GBRA will contribute \$12,500 in matching funds.

GBRA strongly believes such a project will be extremely beneficial to future water planning and should be approved.

Sincerely,

William E. West, Jr.  
General Manager

Attn: Matt Nelson

**RE: 2011 SOUTH CENTRAL TEXAS REGIONAL WATER PLAN FIRST BIENNIUM  
PLANNING TOPICS**

Dear Mr. Ward

This letter is to confirm and convey the intent of the San Antonio River Authority (SARA), subject to formal approval by our Board of Directors, to provide additional financial support to the South Central Texas Regional Water Planning Group (hereinafter "Region L"), in support of research, public outreach, and facilitation activities associated with *"Continue environmental studies focused on bays & estuaries, instream flows, bottomland hardwoods, endangered species, and other relevant subjects of interest to the regional water planning group"*.

At the August 31<sup>st</sup> Region L meeting, members reached consensus on a set of topics that will be presented to the Texas Water Development Board (TWDB), in response to its request for planning group grant applications. In an effort to promote sound scientific evaluation and to encourage public participation in the planning process, SARA conveyed its interest, pending approval by it's Board of Directors, in amount of \$12,500.

The total estimated cost of the study is \$104,920.00. SARA believes that these local matching funds, which are in addition to the annual financial support that SARA provides to assist with the basic administrative costs of Region L, will encourage TWDB to reflect favorably on our collaborative efforts sufficient, reliable water supplies for the region over the next 50 years. Please do not hesitate to call me at (210) 302-3600 or Steve Raabe at (210) 302-3614 if you have any questions.

Sincerely,

**2011 SOUTH CENTRAL TEXAS REGIONAL WATER PLAN  
REGION L  
FIRST BIENNIUM PLANNING TOPICS**

**APPENDICES**

STEVEN J. RAABE, P.E.  
Director of Planning and Development  
San Antonio River Authority

#### EDUCATION

M.E., Agricultural Engineering, Texas A&M University, 1980  
B.S., Agricultural Engineering, Texas A&M University, 1979

#### REGISTRATION

Professional Engineer - State of Texas #56917

#### EXPERIENCE

##### Water Resources

Mr. Raabe served on the Management Team for the Lower Guadalupe Water Supply Project (LGWSP). The LGWSP was a key component of the SB 1 South Central Texas 2001 Regional Water plan that would develop a supply of at least 94,500 acre-feet per year of water supply by conjunctively utilizing surface water from the Guadalupe River downstream of its confluence with the San Antonio River and groundwater from the Gulf Coast Aquifer. Mr. Raabe represented the San Antonio River Authority's interests in project decisions as a co-owner of the supply from the project with the San Antonio Water System.

Mr Raabe is serving as program manager for the South Central Texas Regional Water Planning Group (SCTRWPG) whose membership represents eleven stakeholder or interest areas. The SCTRWPG is charged by the Texas Legislature to develop a fifty year regional water plan to supply the long term water needs of the region.

Mr. Raabe is responsible for project management, coordination of technical, facilitation and public participation consultants and staff support for the SCTRWPG. He is also responsible for coordination between the twenty-four members of the STCRWPG and local, regional and state entities.

Mr. Raabe is the project manager for the Regional Water Resources Development Group (RWRDG) which consists of thirteen cities, water utilities and special utility districts that have formed a cooperative purchasing program to acquire Edwards Aquifer groundwater withdrawal rights. Mr. Raabe provides staff support to the RWRDG Management Council. He is also responsible for preparing allocations of the acquired groundwater withdrawal rights and processing the acquisitions through the Edwards Aquifer Authority.

Mr. Raabe was project manager for the Trans Texas Water Program, West Central Study Area. The study was a comprehensive water resources planning process focused on evaluating the full range of both near and long term water management strategies for the 33 county region supplied by the City of San Antonio and the Edwards Aquifer, as well as areas downstream of the Edwards. Mr. Raabe was responsible for project management, public participation, and coordination between consultants, state agencies and the local sponsoring agencies. The sponsoring agencies are the San Antonio River Authority, Nueces River Authority, Guadalupe-Blanco River Authority, Lower Colorado River Authority, Bexar Metropolitan Water District, Edwards Underground Water District and the San Antonio Water System.

Mr. Raabe was project manager for the North Bexar County Water Resources Study conducted for the Edwards Underground Water District. The project involves a water well inventory, water level readings in 100 wells, pump test and water quality sampling. This information will be used to determine the existing availability of ground water in the Upper, Middle and Lower Trinity aquifers. Additional water supply from surface water sources will be investigated also.

He was responsible for preparing an inventory of all water rights and water contracts held by TU Electric as part of a statewide power plant siting study for TU Electric.

Mr. Raabe assisted in a dam safety inspection of the Upper Guadalupe River Authority Ponding Lake on the Guadalupe River which included flushing the dam underdrain system as part of the dam's ten year inspection.

Mr. Raabe developed an infrastructure plan and cost estimates for a water reuse plan for Kerr County as part of the Kerr County Water Resources Study for the Upper Guadalupe River Authority.

Mr. Raabe performed a feasibility study for siting a surface water reservoir for the Johnson County Water Resources Counsel. He prepared a water balance for four preliminary reservoir sites, which included developing lake evaporation from pan evaporation data, adjusting gaged stream flow by drainage area ratios, and including return flows from the City of Cleburne. After the client selected one site for additional study, he calculated probable sedimentation rates and volumes to adjust the future area capacity of the proposed reservoir. He then performed a yield analysis of the proposed reservoir to determine the firm yield. He prepared relocation and construction cost estimates for the proposed rock-filled dam. The client decided the cost of this proposed reservoir was too high, so Mr. Raabe performed several yield studies to determine the minimum dependable yield that would still satisfy the water demand requirements of the client. He found that by reducing the firm yield of the reservoir by one-third the construction cost was cut in half.

Mr. Raabe participated in a project for Brazos Electric Power Cooperative, which studied the feasibility of constructing cooling ponds and make-up water reservoirs to support a lignite power plant. He generated and evaluated evaporation, return flows, stream flows, and sedimentation rates at each reservoir site. He performed the computer analysis of this data to determine the respective yields and make-up water requirements at each site. He performed the relocation and construction cost estimates for each site.

Mr. Raabe also worked on a project for Houston Lighting and Power to determine the feasibility of operating a scalping reservoir on the Upper Neches River. The scalped water would be pumped to a cooling pond for a coal power plant. He performed the computer analysis of the historical stream flow data and downstream water rights requirements to determine the available water at that site to use as make-up water for the cooling pond.

Mr. Raabe developed area-capacity data for a proposed reservoir near Graham, Texas, for the Brazos River Authority. He performed the cost estimate to relocate roads, utilities, pipelines, and oil wells in the proposed reservoir site.

Mr. Raabe has prepared Texas Water Commission water appropriation permit applications and supporting technical drawings for 55 small lakes in the Las Colinas Development, Irving, Texas.

#### Membership in Professional Organizations

National Society of Professional Engineers  
Texas Society of Professional Engineers  
American Society of Agricultural Engineers  
American Society of Civil Engineers  
American Water Works Association  
Texas Water Conservation Association

## Education

Ph.D. Agricultural Economics, North Carolina State University, 1964

M.S. Agricultural Economics, Oklahoma State University, 1960

B.S. Agricultural Education, Berea College, 1958

## Experience

Dr. Grubb is a water resources planner, with emphasis in water development, regional water and sewer systems, and municipal and agricultural water conservation. He was Director of Planning for the Texas Water Development Board from 1976 through 1988, where he supervised the planning staff, was principal author of the 1984 Comprehensive Texas Water Plan, prepared and presented testimony before administrative and legislative hearings, and made numerous presentations of water planning information at public meetings. Since 1988, Dr. Grubb has been a member of HDR Engineering, Inc.'s water resources planning staff where he has done water planning and water conservation studies for individual cities, river basins, and multi-basin regions. He has written more than 80 reports, papers, and journal articles pertaining to water resources and economic development. Representative experience includes:

### *Regional Water Supply*

- Project Manager for 20.5 county South Central Texas and the 21 county Llano Estacado Regional Water Planning projects from 1998 through 2000. These planning efforts were carried out under Senate Bill 1 enacted in 1997 by the Texas Legislature to develop water plans to meet the needs of regions of Texas through 2050. The plans included descriptions of the respective regions, evaluations of available water supplies to meet projected water shortages of each water user group of each county of each region, identification and evaluation of quantities, costs, and environmental effects of water management strategies to meet each projected water shortage, and descriptions of plans to meet each projected shortage. The Regional Water Planning Group of each region guided and directed the selection of water management strategies included in each regional plan. These regional planning activities are being continued, as directed

contribution toward meeting water demands and maintaining spring flows. San Antonio River Authority, San Antonio, Texas.

- ❑ Organized and presented 50-year population, water demand, and ground and surface water supply projections for the Corpus Christi, Texas 12-county water service area for use in developing a water supply plan for this growing area of Texas. Evaluated water conservation through wastewater reuse to meet a part of Nueces Delta and estuarine freshwater needs, offsetting regulatory requirements to release stored Nueces River water for these needs. Integration of wastewater reuse and freshwater development is being implemented by local water supply agencies. City of Corpus Christi, Texas.
- ❑ Developed 50-year population and water demand projections for San Marcos, Texas, for use in sizing and scheduling water treatment plant, pipeline, treated water storage, and treated water distribution facilities to supplement present water supplies and meet future water needs. San Marcos is a rapidly growing college, industrial, and recreation center that depends upon the Edwards Aquifer for both water and San Marcos Springs which attract tourists and are habitat to several endangered species. Edwards Aquifer water users, including San Marcos, were under court order and State legislative directive to reduce Edwards Aquifer pumpage in order to maintain spring flows that protect endangered species and downstream water rights. San Marcos, Texas.
- ❑ Developed population and water demand projections for the Nueces River Basin and the 12-county service area of Corpus Christi's Choke Canyon/Lake Corpus Christi reservoir system and assisted in development of a report which presents the results of an analysis of estuarine productivity, costs and reservoir yield effects of diverting treated municipal and industrial wastewater into the Nueces River marsh and delta area in order to conserve freshwater to meet the area's long-term water needs. City of Corpus Christi, Port of Corpus Christi, Corpus Christi Board of Trade, South Texas Water Authority, and the Texas Water Development Board, Corpus Christi and Austin, Texas.
- ❑ Developed population and water demand projections for municipal, industrial, and agricultural needs for a 50-year planning period for the 10-county Guadalupe River Basin and assisted the Guadalupe-Blanco River

## Education

M.S., Civil Engineering, University of Texas at Austin, 1985

B.S., Civil Engineering, Rice University, 1981

## Registration

Professional Engineer, 1987

## Experience

Mr. Vaughn's experience in water resources engineering includes reservoir system modeling, river basin hydrology, regional water planning, conjunctive management of ground and surface water resources, water rights permitting, dam design and construction administration, and stormwater management studies. Projects representative of Mr. Vaughn's experience include:

- *San Antonio River Authority, South Central Texas Regional Water Plan.* Project Manager. Directed the technical evaluation of approximately 75 water management strategies, five alternative regional plans, and the 2001 and 2006 South Central Texas Regional Water Plans. Water management strategies included approximately 25 cross-country water transmission systems, 13 run-of-river diversions (some with off-channel storage and supplemental groundwater to ensure reliability), 16 potential major reservoirs, 8 groundwater development and collection systems, 10 aquifer storage and recovery systems, and seawater and/or brackish groundwater desalination facilities. Regional plans involved ensuring development of long-term, dependable supplies in a cost effective and environmentally sensitive manner. Technical evaluations included strategy description, quantification of water availability during drought, assessment of environmental effects, preliminary engineering and cost estimation, and identification of significant implementation issues. Technical evaluations involved applications of surface water models of the Nueces, Guadalupe – San Antonio, Lavaca, and Colorado River Basins, groundwater models of the Edwards, Carrizo, and Gulf Coast Aquifers, and innovative, original cost estimation tools and procedures.

## Professional Endeavors

- ❑ HDR Engineering, Inc.

1985 to Present

- ❑ University of Texas at Austin

Espey, Huston & Associates, Inc.

1980-1985

## LAURA RAUN

206 Fletcher St.  
Austin, TX 78704

Tel 512.707.0534

[laura@raunpr.com](mailto:laura@raunpr.com)  
[www.raunpr.com](http://www.raunpr.com)

**Career Summary:** Communications expert with proven skills in creating, presenting and evaluating messages; public relations counselor with demonstrated grasp of effective techniques and concepts; reporter and anchor at global media companies.

### **Laura Raun Public Relations**

**January 2002 – Present**

**Austin, Texas**

#### **Clients**

- *Lower Colorado River Authority* – Director of Communications for LCRA-SAWS Water Project, overseeing public outreach and stakeholder relations. Achieved measurable results, including 600% increase in stakeholder database, 150% increase in number of public outreach meetings and 63% increase in attendance at stakeholder meetings
- *Texas Water Conservation Association* – added features and raised professionalism of Confluence, the TWCA quarterly newsletter, helping to increase association membership
- *Texas Ground Water Association* - added features and raised professionalism of Fountainhead, the TGWA quarterly newsletter, helping to increase association membership
- *Cow Creek Groundwater Conservation District* - helped district gain voter approval for a more secure funding structure through a public education campaign
- *Hays Trinity Groundwater Conservation District* – currently helping district seek legislation to widen its authority and secure a more reliable funding structure
- *Panhandle Groundwater Conservation District* – enabled Board of Directors to adopt new district rules with widespread public support, including that of water marketer T. Boone Pickens

### **Hoover's Online**

**Executive Producer, Companies & Industries**

**Austin, Texas**

**April 2000 – February 2001**

- Managed Companies & Industries Channel, which drew 90% of total Website traffic
- Created 3-member team responsible for Companies Channel, Industries Channel and Home Page
- Oversaw integration of 13,000 non-U.S. enterprises into Companies Channel and relaunch of flagship product on Industries Channel
- Negotiated agreements-in-principle at lower licensing fees that saved substantial amounts of money for Hoover's

### **Bloomberg**

**Reporter, Seattle**

**September 1997 – March 2000**

- Reopened Bloomberg bureau in Seattle
- Broke story of Boeing's loss of airplane orders due to the Asian downturn
- Broke story of Microsoft considering the spin-off of its Internet activities into a tracking stock

### **Reuters**

**Reporter/Producer, London**

**1995-96**

- Anchored, reported and produced live, market moving news for Reuters Financial Television
- Interviewed corporate executives of Euro 100 and FTSE 100 companies, as well as international economists, political analysts and corporate strategists

421 Sixth St., #1  
San Antonio, TX 78215  
(210) 354-2925 office (210) 354-2964 fax

Ximenes & Associates, Inc. is a minority, woman-owned small business specializing in the field of public involvement for over 20 years. Our clients include a variety of government agencies, non-profits, and private firms who contract our consulting services to better interact and include the communities they serve in decision-making processes. Specifically, we serve as the primary liaison between our clients and their targeted communities to 1) create environments that are safe, secure and stimulating for the staff, agencies and the public to listen, inform and involve each other, 2) assure the flow of communications to the public and the media, and 3) ensure that input/feedback from the public is incorporated into the decision-making process.

We are certified as a small, woman-owned, minority business by the South Central Texas Regional Certification Agency through the Texas Unified Certification Program, and recognized as a Historically Underutilized Business (HUB) by the State of Texas. We are also "graduates" of the Small Business Administration's 8(a) Program.

Our offices are located in a Historically Underutilized Business District and house four full-time employees and one part-time employee. These employees help to carry out the company's mission by completing a variety of tasks in the areas of public participation, community outreach, collaborative planning, organizational development, and special interest research.

## **Sonia Jiménez**    *Public Participation Manager*

Sonia Jiménez received her Juris Doctorate degree from University of St. Thomas Law School in Miami, Florida and her Bachelor of Arts degree in Psychology from the University of Texas at San Antonio. She worked for Ximenes & Associates for approximately five years before taking an extended leave of absence to attend law school. She has extensive experience in managing complex projects, which require attention to detail and organizational skills. She has recruited and trained volunteers, organized large meetings of up to five hundred participants and managed a variety of tasks ranging from logistics coordination to dealing effectively with clients and the public. She has experience as a group facilitator working with neighborhood and other, varied citizen groups.

### **Education**

Juris Doctorate  
University of St. Thomas Law School  
Miami, Florida  
May 2004

Bachelor of Arts in Psychology  
University of Texas at San Antonio  
December 1994

### **Professional Background**

Ximenes & Associates, Inc.  
San Antonio, Texas  
June 2004 to Present  
1996 to 2001

Legal Assistant / Office Manager  
Law Office of Freddy B. Ruíz  
San Antonio, Texas  
1995 to 1996

Legal Assistant / Office Manager  
Law Office of Gary M. Poenisch  
San Antonio, Texas  
1994 to 1995

### **Significant Projects**

City of San Antonio and Bexar County  
Community Initiative,  
"Working Together: Building  
Foundations for the Future"  
*Community Outreach Facilitator and  
Logistical Coordinator for 500-person  
conference and outreach meetings*

San Antonio Water System  
*Community Conservation  
Committee, Project Manager*

Mission Trails Art Panel  
*Logistical Support for Public Artists  
Interviews*

San Antonio River Authority  
*Trans-Texas Water Program  
Provide Public Meeting  
Logistical Support*

### **Community Service**

American Red Cross Fundraiser  
*Chair, Sponsors Committee  
July 2004 to October 2004*
