|----------------------------|--------|-------|------------------------------|------------|-----------|------------|--|--------------------|--------------------|----------|------------|-----------------|-----------------|
| Public Water System | | | | | | | | | | | | | |
| 1 | 182 | 14531 | Menard | M | TX1640001 | 1,471 | Major rehabilitation, additions and modifications to the surface water treatment plant and raw water wells to address groundwater under the influence. | DC | \$5,250,000.00 | 70% | | | |
| 2 | 173 | 14573 | Eden | M | TX0480001 | 2,766 | The proposed project includes construction of a new 100,000 gallon clearwell; construction of a new 300,000 gallon ground storage tank; installation of a new treatment feed pump station; installation of new site piping and miscellaneous appurtenances; and rehabilitation one of the City's four groundwater wells. The proposed project will also include the development of an asset management plan. | PDC | \$3,541,000.00 | 70% | Yes-BC | \$3,541,000.00 | |
| 3 | 164 | 14472 | Sandbranch Development & WSC | W | | 190 | Install a water system to an existing development. | To Be Determined | \$4,025,000.00 | 70% | Yes-BC | \$4,025,000.00 | |
| 4 | 161 | 14532 | Barksdale WSC | W | TX0690011 | 210 | New Well | PADC | \$800,700.00 | 70% | | | |
| 5 | 135 | 14691 | Grassland WSC | W | TX1530005 | 55 | Addition of Reverse Osmosis system to reduce contaminant levels. | PDC | \$440,000.00 | | | | |
| 6 | 130 | 14520 | Westbound WSC | W | | 2,748 | Westbound WSC has substantial head loss through smaller diameter water lines, a lack of production water in certain pressure planes, limited capability to control and monitor the distribution system remotely, two pump stations that are old and hydraulically undersized, in addition to very limited emergency back up power. After the proposed improvements have been constructed, the above mentioned issues should be resolved. | PDC | \$5,416,000.00 | 70% | Yes-BC | \$5,416,000.00 | |
| 7 | 115 | 14625 | Town North Estates PWS | W | | 210 | The project involves the planning, design, and implementation of rehabilitation and replacement if necessary of the existing treatment system damaged in winter storm Uri in 2021. Interconnection with Lubbock will be explored as a more resilient long term supply. An asset management plan will be completed. | PDC | \$350,000.00 | 70% | | | |
| 8 | 112 | 14373 | Rose City | M | TX1810139 | 650 | Water Distribution System Improvements | PADC | \$650,000.00 | 70% | | | |
| 9 | 112 | 14610 | Rose City | M | TX1810139 | 650 | Obtain potable water from Orange County WCID 1. Pipeline, Ground storage tank, pumps, piping, building, controls | PADC | \$1,400,000.00 | 70% | | | |
| 10 | 107 | 14510 | Liberty Hill | M | | 2,041 | The proposed project includes planning, design, and construction of the first phase of a direct potable reuse water treatment system for the City of Liberty Hill's South Fork Wastewater Treatment Plant. | PADC | \$28,650,000.00 | 70% | Yes-BC | \$28,550,000.00 | |

Appendix J. Project Priority List - By Rank

| Rank | Points | PIF # | Entity | Owner Type | PWS ID | Population | Project Description | Requested Phase(s) | Total Project Cost | Disadv % | Green Type | GPR | Related PIF #'s |
|----------------------------|--------|-------|----------------------|------------|-----------|------------|--|--------------------|--------------------|----------|------------|----------------|-----------------|
| Public Water System | | | | | | | | | | | | | |
| 11 | 106 | 14511 | Liberty Hill | M | | 2,041 | The proposed project includes planning, design, and construction of the first phase of a raw water intake at the Gandy tract spring-fed pond, raw water pipeline, and surface water treatment plant to provide the City of Liberty Hill with a new source of drinking water supply and treatment capacity. | PADC | \$60,550,000.00 | 70% | | | |
| 12 | 106 | 14512 | Liberty Hill | M | | 2,041 | The proposed project includes planning, design, and construction of the first phase of an Edwards Aquifer well field in the Georgetown area, raw water pipeline, and treatment system to provide the City of Liberty Hill with a new source water supply and treatment capacity. | PADC | \$27,500,000.00 | 70% | | | |
| 13 | 97 | 14500 | La Joya | M | | 4,253 | The City of La Joya is seeking funding to expand their Water Treatment Plant. The city is experiencing the following issues; Inadequate water treatment capacity; Inadequate raw water pump capacity; and Trouble maintaining minimum TCEQ required water pressure to provide residents during peak times. The following items are needed to bring the water treatment and distribution systems in compliance to the TCEQ rules and regulations: Expand Water Treatment Plant and Install two 1,350 gpm pumps. | PDC | \$6,968,000.00 | 70% | | | |
| 14 | 93 | 14400 | Greenbelt MIWA | D | TX0650013 | 21,422 | The proposed project will install 3 proposed groundwater wells, well field piping, electrical distribution equipment, a 12-mile transmission line to transport the water to the existing Greenbelt Water Treatment Plant, and treatment plant upgrades to incorporate the new water source into the treatment process. The Greenbelt Water Authority has already negotiated water rights from this property, acquiring 2,780 ac-ft/yr of groundwater rights. | PADC | \$18,537,820.83 | 70% | | | |
| 15 | 84 | 14454 | Corix Utilities | P | | 3,282 | Improvements to the existing water treatment plant by installing a new membrane filtration system to meet water quality and capacity requirements. | PDC | \$9,883,000.00 | 70% | Yes-BC | \$9,883,000.00 | |
| 16 | 84 | 14422 | Angelina & Neches RA | D | TX0030027 | 578 | Develop and construct a new water supply source, transmission main and treatment plant/pump station for delivering potable water that meets or exceeds state and federal regulatory standards. Replace existing deteriorated distribution system lines, valves and water meters, to include new AMI/AMR meters. | PADC | \$7,192,110.00 | 70% | | | |
| 17 | 81 | 14564 | G-M WSC | W | TX2020067 | 11,220 | Construction costs for rehabilitation of a water well, GST, pump building as well as installation of additional treatment facilities. | C | \$4,580,000.00 | 70% | | | |

| Public Water System | | | | | | | | | | | | | |
| 18 | 80 | 14537 | Mullin ISD | D | | 130 | The Mullin Independent School District (MISD) is addressing the need to improve the school's water quality by removing nitrates from the water produced by their existing well by upgrading their existing water treatment system. | PD | \$1,000,000.00 | 70% | Yes-BC | \$1,000,000.00 | |
| 19 | 78 | 14579 | Silver Creek Village WSC | P | | 248 | Water Treatment Plant and System Upgrade | PDC | \$1,544,969.00 | | | | |
| 20 | 74 | 14548 | Duval Co CRD | D | | 360 | Replace elevated storage tank and install arsenic treatment in Concepcion | PDC | \$1,665,000.00 | 70% | | | |
| 21 | 72 | 14581 | Duval Co CRD | D | | 2,285 | Replace media in arsenic removal units. Install second water storage service pump. | PDC | \$420,000.00 | 70% | | | |
| 22 | 72 | 14377 | G-M WSC | W | TX2020067 | 11,220 | Upgrade existing plant components and replace water lines. Includes the creation of an asset management plan. | PDC | \$3,160,000.00 | 70% | | | |
| 23 | 68 | 14560 | Smyer | M | TX1100010 | 474 | The proposed project includes improvements at the water treatment plant and distribution system to bring the system into compliance with TCEQ requirements. An asset management plan will be prepared as part of this project. | PDC | \$4,365,000.00 | | Yes-BC | \$4,365,000.00 | |
| 24 | 68 | 14380 | Bay City | M | | 17,487 | This project includes prioritized rehabilitation of the City of Bay City's (City's) drinking water distribution system to address aging infrastructure and frequent line breaks. This project will also include the rehabilitation or decommissioning of an existing elevated storage tank that is in dire need of repair or replacement. Lastly, this project will address elevated levels of arsenic at two of the City's water wells. | PDC | \$26,625,000.00 | | | | |
| 25 | 67 | 14529 | Gladewater | M | tx0920001 | 6,441 | Improvements to the water system. | PDC | \$2,830,000.00 | 70% | | | |
| 26 | 67 | 14542 | Paint Rock | M | | 371 | This project involves the replacement of meters with an AMR system and the installation of water lines | PDC | \$300,000.00 | | Yes-BC | \$120,000.00 | |
| 27 | 67 | 14545 | Orange Co WCID # 1 | D | | 14,937 | This project will provide for a new estimated 2,000 GPM water well and treatment facilities. | PADC | \$4,791,500.00 | | | | |
| 28 | 66 | 14582 | Rowena WSC | W | | 480 | This project will reduce TTHM levels to gain compliance with the Stage 2 DBP Rule as well as address the open TCEQ compliance issues. | PDC | \$6,721,000.00 | 70% | Yes-BC | \$6,721,000.00 | |
| 29 | 66 | 14627 | Cox Addition PWS | W | | 150 | The project involves the planning, design, and implementation of rehabilitation and replacement, if necessary of the existing adsorption system damaged in winter storm Uri in 2021. Interconnection with Lubbock will be explored as a more resilient long term supply. An additional storage tank is needed. Asset management plan will be completed. | PDC | \$475,000.00 | 70% | | | |
| 30 | 64 | 14525 | Beach City WCID | D | TX0360126 | 408 | Water Supply and Distribution System Improvements | PADC | \$2,365,000.00 | | | | |

Appendix J. Project Priority List - By Rank**

| Rank | Points | PIF # | Entity | Owner Type | PWS ID | Population | Project Description | Requested Phase(s) | Total Project Cost | Disadv % | Green Type | GPR | Related PIF #'s |
|----------------------------|--------|-------|--------------------|------------|-----------|------------|---|--------------------|--------------------|----------|------------|----------------|-----------------|
| Public Water System | | | | | | | | | | | | | |
| 31 | 64 | 14688 | Orange Co WCID # 1 | D | TX1810005 | 14,937 | This project will provide for a liquid ammonium sulfate (LAS) system and related infrastructure at each of the District's three water well sites to address total trihalomethane maximum contaminant level issues. | PDC | \$837,936.00 | | | | |
| 32 | 64 | 14680 | Silverton | M | TX0230001 | 731 | The proposed project for the City of Silverton, involves the construction of a pump station, and a 200,000 gallon ground storage tank. Additionally, the project includes the drilling, test pumping, piping, site work, fencing and gates, electrical equipment, and electrical controls for three water wells. | DC | \$13,530,000.00 | 70% | | | |
| 33 | 62 | 14442 | Blanco | M | | 2,256 | This project consists of three waterline replacement projects, as follows; -9th Street Waterline Replacement -Cielo Springs Waterline Replacement -Palomino Waterline Replacement | ADC | \$3,558,738.40 | | Yes-BC | \$3,558,738.40 | |
| 34 | 59 | 14630 | Commodore Cove ID | D | | 370 | Remove 40 year old 60,000 gallon drinking water storage tank and install new water storage tank with circulation / aeration system. The circulation system will help further reduce the TTHM's forming in the storage tank after chlorination. | PC | \$299,976.00 | | | | |
| 35 | 59 | 14626 | Plott Acres PWS | W | | 204 | The project involves the planning, design, and implementation of rehabilitation and replacement if necessary of the existing adsorption system required to meet primary drinking water MCLs damaged in winter storm Uri in 2021. Interconnection with City of Lubbock will be explored as a best long term alternative. USAF has provided bottled water to Plott Acres customers due to PFAS plume and testing of the two wells is ongoing. If transmission funds allow service will be offered to private wells. An additional storage tank is needed. Asset management plan will be completed. Urgent Needs - Securing Safe Water Initiative to meet primary drinking water MCLs. | PDC | \$1,685,000.00 | 70% | | | |
| 36 | 55 | 14423 | Pflugerville | M | TX2270014 | 55,453 | Since July 2018, the City of Pflugerville's (City's) Water Treatment Plant (WTP) has received numerous violations under the Long Term 2 Enhanced Surface Water Treatment Rule (LT2ESWTR). This project addresses the issues at the WTP that have led to these violations. The design phase of this project is scheduled to be completed in May 2022. This project was selected to receive funding during the SFY 2022 DWSRF funding cycle; the City is now applying for supplemental construction funding for the WTP expansion. | C | \$91,532,030.00 | | | | |

|----------------------------|--------|-------|------------------------|------------|-----------|------------|--|--------------------|--------------------|----------|------------|----------------|-----------------|
| Public Water System | | | | | | | | | | | | | |
| 37 | 55 | 14475 | New Home | M | TX1530004 | 326 | The City has had high Arsenic and Fluoride levels that exceed the MCL of .01 and 4 MG/L for several, consecutive years and the City is under EPA enforcement action. | PADC | \$1,438,155.25 | | | | |
| 38 | 55 | 14427 | Arimak WSC | W | 1330135 | 108 | The Arimak Water Supply Corporation (WSC) is the recipient of an Administrative Order from the United States Environmental Protection Agency (EPA) for non-compliance of the Safe Drinking Water Act (SDWA) as it pertains to radionuclides levels in drinking water. The WSC is addressing this matter through the implementation of a groundwater treatment project. Also, the ground storage tanks (GSTs) have reached the end of their useful life and are in need of replacement. The project will include development of an asset management plan. | PDC | \$1,755,000.00 | | Yes-BC | \$1,755,000.00 | |
| 39 | 53 | 14504 | Gordon | M | TX1820007 | 744 | Water treatment plant improvements including clarifier replacement, plant piping, SCADA, and distribution line replacements. | PDC | \$1,962,000.00 | 70% | Yes-BC | \$625,000.00 | |
| 40 | 53 | 14390 | Sharyland WSC | W | TX1080033 | 90,846 | SWSC seeks funding from the Texas Water Development Board's Drinking Water State Revolving Fund in order to be able to better serve their customers and improve the overall performance, reliability, and redundancy of their water distribution system. Proposed projects include, but are not limited to: pressure zone expansions to address identified low pressure zones throughout the system and improve the level of service for customers; infrastructure relocation projects; additional storage for compliance with TCEQ requirements; capacity and performance improvements projects to treatment facilities and the distribution system; and looping and gridding throughout the system to improve redundancy, reliability, and resiliency. | PADC | \$59,881,000.00 | 70% | | | |
| 41 | 51 | 14619 | Town North Village PWS | W | | 650 | The project involves the planning, design, and implementation of rehabilitation and replacement if necessary of the existing treatment system damaged in winter storm Uri in 2021. The project also investigates options of interconnection with other PWS to provide blended water. Urgent Needs - Securing Safe Water Initiative to meet primary drinking water MCLs. | PDC | \$475,000.00 | 70% | | | |

|----------------------------|--------|-------|-----------------------|------------|-----------|------------|---|--------------------|--------------------|----------|------------|----------------|-----------------|
| Public Water System | | | | | | | | | | | | | |
| 42 | 50 | 14570 | Bistone Municipal WSD | D | | 24,929 | Bistone's transmission lines to its various wholesale customers is aged and has issues with leaks. The project will replace the portion of the transmission system known as the 1967 14" steel cylinder concrete pipe. Bistone has also been advised by TCEQ that a pressure sustaining tank (pressure tank or elevated tank) is needed for the periods when the Surface Water and Groundwater Treatment Plants are providing water. Blending is isolated from the two sources when the Surface Plant operates but this requires pumps to provide needed pressure. The elevated tank will resolve this issue and comply with the TCEQ Blending Exception. | PADC | \$24,861,000.00 | 70% | | | |
| 43 | 47 | 14426 | Pflugerville | M | TX2270014 | 55,453 | According to the City of Pflugerville's (City's) 2020 Water Master Plan, the City is expected to outgrow its current water supply capacity in the next few years. This project includes the expansion of the City's existing Colorado River raw water pumping and transmission system, which will nearly double the City's raw water supply capacity. The expansion of this system will provide sufficient water supply for the City's rapidly growing population until 2039, when additional water supply sources are anticipated to be brought online. | C | \$74,779,940.00 | | Yes-BC | \$1,500,000.00 | |
| 44 | 47 | 14420 | New Summerfield | M | TX0370028 | 1,350 | Water System Improvements | PDC | \$2,183,000.00 | | | | |
| 45 | 46 | 14514 | Dawson | M | | 767 | The purpose of this project is to replace/upsized undersized water mains that are causing issues within the system. Replacement of ex. valves and installation of new valves are also needed throughout for better operation and maintenance of the overall system. | PDC | \$300,000.00 | 70% | | | |
| 46 | 46 | 14521 | D & M WSC | W | TX1740010 | 5,320 | Construct pump station improvements and drill a new well at the F.R. Lewis or Moral Booster Stations based on the findings of the EFR. In addition, construct new water lines and replace targeted old deteriorated water lines. The creation of an asset management plan is also included. | PADC | \$3,520,000.00 | 70% | | | |
| 47 | 45 | 14498 | Presidio County | C | | 6,975 | Presidio County has numerous needs for their groundwater and drinking water facilities. This project contemplates making significant improvements to these water facilities for this seriously underserved community. | PDC | \$21,740,500.00 | 70% | Yes-BC | \$6,250,000.00 | |

| Public Water System | | | | | | | | | | | | | |
| 48 | 44 | 14399 | Wills Point | M | TX2340005 | 3,889 | The City of Wills Point has a 12 inch raw water supply line which supplies water from the intake on Lake Tawakoni to the City's Water Treatment Plant. The raw water transmission line, the raw water intake pump station, and the in-line booster pump station are in need of repairs, upgrades, and replacements. The purpose of this project is to replace 38,400 linear feet of 12 inch raw water transmission line from the Lake Tawakoni Intake to the City of Wills Point Water Treatment Plant, make upgrades to the raw water intake pump station, and make upgrades to the in-line booster pump station in order to provide reliable raw water to the City's Water Treatment Plant. | PDC | \$5,585,000.00 | | | | |
| 49 | 43 | 14418 | Alamo | M | TX1080001 | 19,613 | Water Treatment Plant Rehabilitation & Expansion | PDC | \$9,355,000.00 | 70% | | | |
| 50 | 43 | 14493 | Huntington | M | TX0030002 | 2,121 | Drill a new water well and install aerators inside elevated storage tanks | PADC | \$1,708,000.00 | 70% | | | |
| 51 | 43 | 14488 | Daingerfield | M | TX1720001 | 4,047 | Waterline Replacement and Pumping and Storage Upgrades | PADC | \$3,190,000.00 | 70% | | | |
| 52 | 42 | 14613 | Webb County | C | | 348 | Webb County is proposing to extend the main water line from the intersection of Mangana-Hein Road and Cuatro Vientos Road up to the location of the proposed Southern Fire Station, running approximately 1 mile east. | PADC | \$2,000,000.00 | | | | |
| 53 | 42 | 14614 | Webb County | C | | 348 | The main water line will extend along Cuatro Vientos Road from Cielito Lindo, which is located in City of Laredo limits, to the Mangana-Hein Road; (approximately 3 miles length). The potable water will be provided by the City of Laredo and the Certificate of Convenience and Necessity (CCN) will be transferred to the City of Laredo. | PDC | \$5,000,000.00 | | | | |
| 54 | 42 | 14615 | Webb County | C | | 348 | The goal of this project is to install distribution water lines for the residences in Colonia La Presa. Once the water line extension from Cielito Lindo to the Mangana-hein corridor has been installed, Webb County may begin to plat the area and ultimately install water distribution lines. | PDC | \$6,500,000.00 | | | | |
| 55 | 42 | 14616 | Webb County | C | | 348 | Webb County is proposing to install a distribution line from the main water line on Mangana-Hein Road to the new fire station. The new fire station will be located in the rural south area of Webb County in Precinct 1. | PDC | \$750,000.00 | | | | |

| Public Water System | | | | | | | | | | | | | |
| 56 | 42 | 14617 | Webb County | C | | 348 | Webb County will extend a distribution line from the main water line adjacent to Mangana-Hein Road to connect to the Webb County La Presa Community Center and the park that is located behind the center. | PDC | \$500,000.00 | | | | |
| 57 | 41 | 14461 | Kirbyville | M | | 2,631 | This project intends to replace an existing elevated storage tank that is severely deteriorated. | PDC | \$2,256,000.00 | 70% | Yes-BC | \$2,060,000.00 | |
| 58 | 41 | 14497 | Mercedes | M | TX1080007 | 16,648 | The City of Mercedes needs to update various critical water system components of the treatment, transmission/distribution, and storage systems. | PADC | \$10,335,208.00 | 70% | | | |
| 59 | 39 | 14436 | Paducah | M | | 1,186 | The proposed project includes replacement of sections of the aging and inefficient distribution system; replacement of the main transmission line that transports the water from Paducah's well field to town; and rehabilitation of the three remaining ground storage tanks at the well field to stop the corrosion that is prevalent on each of the three tanks, and addition of backup generators per the response to SB 3. | PDC | \$9,299,000.00 | 70% | Yes-BC | \$9,299,000.00 | |
| 60 | 37 | 14391 | Anthony | M | TX0710001 | 3,671 | The Town of Anthony will need to construct a 250,000 gallon elevated water tank, rehabilitate existing water wells, replace booster stations, address leaking water lines, install a chlorination control system, replace meters and build arsenic treatment plant in order to provide enough adequate water to the residents. | ADC | \$10,473,059.00 | 70% | | | |
| 61 | 37 | 14505 | Pearsall | M | | 9,346 | This project extends 8-inch waterline to existing homes and businesses on the north I-35 business road and replaces waterline in the City some of which is Colorado St. 12-inch main that is old and deteriorated with a history of breakage. Project also includes a new well and elevated storage tank to serve existing customers west of I-35. Completion of an asset management plan. | PADC | \$13,605,000.00 | 70% | | | |
| 62 | 36 | 14569 | Junction | M | | 2,507 | The City of Junction is currently be cited by TCEQ on various issues at the WTP. The City's water system requires equipment for emergency events. The City also has failing ACP and lead pipes that are constantly needing repair. | DC | \$405,000.00 | 70% | | | |

| Public Water System | | | | | | | | | | | | | |
| 63 | 36 | 14451 | Stephens Regional SUD | D | TX2150007 | 3,173 | SRSUD is proposing water system improvements to address growth in portions of the distribution system which includes upgrading a main arterial distribution main in the system to areas which are currently limited by the size of main. Improvements are also proposed for the water treatment plant (WTP) of address issues with aging equipment and operational improvements to increase treatment efficiency. | PDC | \$9,722,000.00 | 70% | Yes-BC | \$9,722,000.00 | |
| 64 | 36 | 14430 | Albany | M | | 1,983 | The proposed project includes improvements at the Water Treatment Plant to address aging infrastructure including replacement of existing membrane system trains, chemical system improvements, high service pump station improvements, electrical, SCADA, and Instrumentation and controls improvements. | PDC | \$7,731,000.00 | 70% | Yes-BC | \$7,731,000.00 | |
| 65 | 35 | 14690 | Eagle Pass Water Works System | M | TX1620001 | 67,211 | Analysis for Production, Treatment, and Distribution of a second groundwater source in Maverick County. Various distribution and transmission pipeline extensions and replacements. Demolition and New Elevated Storage Tanks | PDC | \$107,334,481.00 | 70% | | | |
| 66 | 35 | 14431 | Roma | M | | 19,123 | The City is addressing the need for Phase I (6 MGD) of a new water treatment plant (WTP) to serve City of Roma residents and fully comply with all water treatment regulations. The City's existing WTP was partially rehabilitated in the late 1990s and has reached the end of its useful life and requires replacement. | PDC | \$9,625,000.00 | 70% | Yes-BC | \$9,626,000.00 | |
| 67 | 34 | 14429 | Mertzon | M | TX1180002 | 700 | As a result of the recent historic ongoing drought, the City's water supply is still depleted. The City currently has five (5) functional groundwater wells (of the original eight), caused by continual pumping during the ongoing drought, and is in the process of obtaining approval for a new sixth well. The City has observed a steady decrease in production from its wells over the past several years, to the point that three of the original eight wells are essentially "dry" at this time. As the water supply has dwindled, the quality of the water no longer meets secondary drinking water quality standards. In order to support current water supply needs with water that meets current drinking water quality standards, the City of Mertzon is pursuing implementation of a major project to install a treatment system to address the City's groundwater quality issues. | PDC | \$6,478,000.00 | 70% | Yes-BC | \$6,478,000.00 | |
| 68 | 34 | 14450 | Spur | M | | 1,100 | Replacement of various portions of the City's potable water distribution pipeline system, valves, and fire hydrants. | PDC | \$2,648,000.00 | 70% | Yes-BC | \$2,648,000.00 | |

| Public Water System | | | | | | | | | | | | | |
| 104 | 30 | 14561 | Los Fresnos | M | | 6,280 | The City of Los Fresnos is proposing a City-wide rehabilitation of existing water distribution lines. The project consists of the removal and replacement of Approx. 80,000 LF of water lines. | C | \$11,216,110.00 | 70% | | | |
| 105 | 30 | 14682 | Bonham | M | TX0740001 | 10,408 | Installation of approximately 33,520 linear feet (bid schedules 1, 3 5 & 6) of 6"-24" water line, encasement, valves, services, fittings, fire hydrants, and associated appurtenances. Maintenance problems, Leaks associated with aging waterlines. | C | \$13,131,170.00 | 70% | | | |
| 106 | 30 | 14459 | Kingsland WSC | W | | 11,163 | The main pressure zone of the Kingsland Water Supply Corporation's (KWSC's) service area includes a relatively high elevation causing operational challenges with consistently maintaining pressures above 35 psi. This high elevation area corresponds with lowest-income customers in the KWSC service area. To address the system's root problems with insufficient elevated pressure head in this economically disadvantaged part of the system, this project will include the creation of a new boosted pressure zone within the main pressure zone by constructing a new booster pump station, elevated storage tank (EST), and performing system distribution improvements. The second component of this project will be improving the transmission capacity between the EST located at the KWSC water treatment plant (WTP) and the standpipe. This project will allow the KWSC to maintain compliance with the TCEQ'S system pressure requirements under all increasing demand conditions throughout the entire service area. | DC | \$9,220,000.00 | 70% | | | |
| 107 | 28 | 14558 | Red River Co WSC | W | TX1940008 | 6,738 | The project involves constructing three 200-gpm wells around the county, a 150,000-gallon elevated storage tank, approximately 17,000 LF of line extensions to connect these facilities into the system, and approximately 60,000 LF of line replacement and upsizing around the system. | PADC | \$8,706,886.10 | 70% | | | |
| 108 | 27 | 14546 | Parker County SUD | D | | 4,113 | This project will include the development of a brackish water well to augment the District's source water supply for treatment at its existing desalination WTP. | PDC | \$8,195,000.00 | 70% | Yes-BC | \$8,195,000.00 | |

| Public Water System | | | | | | | | | | | | | |
| 109 | 27 | 14494 | Olmito WSC | W | | 6,580 | The proposed 1.0 MGD Expansion to Existing Water Treatment Plant project includes expanding the current existing 2.0 mgd plant to treat 3.0 mgd. The project consists of expanding the existing raw water pumping, adding an additional sedimentation and filtration treatment unit, adding transfer pump capacity and making improvements to the existing disinfection systems. Plant expansion is necessary to meet current and future demands due recent accelerated growth north of the City of Brownsville in the Olmito WSC's water service area. | PADC | \$6,090,000.00 | 70% | | | |
| 110 | 26 | 14606 | Oak Grove WSC | W | TX0190014 | 921 | In October 2018, Riverbend Water Resources District (Riverbend WRD) completed a Regional Water Master Plan Study (Study) funded through the TWDB D-Fund Program that focused on the projected water needs of Riverbend WRD's participating entities located within Bowie, Cass, and Red River Counties. The Study evaluated several alternatives with a final recommendation of constructing a new regional water system. | PADC | \$1,281,550.00 | | Yes-BC | \$497,000.00 | |
| 111 | 26 | 14479 | Hitchcock | M | TX0840004 | 7,800 | The purpose of this project is to improve the City's water distribution system through the installation of additional valves and the targeted replacement of undersized mains. The project also includes the rehabilitation of its water production facilities to provide safe drinking water to its residents. | DC | \$23,863,500.00 | | Yes-BC | \$1,725,000.00 | |
| 112 | 25 | 14555 | Jacksboro | M | TX1190002 | 4,450 | The City of Jacksboro's Water Treatment Plant (WTP) is undersized and has reached the end of its effective useful life. The capacity of the WTP needs to be doubled to satisfy regulatory requirements and ongoing distribution system pressure deficiencies require construction of a new elevated storage tank (EST) and upsizing the main transmission line. | DC | \$25,000,000.00 | 70% | | | |
| 113 | 24 | 14585 | El Paso Co WCID # 4 | D | TX0710018 | 7,498 | The existing I-10 Ground Storage Reservoir controls the raw water feed quality to the existing Fe/Mn filters and Reverse Osmosis facility and provides storage if the Wells become non-operational. The reservoir is currently not in use due to tank structural defects. Under this project, the Fabens Water District (EPCWCID #4) proposes to demolish the existing 0.5 MG steel reservoir, including foundation and piping, and replace it with a new 0.25 MG steel reservoir, including foundation, piping, cathodic protection system, fencing, and site grading. | DC | \$1,241,811.00 | 70% | | | |

| Public Water System | | | | | | | | | | | | | |
| 123 | 23 | 14434 | Slaton | M | TX1520004 | 6,052 | The City of Slaton is proposing the installation of an AMI system throughout their distribution system as well as the installation of a new elevated storage tank. | PDC | \$6,030,000.00 | 70% | Yes-BC | \$6,030,000.00 | |
| 124 | 22 | 14490 | Greater Texoma UA | M | TX0910148 | 56,925 | The primary purpose of this project will be expand the water delivery capacity on the Collin-Grayson Municipal Alliance ("CGMA") water system. The work will focus at the pump station site and consist of the following components, 1)add a 4th pump and motor, VFDs, soft starters, 2) Add 2 additional stages to the three (3) existing pumps, 3) additional ground storage tank, 4)SCADA upgrades, 5)Backup Generator, 6) piping and pressure relief additions , 7)all associated electrical, plumbing and earthwork 8)and appurtenances. In order to add the stages to the pumps, the vertical turbine pumps will have to be removed and taken to a shop. During that process we would have the contractor inspect the pumps and motors and make any repairs should they be necessary. | C | \$7,531,300.00 | | | | |
| 125 | 22 | 14584 | El Paso Co WCID # 4 | D | TX0710018 | 7,498 | Per TCEQ requirements, the minimum pressure throughout a system during a transient event (power outage) must be greater than 20 psi. A surge evaluation of the existing I-10 booster station indicated that the system's pressure dropped below the minimum TCEQ required pressure of 20 psi during a power failure event. Per TCEQ requirements, the El Paso County Water Improvements District #4 (EPCWCID #4) requires an elevated storage capacity of 100 gallons per connection or a pressure tank capacity of 20 gallons per connection to meet this requirement. Under this project, the EPCWCID #4 proposes installing a new 120-gallon bladder tank to meet the pressure requirements in the event of a power failure event specified by TCEQ. | DC | \$199,584.00 | 70% | | | |
| 126 | 22 | 14586 | El Paso Co WCID # 4 | D | TX0710018 | 7,498 | The existing Cypress Well has been drilled but is currently not equipped. When in service, the Cypress Well will have a 900 GPM capacity. Under this project, the Fabens Water District (EPCWCID #4) proposes to fully equip Cypress Well #6, including furnishing and installing a new well pump and motor, a Well building and canopy, discharge piping, valves, flow meter, electrical and instrumentation systems, generator with ATS, site grading, and a new access roadway and driveway. | DC | \$1,235,465.00 | 70% | | | |

| Public Water System | | | | | | | | | | | | | |
| 146 | 20 | 14464 | San Diego MUD # 1 | D | | 4,753 | Rehabilitation of the existing elevated and ground storage for the San Diego MUD facilities. Replace 2-inch line with a 6-inch line from Well 7, and replace asbestos gaskets/line for 11,000 lf of 12- inch water main. Asbestos lines are a high priority for removal and considered an emerging contaminant. Rehabilitate broken chlorine sheds due to safety risks. | PADC | \$4,160,000.00 | 70% | | | |
| 147 | 20 | 14410 | Dean WSC | W | | 5,907 | Construction of a new elevated storage tank at an existing pump station. | PDC | \$2,858,500.00 | | | | |
| 148 | 20 | 14536 | Raymondville | M | tx2450001 | 11,284 | The City of Raymondville is proposing to remove and replace approximately 15,000 LF of existing waterlines | PDC | \$3,146,295.00 | 70% | | | |
| 149 | 20 | 14554 | Hidalgo | M | TX1080021 | 12,200 | 0.5 MG Elevated Storage Tank Project | PDC | \$4,477,000.00 | 70% | | | |
| 150 | 20 | 14681 | Palo Pinto Co MWD # 1 | D | 1820075 | 15,096 | The Brazos Pump Station and Hilltop WTP is suffering from aging infrastructure. A condition assessment of the facilities was performed and identified several elements for upgrading and replacing. | DC | \$11,779,000.00 | 70% | | | |
| 151 | 20 | 14476 | San Benito | M | | 24,371 | City of San Benito Proposed Water System Improvements | PDC | \$5,714,424.00 | 70% | | | |
| 152 | 20 | 14550 | Military Highway WSC | W | | 46,000 | Military Highway Water Supply Corporation will be performing needed repairs on ground storage tanks at four existing site locations. Total of 8 ground storage tanks | PDC | \$2,201,000.00 | 70% | | | |
| 153 | 20 | 14515 | Covington | M | | 570 | The purpose of this project is to replace/upsized undersized water mains to improve water flow/pressure. This project will also include replacement of lead service lines. Covington is experiencing between 25-35% water loss in any given month. | PDC | \$300,000.00 | | | | |
| 154 | 18 | 14508 | Hays County | C | | 213,366 | Jacob's Well is a karst spring, which originates from the Middle Trinity Aquifer. It is located in the Cypress Creek watershed in Wimberley, Texas. In the past, the spring has stopped flowing due to prolonged drought exacerbated by pumping influences in the areas that surround it. A problematic well has been identified as the primary controllable source of the problem. This project proposes to decommission this problematic well and replace it with a new well at a location that will not cause the same problem. The well's move and replacement below the Tom Creek Fault, based on scientific and engineering analysis suggests that healthy, consistent spring flow will be restored and preserved long term. | ADC | \$7,353,841.10 | | | | |

| 167 | 15 | 14535 | Nueces River Authority | D | | 304,347 | Water Resource and Flood Mitigation Planning Study | P | \$450,000.00 | | | | |
| 168 | 15 | 14393 | Travis County | C | | 1,226,805 | Travis County is interested in making water main improvements to serve businesses and homes gain or improve their water service. | DC | \$5,350,000.00 | | | | |
| 169 | 15 | 14443 | Travis County | C | | 1,226,805 | There are numerous areas within Travis County where drinking water systems are completely inadequate. This project will seek to address these inadequate systems and make physical improvements to improve water service to the residents. | DC | \$6,000,000.00 | | | | |
| 170 | 14 | 14412 | Mooreville WSC | W | TX0730015 | 142 | The Mooreville WSC (MWSC) water distribution system and single-phase high service pump station is old and has reached the end of its useful life. The booster pump station is undersized. The pump station must be upgraded to meet TCEQ requirements of 1.5 gpm per connection (currently 108 gpm). Larger pumps require 3-phase power at the pump station using phase converters. In addition, a new diesel standby power generator and new 2,000-gallon hydro-pneumatic pressure tank is required as well. The existing distribution system is undersized, old and suffers from significant water loss and frequent breakages. The proposed project will replace all of MWSC's distribution mains and will upsize those mains that that are currently undersized and result in poor water pressures and flows. The proposed project will construct approximately 21,500 LF of new 4-inch water mains, 10,500 LF of new 3-inch water mains, and 29,000 LF of new 2-inch water mains. | PADC | \$3,959,250.00 | | | | |
| 171 | 14 | 14496 | Acton MUD | D | | 22,643 | AMUD is proposing water system improvements to address growth in the distribution system which includes upgrading a main arterial distribution main in the system to areas which are currently limited by the size of main. Several areas also require the extension of main lines to provide additional pressure in areas where future developments are anticipated. | PDC | \$9,581,000.00 | | Yes-BC | \$9,581,000.00 | |

| Public Water System | | | | | | | | | | | | | |
| 214 | 6 | 14544 | Fort Worth | M | TX2200012 | 890,050 | The Fort Worth Water Department is currently inventorying service material throughout the city and removing city-owned lead service lines, resulting in partial lead service line replacement. The Fort Worth Department would like to continue with the removal of lead service lines on the customer-owned portion. The United States Environmental Protection Agency (USEPA) Lead and Copper Rule Revision (LCRR) recommends full service lead line replacement. The rule also defines a lead service as any galvanized service material currently or previously downstream of a lead service line. In addition, the rule also considers any unknown service line material as lead as well. This project will involve the replacement of approximately 1,200 known customer-owned lead service lines and known galvanized service lines requiring replacement. | C | \$12,000,000.00 | | | | |
| 215 | 5 | 14685 | Wolfforth | M | TX1520005 | 5,771 | The City of Wolfforth relies completely on groundwater for our water supply. We are experiencing unprecedented growth, and in need of expanding our water supply. We are requesting funding to develop six new wells. | PADC | \$9,350,000.00 | | | | |
| 216 | 5 | 14604 | North Alamo WSC | W | TX1080029 | 6,052 | To address low water pressure concerns in the service area south of Donna, Texas, North Alamo WSC will construct 37,000 lineal feet of waterlines. | PADC | \$2,722,705.00 | | | | |
| 217 | 5 | 14557 | McAllen | M | | 143,258 | McAllen Public Utility proposes to install large diameter transmission lines such as to improve efficiency of water delivery throughout the service area. This loan will also be used to fund the construction of a new elevated water storage tower. | C | \$6,750,000.00 | | | | |
| 218 | 5 | 14591 | Austin | M | TX2270001 | 1,053,756 | This project will replace galvanized services found in Austin Water's system on both the public and private side of the meter. | C | \$6,038,000.00 | | | | |
| 219 | 4 | 14590 | Austin | M | TX2270001 | 1,053,756 | Installation of approximately 6,200 linear feet of 24" reclaimed water main. | C | \$7,845,000.00 | | | | |
| 220 | 4 | 14397 | San Jacinto RA | D | TX1700197 | 112,439 | This project includes the replacement of 12 and 16-inch asbestos cement water transmission lines along Grogan's Mill Road south of Woodlands Parkway. | ADC | \$8,950,000.00 | | | | |
| 221 | 4 | 14402 | San Jacinto RA | D | TX1700197 | 112,439 | This project includes replacement of 12-inch asbestos cement water transmission lines along Lake Front Circle and Pinecroft Drive between Grogan's Mill Road and IH-45. | ADC | \$10,900,000.00 | | | | |

| Public Water System | | | | | | | | | | | | | |
| 222 | 4 | 14438 | San Jacinto RA | D | TX1700197 | 112,439 | This project includes replacement of 12-inch asbestos cement water transmission lines along Grogan's Mill Road between Research Forest Drive and Woodlands Parkway, Lake Woodlands Drive between Grogan's Mill Road and Pinecroft Drive, and Six Pines Drive between Timberloch Drive and North Millbend Road. | C | \$6,200,000.00 | | | | |
| 223 | 3 | 14687 | Wolfforth | M | TX1520005 | 5,771 | Wolfforth needs to increase our water treatment capacity to address the needs of our growing city. We also intend to develop an Asset Management Plan as a part of this project to assist us in the future. | PADC | \$16,600,000.00 | | | | |
| 224 | 3 | 14453 | Corix Utilities | P | | 345 | Addition of a new automatic meter reading (AMR) system and a new SCADA system. | PDC | \$1,127,000.00 | | Yes-BC | \$1,127,000.00 | |
| 225 | 3 | 14485 | Tioga | M | | 1,366 | The project involves constructing a new high service pump station, 500,000-gallon elevated storage tank, 250,000-gallon ground storage tank, chlorination equipment, and a 400 gpm water well at the airport road site. Additionally, line extensions to connect the elevated storage tank into the distribution system are included. | PDC | \$11,022,459.00 | | | | |
| 226 | 3 | 14602 | North Alamo WSC | W | TX1080029 | 8,723 | North Alamo WSC is proposing to install a new raw waterline from the Delta Regional Water Plant No. 7 to the Engelman Irrigation District. The project will provide Water Plant No. 7 with a secondary source of raw water. The improvements include the installation of approximately 18,000 lineal feet of pipeline with two control structures, a metering structure, and roadway crossings. The improvements will provide the treatment plant with two sources of raw water. | PDC | \$5,027,850.00 | | | | |
| 227 | 3 | 14559 | McAllen | M | | 143,258 | This Project consists of improvements to existing Back-up Power facilities at both our South and Northwest Water Treatment Facilities. | C | \$6,750,000.00 | | | | |
| 228 | 2 | 14466 | Graford | M | TX1820003 | 830 | Replace existing water lines, install a SCADA System and radio read meters | PDC | \$500,000.00 | | Yes-BC | \$500,000.00 | |
| 229 | 2 | 14385 | Dallas | M | TX0570004 | 1,736,651 | Dallas Water Utilities (DWU) is planning to build approximately 32 miles of 120/96-inch diameter treated water transmission pipeline along southern Dallas County. The Southwest Pipeline project (Project) will transfer treated water from the East Side Water Treatment Plant (ESWTP) located in Sunnyvale, Texas through the southern portion of the DWU service area to the Summit Ground Storage Tanks (GSTs) located in Cedar Hill. | C | \$73,300,000.00 | | | | |

| Public Water System | | | | | | | | | | | | | |
| 230 | 1 | 14389 | Marsha WSC | W | TX2270040 | 680 | Marsha WSC is experiencing major and consistent water loss in the distribution system. In order to prevent these losses, the PWS will need to replace water lines and replace meters. The system also needs to replace lines to accommodate fire flow. | PADC | \$5,571,400.10 | | Yes-BC | \$1,166,970.00 | |
| 231 | 1 | 14471 | Parker WSC | W | | 3,000 | The WSC wants to improve their water distribution system to better service customers with sufficient pressure and disinfectant residuals. | PDC | \$3,300,000.00 | | Yes-BC | \$3,300,000.00 | |
| 232 | 1 | 14622 | San Pedro Water Resources | W | TX2330064 | 147 | San Pedro water system requires a system upgrade to meet capacity requirements by TCEQ | PDC | \$343,000.00 | | | | |
| 233 | 1 | 14478 | Medina WSC | W | | 780 | Expensive maintenance has been deferred over the years on a Medina WSC storage tower that has been in operation since 1967. A recent assessment indicates a need for repairs and upgrades with a maintenance plan for the next 10 years in order to maintain function and meet TCEQ standards. The analog water meters used by Medina WSC develop inaccurate readings, require manual readings, are not accurate at identifying leaks on the customer or provider side of the line, and are not able to accurately measure low water flow, so the company is seeking to upgrade to ultrasonic flow meters in order to conserve water by reducing unaccounted water loss, decrease contamination risks, and decrease labor costs and hazards from meter reading and searching for leaks. | C | \$394,756.00 | | Yes-BC | \$138,406.00 | |
| 234 | 1 | 14686 | Wolfforth | M | TX1520005 | 5,771 | The City of Wolfforth is experiencing significant growth, and in order to meet our capacity needs, a new one-million gallon Elevated Storage Tank must be constructed. | PADC | \$6,515,000.00 | | | | |
| 235 | 1 | 14446 | Creedmoor Maha WSC | W | TX2270008 | 9,728 | Providing water services to those within the CMWSC CCN who do not have it available. | PADC | \$5,527,971.00 | | | | |
| 236 | 0 | 14577 | Bluegrove WSC | W | TX0390014 | 70 | This project involves the construction of a new pump station and the replacement of water distribution line to help with water loss. | PDC | \$300,000.00 | | | | |
| 237 | 0 | 14543 | Harrold WSC | W | TX2440002 | 141 | Install a new supply line and repair the existing elevated storage tank | PDC | \$300,000.00 | | | | |
| 238 | 0 | 14605 | Weston WSC | W | TX0430050 | 283 | Replace old waterlines with new PVC waterlines in the small town of Weston to minimize losses and continual leak repairs. | P | \$259,008.80 | | | | |

| 250 | 0 | 14539 | Olney | M | | 3,200 | Rehabilitation or new construction of the existing water treatment plant. | PADC | \$13,483,000.00 | | | | |
| 251 | 0 | 14507 | Clifton | M | TX0180001 | 3,442 | The City of Clifton is pursuing funds to perform multiple potable water system improvements, ranging from additional waterline installations to provide system looping capabilities, the drilling of a replacement well, and also the installation of AMR meters | PADC | \$2,783,670.54 | | | | |
| 252 | 0 | 14530 | Becker-Jiba WSC | W | | 3,618 | 300,000 gallon Single Pedestal Elevated Water Storage Tank for extra storage and waterline extension. | PDC | \$3,140,000.00 | | | | |
| 253 | 0 | 14394 | Justin | M | | 3,859 | This project includes the addition of a ground storage tank and high service pump station in order to increase the supply that can be received from UTRWD. | DC | \$3,161,250.00 | | | | |
| 254 | 0 | 14598 | Harris Co WCID # 92 | D | TX1010124 | 4,737 | Water Plant & Distribution System Improvements | PDC | \$7,350,000.00 | | | | |
| 255 | 0 | 14396 | Fort Stockton | M | | 8,424 | The City of Fort Stockton is developing a project to diversify its drinking water portfolio beyond the Edwards-Trinity Aquifer for system resilience. | DC | \$12,970,000.00 | | | | |
| 256 | 0 | 14603 | North Alamo WSC | W | TX1080029 | 11,572 | North Alamo WSC is proposing to construct a 1.0MGD elevated storage tank within its service area to address deficiency in elevated storage. | PADC | \$4,941,500.00 | | | | |
| 257 | 0 | 14411 | Ennis | M | TX0700001 | 20,678 | Remove and replace existing old, undersized, and deteriorating waterlines with a new larger diameter waterline. | PC | \$7,072,000.00 | | | | |
| 258 | 0 | 14541 | Military Highway WSC | W | | 46,000 | Military Water Supply Corporation will be upgrading 29,000 L.F. of existing waterline. | PADC | \$2,203,000.00 | | | | |
| 259 | 0 | 14552 | Harlingen Water Works System | M | | 75,330 | HWWS's two WTPs generate sludge that is stored in a single-cell lagoon at the MFR WTP. Sludge generated at the Downtown WTP is temporarily stored in earthen basins, then drained on the banks prior to hauling to the lagoon, while MFR sludge is pumped directly to the lagoon. Solids handling improvements are proposed to discharge dilute sludge to the sewer collection system and dewater it along with the WWTP biosolids. Alternatively, Downtown WTP sludge will be thickened / dewatered by mechanical methods prior to hauling to the lagoon or to off-site disposal. The lagoon will be divided two cells to allow drying and sludge removal from one cell while the other continues in service. Off-site disposal options include land application, land filling, monofil, and innovative use. | PAD | \$496,231.00 | | | | |

| Public Water System | | | | | | | | | | | | | |
| 260 | 0 | 14563 | Harlingen Water Works System | M | | 75,330 | The aging pipeline that conveys raw water to the Downtown WTP Reservoir by gravity flow consists of a 5' x 5' concrete box and a 42" reinforced concrete pipe, both of which require increasingly frequent repairs that jeopardize continuous use of the WTP. The 42" segment limits flow to 67% of the plant's rated capacity, and under high continual demands or an emergency condition in which the Downtown plant is the only WTP in operation, the pipeline will limit HWWS's ability to keep up with system demand. The proposed upgrade of the pipeline will eliminate downtime and ensure sufficient supply of raw water to the reservoir at the WTP's rated capacity. | PADC | \$10,552,822.00 | | | | |
| 261 | 0 | 14492 | Edinburg | M | TX1080004 | 95,847 | The City of Edinburg has an existing raw water reservoir which provide raw surface water to the City's two water treatment plant facilities. The reservoir was constructed over 40 years ago and are in need of rehabilitation. The raw water reservoir side slopes have deteriorated and the reservoir is currently leaking and losing storage water. Rehabilitation will consist of restoring side slopes with concrete revetment to prevent erosion and installing a geo synthetic liner to prevent raw water leakage and raw water loss. | PDC | \$8,860,000.00 | | | | |
| 262 | 0 | 14594 | Austin | M | TX2270001 | 1,053,756 | Convert the existing disinfection chemical feed at Ullrich WTP from chlorine and ammonia gas to 'inherently safer technology' of On-site Sodium Hypochlorite Generation (OSHG) and Liquid Ammonia Sulfate (LAS). | C | \$50,986,660.00 | | | | |
| 263 | 0 | 14462 | San Antonio Water System | M | | 2,003,714 | The Water Production Facilities Disinfection System Upgrades Phase 4 project will design the upgrades needed to convert the Anderson, Mission and Oliver Ranch pump stations from chlorine gas to sodium hypochlorite generation as a disinfectant for potable water | D | \$2,214,434.00 | | | | |
| 264 | 0 | 14463 | San Antonio Water System | M | | 2,003,714 | The Seale Pump Station Improvements project, a part of the multi-year pump station improvements program, will evaluate and replace high service pumps, well pumps, and associated electrical and SCADA equipment. | D | \$2,372,598.00 | | | | |

| Public Water System | | | | | | | | | | | | | | |
| 265 | 0 | 14384 | Dallas | M | TX0570004 | 2,561,490 | DWU's water main replacement program provides for rehabilitation or replacement of approximately 40 miles of small diameter water mains annually. This program will allow us to continue to replace water mains to reduce water main breaks throughout the system; thereby reducing maintenance costs, water losses and impact to the public. DWU targets a break rate of 15 breaks per 100 miles per year and adjusts its replacement program relative to meeting that goal. This is consistent with the goal defined in the AWWA Partnership for Safe Water Distribution System Optimization Program. | DC | \$34,000,000.00 | | | | | |
| 266 | 0 | 14386 | Dallas | M | TX0570004 | 2,561,490 | The Lake June Pump Station (PS) and Reservoirs, built in 1960, have exceeded their useful life and need to be replaced. Lake June PS delivers 360 mgd of potable water to four separate pressure planes within the DWU distribution system. There is 21 MG of onsite storage capacity. The pump station must remain in service until the new pump station and reservoirs are built with minimal shutdown. The proposed project is Engineering Design Services for the replacement of Lake June Pump Station (PS) and Reservoirs. This pump station is critical to Dallas Water Utilities' ability to deliver potable water to south Dallas and represents the only supply source for the Cedardale High Pressure Plane. The Lake June Pump Station is a crucial component of DWU's water delivery system and is highest ranked project on DWU's Pump Station Criticality List. | D | \$7,500,000.00 | | | | | |
| 267 | 0 | 14518 | Dallas | M | TX0570004 | 2,561,490 | DWU's Elm Fork WTP Filter Complex -Phase 2 project will complete the construction of the new BAF Filter Complex and integrate it into the plant's treatment process. | C | \$127,400,000.00 | | | | | |
| Public Water System Total | | 267 | | | | | | | | \$2,492,000,652.22 | 124 | 61 | \$292,089,402.40 | |
