

Prioritizations of Recommended Water Management Strategies in the 2011 Regional Water Plans As of February 2, 2015

This file consists of the 16 prioritizations of all recommended water management strategies in the 2011 regional water plans, as developed and submitted by the regional water planning groups September 1, 2014 and updated to reflect subsequent plan amendments. Note that these 16 regional water plan prioritizations are based on the Uniform Standards that were developed and adopted by the HB4 Stakeholder Committee (Stakeholder).* (**adopted by SHC 11/14/2013 at 3pm and approved by TWDB 12/5/2013*)

The HB4 Stakeholder Committee reconvened January 13, 2015. The Stakeholders agreed for the 2016 regional water planning group prioritizations (due December 1, 2015) not to make any changes to the Uniform Standards and to use the current Uniform Standards to complete the 2016 regional water plan prioritization.

A project's prioritization by the regional water planning group is one of the criteria that TWDB will use to rank projects seeking SWIFT funding.

Please note that each WMS prioritization score is based on a maximum of 1,000 possible points.
