Water Supply Infrastructure Grant (WSIG) Funding Update

The Water Supply Infrastructure Grant (WSIG) opportunity received a significant number of applications requesting funding for eligible water infrastructure projects across Texas. In accordance with the Implementation Plan and available funding, the Texas Water Development Board (TWDB) completed a comprehensive review of applications and developed funding recommendations for Board consideration.

The Executive Administrators' recommendations for eligible Extra Large (XL) and Large WSIG projects will be presented to the Board for consideration at its December 3, 2026, meeting. Applications in the Medium, Small, and Extra-Small (XS) categories remain under review, and recommendations for those categories will be presented at a future Board meeting.

Applicant categories are based on the population served. XL: applicants serve populations greater than 1 million. Large applicants serve populations between 150,001 to 1 million. Medium applicants serve populations between 10,001 to 150,000. Small applicants serve populations between 1,001 to 10,000. XS applicants serve populations of 1,000 or fewer.

The TWDB will contact all applicants in the XL and Large categories regarding their funding status on November 30th. Applicants whose projects are not selected for funding will be provided with additional resources and information on potential funding opportunities that may be available to support their project needs.

Thank you for your interest in the WSIG opportunity and for your commitment to helping secure Texas' water future.
