

Clean and Drinking Water State Revolving Funds Project Priority Invitation State Fiscal Year 2020

The Texas Water Development Board is inviting entities to submit information on projects to be included in the upcoming fiscal year's State Revolving Fund programs' Intended Use Plans.

To be included in the initial Project Priority List for State Fiscal Year (SFY) 2020, entities must submit a completed Project Information Form through the online application or by completing the Microsoft Word application. Project Information Forms must be received by **5:00 p.m. on March 1, 2019**.

The Clean and Drinking Water State Revolving Funds financial assistance programs help communities save money by providing cost-effective funding for wastewater and water infrastructure projects. Entities that use these programs achieve substantial savings by receiving below-market interest rates and, in some instances, principal forgiveness.

Principal forgiveness may be available for entities that qualify as disadvantaged communities or small/rural disadvantaged systems, for projects with green components, or for projects addressing disaster recovery or urgent need situations. The Drinking Water State Revolving Fund also includes principal forgiveness for Very Small Systems. While these programs are accessible year-round, the principal forgiveness subsidies available are generally allocated to projects on the initial Project Priority List each year.

Reminder: Project Information Forms submitted in previous years must be updated to be included in the SFY 2020 lists.

You may access Project Information Forms or update forms through the links below:

Online Loan Application: <https://ola.twdb.texas.gov>

Word Document: <http://www.twdb.texas.gov/financial/programs/pif.asp>
