Texas Water Development Board
SFY 2023 Drinking Water State Revolving Fund - Lead Service Line Replacement
Amended Intended Use Plan
Appendix J. Project Priority List - Invited

Rank	Points	Entity	PWS ID	Population	Project Description	Requested Phase(s)	Total Project Cost
1	56.83	Moran	TX2090002	270	This project included identifying and replacing lead service lines.	PDC	$767,050.00
2	55.4	Lorenzo	TX0540002	1,182	Inventory and Replace Lead Service Lines.	PDC	$1,460,000.00
3	54.04	Morton	TX0400001	1,690	Inventory and Replace Lead Service Lines.	PDC	$2,530,000.00
4	53.37	Rocksprings	TX0690012	1,857	Conduct Lead and copper service line inventory and lead and galvanized service line replacement.	PDC	$724,888.48
5	52.14	Marlin	TX0730002	5,967	The City's initial Project is to conduct a complete Inventory of each of the household connections, documenting and classifying the entire service line inventory. Inventory Methodology will include Previous Materials Evaluation/ Construction Records and Plumbing Codes/ Water System Records/ Distribution System Inspections and Records; and will also utilize identifications during normal Operations - Meter Reading, Repair, Replacement; Service Line Repair, Replacement. Investigation Methods will include as may be required - visual at meter pit/ CCTV I water quality sampling/ mechanical excavation.	P	$195,000.00
6	51.91	Buffalo Gap	TX2210003	1,422	This project included identifying and replacing lead service lines.	PDC	$2,257,150.00
7	51.81	Paducah	TX0510001	1,186	Inventory and Replace Lead Service Lines.	PDC	$1,940,000.00
8	51.68	Eden	TX0480001	1,899	Inventory of the materials of construction and replacement of the lead and galvanized water service lines in the distribution system.	P	$230,000.00
9	50.45	Benjamin	TX1380011	258	This project included identifying and replacing lead service lines.	PDC	$960,311.00
10	50.36	Roma	TX2140007	19,123	Inventory of the materials of construction and replacement of the lead and galvanized water service lines in the distribution system.	P	$654,000.00
11	50.12	Mertzon	TX1180002	700	Inventory of the materials of construction and replacement of the lead and galvanized water service lines in the distribution system.	P	$119,000.00
12	50.11	Devine	TX1630006	4,318	Inventory, Identify and replace lead service line connections.	PDC	$11,675,250.00
13	49.12	Carbon	TX0670015	440	This project included identifying and replacing lead service lines.	PDC	$1,236,550.00
14	48.69	Alto	TX0370001	1,523	The intent of this project is to identify all lead service lines within the distribution system and replace/upgrade these service lines.	PDC	$855,000.00
15	48.49	Mart	TX1550005	2,200	The project will include a comprehensive and accurate inventory of water service lines, including locating and mapping, to identify whether lead service lines are present or not for both the City of Mart and the customers. From the inventory information, a plan for replacement of lines will be determined and costs for replacement will be developed. The City of Mart plans to apply for funding to accomplish the replacement of lead lines in future TWDB applications. Additionally, as part of this application, the City of Mart will be creating a GIS of the system to manage the data collected through the inventory process as well as update system information as updating of lines is completed.	P	$212,000.00
16	48.03	Brady	TX1540001	5,371	Inventory of the materials of construction and replacement of the lead and galvanized water service lines in the distribution system.	PDC	$5,282,000.00
17	47.99	Idalou	TX1520001	2,250	Inventory and Replace Lead Service Lines.	PDC	$1,650,000.00
18	47.85	Lexington	TX1440002	2,376	Conduct field work and prepare Service Line Inventory for TCEQ by October 16, 2024. Replace public water system and private service lines between water main line and customer's house connection.	PADC	$2,339,500.00
19	47.47	Glidden FWSD # 1	TX0450021	860	Conduct a thorough search on Colorado CAD website by customer name and/or street address as a large number of the customers live in or on rental property or in a RV/Trailer Park; research existing "as built" plans for the system or CSI documentation; contact customers or property owners to get their knowledge of materials used from the meter to the house tap; and if needed, excavate around the water meters to verify materials used on both side of the meter. Once all this information is obtained, will make plans to proceed with replacing any lead service lines identified.	PC	$343,750.00

Phase(s): P-Planning, A-Acquisition, D-Design, C-Construction

All financing will be made at the ratio of
51% principal forgiveness and 49% loan/bond.

Texas Water Development Board
SFY 2023 Drinking Water State Revolving Fund - Lead Service Line Replacement
Amended Intended Use Plan
Appendix J. Project Priority List - Invited

Rank	Points	Entity	PWS ID	Population	Project Description	Requested Phase(s)	Total Project Cost
20	47.4	Hamilton	TX0970001	2,871	Use the survey data to identify areas of the city that have lead lines that are in need of replacing. We will also do physical inspections as necessary.	PDC	$7,360,411.00
21	47.33	Munday	TX1380003	1,300	This project included identifying and replacing lead service lines.	PDC	$2,663,975.00
22	47.27	Hawkins	TX2500001	1,278	The proposed project includes planning, design, and construction of complete removal and replacement of 38,750 LF of ¾'' lead and galvanized steel service lines and appurtenances that meets the requirements established under 40 CFR 143. The goal of this project is to improve the drinking water the City of Hawkins provides to its customers. Additional work consists of removal and replacement of lead or galvanized goosenecks, pigtails, connectors, curb stops, boxes, and replacement with an acceptable material that meets the requirements established under 40 CFR 143 and which complies with state and local plumbing codes and or building codes. Site restoration, including landscaping, sidewalk repair, driveway repair, etc. shall be required where specified in the plans.	PDC	$2,512,105.00
23	47.16	Amherst	TX1400006	791	Inventory and Replace Lead Service Lines.	PDC	$1,025,000.00
24	47.13	Loraine	TX1680002	602	Inventory of the materials of construction and replacement of the lead and galvanized water service lines in the distribution system.	P	$136,000.00
26	46.52	Grand Saline	TX2340003	3,215	Proposed project includes identifying lead service lines, design of removal and replacement, and construction work to remove and replace lead lines.	PDC	$1,912,400.00
26	46.52	Meadow	TX2230002	593	Inventory and Replace Lead Service Lines.	PDC	$800,000.00
27	46.12	Westwood Shores MUD	TX2280016	2,733	Identify all the possible lead service lines and comply with EPA's mitigation requirements.	PDC	$1,589,000.00
28	45.97	Mineola	TX2500002	4,515	Proposed project includes identifying lead service lines, design of removal and replacement, and construction work to remove and replace lead lines.	PDC	$1,008,700.00
29	45.93	Trent	TX2210009	269	Inventory of the materials of construction and replacement of the lead and galvanized water service lines in the distribution system.	P	$139,000.00
30	45.7	Thorndale	TX1660003	1,400	The project will include a comprehensive and accurate inventory of water service lines, including locating and mapping, as required by EPA/TCEQ to identify whether lead service lines are present or not for both the City of Thorndale and the customers.	P	$184,000.00
31	45.57	Jefferson	TX1580001	1,883	Identify, map, and inventory service connections. Replace non-compliant service lines.	PDC	$2,025,000.00
32	45.53	Vernon	TX2440001	10,078	The City of Vernon is requesting funds in order to take inventory and replace existing service lines containing lead.	PDC	$9,360,000.00
33	45.51	Seymour	TX0120001	2,817	This project included identifying and replacing lead service lines.	PDC	$5,437,748.00
34	45.49	Chillicothe	TX0990001	707	Inventory, Identify and Replace Lead Service Lines.	PDC	$330,000.00
35	45.41	Pearsall	TX0820002	9,346	Complete inventory of all service lines in the City of Pearsall to determine which lines include lead in accordance with EPA/TCEQ requirements. Overall plan for remaining steps for compliance with new rules.	PDC	$914,000.00
36	45.39	Gladewater	TX0920001	6,441	Identify, map, and inventory service connections. Replace non-compliant service lines.	PDC	$2,300,000.00
37	45.27	O'Donnell	TX1530001	714	The City is requesting financial assistance from TWDB to determine the exact number and location as well as replacement of the lead and galvanized service lines within the distribution system.	P	$113,000.00
38	45.24	East Texas MUD of Smith County	TX2120005	3,879	Proposed project includes identifying lead service lines, design of removal and replacement, and construction work to remove and replace lead lines.	PDC	$1,311,800.00
39	45.09	Pittsburg	TX0320001	4,754	Planning services for water service line inventory of all service lines (public and private) connected to the public water distribution system. Design, bidding, inspection, and construction administration for replacement of an estimated 2171 lead service lines to be confirmed in the lead service line inventory phase.	PDC	$15,969,407.84

Phase(s): P-Planning, A-Acquisition, D-Design, C-Construction

All financing will be made at the ratio of
51% principal forgiveness and 49% loan/bond.

SFY 2023 Drinking Water State Revolving Fund - Lead Service Line Replacement
Amended Intended Use Plan
Appendix J. Project Priority List - Invited

Rank	Points	Entity	PWS ID	Population	Project Description	Requested Phase(s)	Total Project Cost
63	42.34	Alice	TX1250001	17,891	Phase I, to purchase a trailer-mounted hydro-excavator and truck to transport the hydro-excavator; funds to reimburse pay for City Staff doing the inventory; funds to pay for clerk who will input into TCEQ/EPA excel spreadsheet, the inventory data; funds to hire a consulting firm to locate service lines with GIS map coordinates, to investigate and to determine material of service lines, and to categorize such lines to determine non-lead or lead for replacement. These activities and investigations will enable the City to have a more accurate figure to be determined for sampling requirements under the rule, excavation, and for the replacement cost of known lead service lines immediately upon their discovery.	P	$755,320.00
64	42.29	Fredericksburg	TX0860001	14,500	Complete a service line inventory and replace identified lead service lines in accordance with the Lead and Copper Rule Revisions. Project will prioritize replacement of lead service lines starting with schools and daycare facilities, and then replace the remaining lead service lines found in the system.	PDC	$1,300,000.00
65	42.17	Alpine	TX0220001	6,000	This project consists of identifying lead service lines in the City's service area and replacing service lines that contain lead.	PDC	$6,011,144.00
66	42.16	Redland WSC	TX0030028	3,637	The intent of this project is to inventory all lead service lines within the distribution system and replace them with new service lines.	PDC	$1,082,000.00
67	42.07	Wills Point	TX2340005	6,648	Proposed project includes identifying lead service lines, design of removal and replacement, and construction work to remove and replace lead lines. City expects to use Force Accounting agreement to complete parts of the LSLR inventory.	PDC	$631,400.00
68	41.98	Atlanta	TX0340001	5,495	Inventory and replace lead service lines.	PADC	$1,629,498.79
69	41.92	Corsicana	TX1750002	24,190	Inspect all meters and connections in distribution system where lead services could exist.	PDC	$98,000.00
70	41.9	Snyder	TX2080001	10,753	Inventory of the materials of construction and replacement of the lead and galvanized water service lines in the distribution system.	P	$698,000.00
71	41.68	Marshall	TX1020002	23,091	Planning services for water service line inventory of all service lines (public and private) connected to the public water distribution system. Design, bidding, inspection, and construction administration for replacement of an estimated 850 lead service lines to be confirmed in the lead service line inventory phase.	PDC	$7,450,615.00
72	41.57	Wilmer	TX0570018	6,690	By undertaking this project the City intends to eliminate lead water services from their system if any are identified. This project will be approached in two phases. The first phase will be to perform the EPA and TCEQ mandated lead service inventory and submit said inventory to TCEQ well in advance of the October 2024 deadline. The second phase of the project will be to replace all identified lead services with appropriate new water service materials. This second phase will include planning, design, stakeholder coordination and construction services.	PDC	$2,438,573.75
73	41.56	Terrell	TX1290006	18,897	Project consists of identifying the pipe type for both public and private service lines for approximately 6,000 accounts. Cost estimate is based on contracting work to identify the type of pipe and an estimated 500 service line replacements from the city meter to the house/business connection and 100 services from the main to the household/business.	PDC	$4,547,000.00
74	41.54	Athens	TX1070005	20,334	Inventory and identify all known lead service lines and replace/upgrade these lines.	PDC	$2,310,000.00
75	41.49	Poteet	TX0070005	4,185	City of Poteet is requesting funding for the Lead Service Line Inventory and Replacement. This project is to include the work required to identify the material of all the service lines and develop an inventory, planning and designing for all lead service lines replacements, and site restoration required.	PDC	$590,300.00
76	41.38	Van	TX2340004	4,038	Prepare water service line inventory, prepare service line replacement plan, and design and construct lead and galvanized service line replacements.	PDC	$3,446,730.00

Phase(s): P-Planning, A-Acquisition, D-Design, C-Construction

All financing will be made at the ratio of
51% principal forgiveness and 49% loan/bond.

Rank	Points	Entity	PWS ID	Population	Project Description	Requested Phase(s)	Total Project Cost
90	39.57	Sherman	TX0910006	42,762	Field Verification of Service Line Material: Based on the initial inventory prepared during Phase 2, priority areas will be identified for field inspections. This phase will include field work through a contractor, program management and data management. The City plans to field verify 10% of their unknowns per year over the next 10 years. Monitoring and "Find and Fix" Plan: In this phase, the sampling plan will be updated per the new compliance requirements and additional non-compliance sampling to observe lead concentrations will be conducted before the compliance deadline. Lead Service Line Replacement Planning and Mitigation: A Lead Service Line Replacement Plan will be developed as required for compliance with the LCRR outlining the goals, customer coordination, funding and other considerations for lead service line replacement activities. This phase also covers construction costs and program oversight required to replace lead service lines, lead fittings and lead connectors identified in the system during Phases 2 and 3. It includes activities required to support the replacements, such as design, legal measures and public communication, and additional water sampling required to monitor the effectiveness of the line replacements.	PC	$6,515,535.00
91	39.35	Abilene	TX2210001	123,886	This project consists of replacing service lines that contain lead in the City's service area.	PDC	$12,998,141.00
92	39.26	Monahans	TX2380001	6,953	Inventory of the materials of construction and replacement of the lead and galvanized water service lines in the distribution system.	P	$409,000.00
93	39.24	Denver City	TX2510001	5,000	Inventory, Design and Replace lead service lines.	PDC	$2,943,700.00
94	39.2	Cleburne	TX1260003	30,573	The project will include completion of a lead service line inventory, supplemental lead sampling, planning and design for infrastructure, design and construction cost for removal/replacement of goosenecks/pigtails/connectors/service lines and acquisition of temporary water filter systems for affected households.	PDC	$48,492,400.00
95	39.19	Brownsville	TX0310001	176,362	This project will consist of the following: Lead Service Line Inventory, Lead Replacement Plan, and Public Education & Notification Program.	PC	$10,796,190.00
96	38.64	Ennis	TX0700001	21,203	This project will identify, map, and inventory service connections within the City of Ennis including evaluation of piping material. The inventory will identify lead service lines which will then be replaced with TCEQ compliant service line from the main to the structure.	PDC	$3,050,000.00
97	38.53	Tyler	TX2120004	104,798	Inventory, Identify and replace all lead service lines.	PDC	$2,000,000.00
98	38.42	Big Spring	TX1140001	27,282	This project consists of identifying lead service lines in the City's service area and replacing service lines that contain lead.	PDC	$16,106,339.00
99	38.38	San Angelo	TX2260001	101,004	Field verification of service line material, monitoring and lead service line replacement plan, LSL replacement.	PC	$12,607,779.00
100	38.29	White Oak	TX0920006	6,469	Identify, map, and inventory service connections. Replace non-compliant service lines.	PDC	$2,300,000.00
101	38.15	Weatherford	TX1840005	27,900	The initial phase of this project will be focused on developing an initial service line inventory based on the best available data and a prioritized plan for investigation of unknown service lines. Assumptions for potential lead service line replacements are included herein for the subsequent phase of field investigation and replacement of lead service lines.	PDC	$14,982,440.00
102	38.1	Duncanville	TX0570007	39,500	This project will be approached in two phases. The first phase will be to perform the lead service inventory and submit said inventory to TCEQ. The second phase of the project will be to replace all identified lead services with appropriate new water service materials. This second phase will include planning, design, stakeholder coordination and construction services.	PDC	$21,181,293.44

Phase(s): P-Planning, A-Acquisition, D-Design, C-Construction

All financing will be made at the ratio of
51% principal forgiveness and 49% loan/bond.

SFY 2023 Drinking Water State Revolving Fund - Lead Service Line Replacement
Amended Intended Use Plan
Appendix J. Project Priority List - Invited

Rank	Points	Entity	PWS ID	Population	Project Description	Requested Phase(s)	Total Project Cost
252	12.04	Hurst	TX2200054	38,510	The City developed a phased approach. Phases 1 and 2 are in progress; The City is seeking funding for future Phases 3 through 5. Phase 3 – Field Verification of Service Line Material Predictive modeling will be developed and used to identify priority areas for field inspections. This phase will include field work through a contractor, program management and data management. Phase 4 – Sample Plan Update, Preliminary Sampling, Monitoring and LSLR Plan In this phase, the sampling plan will be updated per the new compliance requirements, and sampling to observe lead concentrations will be conducted before the compliance deadline. Based on the results of this effort, the City may proactively implement a lead service line replacement program. A LSLR Plan will be developed as required for compliance with the LCRR outlining the goals, customer coordination, funding, and other considerations for future line replacement activity. Phase 5 – Lead Service Line Replacement. This phase covers construction costs and program oversight required to replace lead service lines, lead fittings and lead connectors identified in the system during Phases 2 and 3. It includes activities required to support the replacements, such as design, legal measures and public communication, and additional water sampling required to monitor the effectiveness of the line replacements.	PC	$4,164,629.00
254	11.22	Corpus Christi	TX1780003	325,733	Assessment of service lines in the City's service area, development of an inventory to satisfy EPA and TCEQ requirements, and replacement of lead service lines as identified in the assessment.	PDC	$1,537,500.00
255	10.65	Johnson County SUD	TX1260018	50,054	This project will involve the use of all available data to inventory and locate lead or potentially lead service lines. Lead service lines will be replaced and the potential lead service lines will be verified and replaced if composed of lead.	PC	$1,500,000.00
256	10.28	Arlington	TX2200001	383,950	The first steps of this program involve data collection and processing, which include assigning pipe installation dates based on multiple historical records, gathering documentation on City ordinances and plumbing codes, custom application configuration for collecting meter GPS coordinates and performing field inspections and developing a web mapping tool for reporting material types to residents as required by the LCR. Should any water service lines be found to require replacement, the City will promptly prepare engineering plans and specifications, obtain the necessary agreements, and bid the project for construction.	PC	$6,438,000.00
257	9.81	Green Valley SUD	TX0940020	39,258	The proposed project includes the identification, inventory, and mapping of GVSUD's existing water system service linework. The project would also include purchasing applicable and effective equipment, as well as design and construction services to replace any identified lead service lines.	PDC	$5,740,800.00
258	9.23	North Richland Hills	TX2200063	71,600	The City will be required to inventory and survey an estimated 23,000 water service lines including the City's and customer's service lines that are 2 inch and smaller. Additionally, there will be professional services required to assist with GIS and Public Notification portions of the project.	PDC	$3,045,000.00
259	7	Austin	TX2270001	1,044,405	This project will replace galvanized services found in Austin Water's system on both the public and private side of the meter.	C	$6,000,000.00

Phase(s): P-Planning, A-Acquisition, D-Design, C-Construction

All financing will be made at the ratio of
51% principal forgiveness and 49% loan/bond.
