TO: ALL POTENTIALLY INTERESTED PARTIES:

RE: City of Cameron (CWSRF Project No. 73727) – Collection System Smoke Test and Lift Station Rehabilitation

The attached document is being provided for your information. This is not a permit application. No action is being requested from your agency and no response is required.

The attached document is an environmental determination issued by the Texas Water Development Board (TWDB) for a proposed project to be funded through the TWDB. Pursuant to the environmental assessment requirements of 31 Texas Administrative Code (TAC) Chapter 375, Subchapter E, the Executive Administrator of the TWDB has determined that the proposed action described in the attached documents may be exempted from formal environmental review requirements. A review by TWDB staff included a consideration of potential environmental impacts and permitting requirements. If there were any concerns about particular regulations or permits, the appropriate regulatory agency would have been contacted for clarification, and this would be described in the attached environmental determination.

Comments regarding this determination may be submitted to the Director of Regional Water Planning and Development, TWDB, P.O. Box 13231, Austin, Texas 78711-3231.

February 26, 2016

CATEGORICAL EXCLUSION

TO ALL INTERESTED AGENCIES AND PUBLIC GROUPS:

In accordance with the Texas Water Development Board (TWDB) environmental review process established at 31 Texas Administrative Code (TAC) Chapter 375, Subchapter E, for projects to be funded through the Clean Water State Revolving Fund (CWSRF) Program and consistent with the National Environmental Policy Act, 42 U.S. Code §4321, et seq., the Executive Administrator of the TWDB has determined that the proposed action identified below may be exempted from formal environmental review requirements:

City of Cameron, Milam County
Collection System Smoke Test and Lift Station Rehabilitation
CWSRF Project No. 73727
Total Estimated TWDB Commitment: \$12,000,000

The City of Cameron (City) is proposing to use a portion of the funding from a \$12,000,000 CWSRF Program loan to: (1) conduct smoke testing within the existing collection system to identify inflow and infiltration within the system; and (2) rehabilitate the City's 15 lift stations to bring them up to Texas Commission on Environmental Quality (TCEQ) standards. In addition, the project will require all necessary appurtenances. All work will be performed on previously disturbed sites.

According to the Texas Historical Commission's Archeological Sites Atlas, there are no previously-recorded significant or potentially significant sites on or adjacent to the proposed project site, nor is the site within a protected area surrounding a historic cemetery, structure, or district.

No waters of the U.S., including wetlands, were identified within the proposed project area. The project will not adversely impact wetlands or waters of the U.S. that are under the jurisdiction of the U.S. Army Corps of Engineers. In addition, construction will occur within previously disturbed areas and is not expected to impact threatened or endangered species.

This decision is allowed because the specified project elements should not entail significant adverse impacts to the quality of the human environment. Documentation supporting this determination is on file at the TWDB.

This determination may be rescinded if it is found that:

- (1) The project no longer meets the requirements for a CE as a result of changes in the project;
- (2) The project involves extraordinary circumstances as defined in 31 TAC Section 375.61; or
- (3) The project may violate or has violated federal, state, local, or tribal laws.

The project also must comply with the following standard emergency conditions:

- Standard emergency condition for the discovery of cultural resources; and,
- Standard emergency condition for the discovery of threatened and endangered species.

Comments regarding this determination may be submitted to the Director of Regional Water Planning and Development, Texas Water Development Board, P.O. Box 13231, Austin, Texas 78711-3231.
