

Acknowledgments

The 2024 State Flood Plan would not have been possible without the time, dedication, guidance, and expertise of numerous volunteers and organizations throughout Texas. The Texas Water Development Board (TWDB) would like to extend sincere gratitude and appreciation to everyone who participated in developing the 15 regional flood plans and this state flood plan, including

- more than 300 regional flood planning group voting members, consultants, and administrative sponsors;
- staff of the TWDB, Texas Parks and Wildlife Department, Texas Department of Agriculture, Texas Commission on Environmental Quality, Texas State Soil and Water Conservation Board, Texas General Land Office, and other state and federal agencies; and
- the individuals and organizations who provided public input throughout the planning process.

The TWDB would also like to thank the State of Texas leadership and the Texas Legislature for their continued support of Texas’ flood planning process.

Primary authors and contributors

Lead authors: Reem Zoun, PE, CFM; Tressa Olsen, CFM; and Matt Nelson

Key contributors: Jake Madewell, CFM; Angela Khong; Saul Nuccitelli, PE, CFM; Erik O’Brian; Lauren Munguia; Elizabeth McCoy; Kaci Woodrome; JoAnn Estrada; and Kendal Kowal

Numerous TWDB staff members contributed to the development of this state flood plan. The TWDB sincerely appreciates them.

Regional flood planning group voting members

Planning group members displayed in alphabetical order by region and name. (designates planning group chair at the time the 2023 amended regional plans were adopted)*

Contents

Executive summary..... 1

I Introduction 15

 1.1 Why plan for floods? 18

 1.2 Flood fundamentals..... 19

 1.2.1 Key terminology 19

 1.2.2 Flood frequency..... 19

 1.2.3 Types of flooding..... 20

 1.2.4 Variability of storm events 21

 1.3 Regional flood planning 23

 1.3.1 Regional flood planning groups 23

 1.3.2 Program requirements..... 24

 1.3.3 Development of the regional flood plans 25

 1.4 State flood plan..... 25

 1.4.1 The Interactive State Flood Plan Viewer 26

 1.4.2 Organization of the state flood plan..... 26

2 Policy recommendations 28

 2.1 TWDB legislative recommendations 30

 2.2 Regional flood planning group legislative recommendations..... 32

 2.3 TWDB general recommendations for floodplain management..... 34

3 Existing infrastructure and key ongoing projects..... 39

 3.1 Inventory and assessment of existing statewide major flood infrastructure 41

 3.1.1 Natural features..... 43

 3.1.2 Constructed major flood infrastructure..... 50

 3.1.3 Summary of functionality and condition of existing flood infrastructure 68

 3.1.4 Dam repair maintenance plan 70

 3.2 Proposed or ongoing flood mitigation projects 71

4 Flood risk..... 75

 4.1 Existing flood risk..... 78

 4.1.1 Existing condition flood hazard..... 78

 4.1.2 Gaps in available flood risk data 83

 4.1.3 Existing condition flood exposure..... 84

 4.1.4 Existing condition vulnerability 100

 4.2 Future condition flood risk..... 104

4.2.1 Future condition flood hazard..... 105

4.2.2 Future condition flood exposure 110

4.2.3 Future condition vulnerability 122

5 Floodplain management practices..... 127

5.1 Assessment of current floodplain management practices128

5.1.1 Entities with flood-related authority 129

5.1.2 Minimum floodplain management regulations 130

5.1.3 Higher floodplain management standards 133

5.1.4 Level of floodplain management practices across Texas 135

5.1.5 Level of enforcement 139

5.1.6 Stormwater or drainage fees..... 142

5.1.7 Addressing future population growth and development..... 144

5.2 Regional flood planning group recommendations for floodplain management practices145

5.2.1 Summaries by region 146

5.3 TWDB recommendations for floodplain management best practices for Texas communities.....148

6 Goals 153

6.1 Regional flood planning goal requirements154

6.2 Summary of regional flood planning goals155

6.3 Key themes of the planning goals157

6.3.1 Conducting flood risk reduction studies 158

6.3.2 Reduce structures and population in the 1 percent (100-year) and 0.2 percent (500-year) annual chance event 159

6.3.3 Implementing flood risk reduction projects 160

6.3.4 Stakeholder and public outreach, education, and training..... 161

6.3.5 Higher floodplain management standards/policies 163

6.3.6 Roadway safety and early warning systems 164

6.3.7 Infrastructure assessment, maintenance, and rehabilitation 167

6.3.8 Nature-based solutions, green infrastructure, and preservation..... 168

6.3.9 Funding..... 169

6.3.10 Reducing flood risk to critical facilities 170

6.3.11 Water supply..... 171

6.3.12 Non-structural flood risk reduction 172

6.3.13 Multiple themes 174

6.4 Residual risk.....174

6.5 Future cycles..... 175

7 Recommended flood risk reduction solutions 176

7.1 Summary of recommended flood risk reduction solutions..... 177

7.2 Identifying and evaluating flood risk reduction solutions..... 181

 7.2.1 Identifying flood risk reduction solutions..... 181

 7.2.2 Screening and evaluating identified flood risk reduction solutions 186

7.3 Recommended flood management evaluations..... 190

7.4 Recommended flood mitigation projects 193

 7.4.1 Recommended structural flood mitigation projects..... 196

 7.4.2 Recommended non-structural flood mitigation projects 199

7.5 Recommended flood management strategies..... 201

7.6 Ranking recommended flood risk reduction solutions 205

 7.6.1 Background..... 205

 7.6.2 Ranking methodology..... 206

 7.6.3 Ranking results..... 209

8 Benefits and impacts of implementing the plan 210

8.1 Benefits of implementing recommended flood risk reduction solutions 211

 8.1.1 Benefits of recommended flood management evaluations..... 211

 8.1.2 Benefits of implementing recommended flood mitigation projects 213

 8.1.3 Benefits of implementing recommended flood management strategies..... 216

8.2 No negative impact..... 218

8.3 Contributions to and impacts on water supply..... 219

8.4 Other impacts of plan implementation..... 220

 8.4.1 Socioeconomic impacts 220

 8.4.2 Environmental impacts..... 220

 8.4.3 Agricultural impacts..... 221

 8.4.4 Recreational resources 221

 8.4.5 Water quality impacts..... 221

 8.4.6 Erosion and sedimentation impacts 222

 8.4.7 Navigational impacts..... 222

8.5 Residual flood risk..... 222

9 Cost and financing needs..... 225

9.1 Costs of implementing the state flood plan..... 226

9.2 Financial assistance required to implement the state flood plan227

9.3 Financing the state flood plan and other flood-related projects230

 9.3.1 Common local sources for funding flood mitigation 231

 9.3.2 TWDB financial assistance 231

9.4 Other flood mitigation funding opportunities233

10 Ongoing efforts, challenges, and looking ahead..... 237

10.1 Ongoing flood efforts238

 10.1.1 Flood mapping, financing, and research efforts 238

 10.1.2 Other coordination, studies, and efforts..... 239

10.2 Challenges242

 10.2.1 Uncertainty associated with future flood risk 243

 10.2.2 Small, remote, and rural communities 243

 10.2.3 Integrating nature-based solutions 244

 10.2.4 Assessing existing major flood infrastructure 245

 10.2.5 Benefit-cost analysis..... 245

 10.2.6 Public outreach and participation..... 246

10.3 Looking ahead.....247

 10.3.1 Identifying and recommending flood risk reduction solutions 247

 10.3.2 Additional assistance for smaller and rural communities 247

 10.3.3 Flood planning and floodplain management awareness..... 248

 10.3.4 A guide to state and local flood control policies..... 248

Glossary..... 250

Appendices..... 259

 Appendix A Regional summaries of future condition analysis methodologies260

 Appendix B Ranked lists of recommended flood risk reduction solutions264

 Appendix C Summary of available key federal and state funding sources265

Table 7-3. Structural flood mitigation projects identified by the 15 planning groups 184

Table 7-4. Non-structural flood mitigation projects identified by the 15 planning groups..... 185

Table 7-5. Flood management strategies identified by the 15 planning groups 186

Table 7-6. Summary of recommended structural flood mitigation projects by flood planning region 197

Table 7-7. Count and approximate total cost of structural flood mitigation projects (FMP) by project type..... 198

Table 7-8. Summary of recommended non-structural flood mitigation projects by flood planning region 200

Table 7-9. Summary of all recommended flood management strategies by category..... 204

Table 7-10. Summary of recommended flood risk reduction solutions and associated eligible costs included as ranked lists in Appendix B..... 205

Table 8-1. Anticipated benefits of flood mitigation project implementation on population and structures currently exposed to 100-year flood risk within project area..... 216

Table 8-2. Anticipated benefits of recommended flood management strategy implementation on existing 100-year flood event exposure..... 217

Table 8-3. Recommended flood risk solutions with anticipated water supply benefit 220

Table 9-1. Estimated cost, reported available funding, and unmet need for all recommended flood risk reduction solutions as identified by the regional flood planning groups..... 228

Table C-1. Summary of available key federal and state funding sources..... 266
