PROGRESS REPORT

To:       Olga Bauer, Work Order Project Manager, Texas Water Development Board
From:     Daniel Lupton, Work Order Project Manager, INTERA
Date:     March 24, 2021
Re:  TWDB Contract Number 2000012442 – Seismic Work Order

Budget and Expenses
This report summarizes project activities and costs for the billing period of February 2021. The total billed expenses through February 28th are $63,407. A budget breakdown by task is provided in Table 1 below. A copy of the progress report will be included in our monthly invoice being sent to the TWDB contracts department. The Work Order Notice of Proceed was signed on November 5th, 2020.

Table 1. Project Budget Versus Expenses

Work Completed
This report summarizes activities on project tasks for February of 2021 and is the third contract progress report. Tasks 1 through 5 were active in the reporting period and had time billed to them. Progress on those tasks will be summarized below.

Task 1 Literature Review
Work on the Literature Review Task involved completing the draft report, submitting to the BRACS Group, and incorporating their edits. This Task and is approximately 99% complete.
Task 2 Seismic Data Vendor Review

Work on Task 2 involved completing the draft Task 2 report and submitting it to the BRACS Group for comments, reviewing the comments and resubmitting. We are approximately 99% complete with this task.

Task 3 Data Quality and Limitations

Activity on this Task was related to presenting our approach and writing/submitting the report. We are approximately 85% complete with this task.

Task 4 Methodology for Application of Seismic data on Brackish Aquifers

Activity on this Task was primarily planning related and centered on outlining a report format for summarizing a methodology for application of seismic data to brackish aquifers. We are approximately 20% complete with this task.

Task 5 Application to an Aquifer Study

Activity on this Task involved continued review of the Stratton dataset and available BRACS Gulf Coast data. The Stratton dataset has been sent off to the processing company Tricon. We are working with them to develop a detailed plan of action for the processing of the Stratton 3D seismic dataset. We are currently 30% complete with this task.

Problems Encountered to Date

To date no problems or issues have been encountered affecting execution of the scope of work.
