

Groundwater Management Area 10 – Desired Future Conditions

Aquifer	Desired Future Condition (DFC)	Date DFC Adopted
Freshwater Edwards, Northern Subdivision	Springflow at Barton Springs during average recharge conditions shall be no less than 49.7 cfs averaged over an 84 month (7-year) period	6/26/2017
	Springflow of Barton Springs during extreme drought conditions, including those as severe as a recurrence of the 1950s drought of record, shall be no less than 6.5 cfs average on a monthly basis	
Saline Edwards, Northern Subdivision	No more than 75 feet of regional average potentiometric surface drawdown due to pumping when compared to pre-development conditions	6/26/2017
Freshwater Edwards, Western Subdivision	The water level in well 70-38-902 shall not fall below 1,184 ft mean sea level (relevant only in Kinney County)	6/26/2017
Trinity	Outside of Uvalde and Bexar counties: Average regional well drawdown not exceeding 25 feet during average recharge conditions (including exempt and non-exempt use)	6/26/2017
	In Uvalde County: No (zero) regional well drawdown (including exempt and non-exempt use)	
Buda Limestone	No drawdown (including exempt and non-exempt use) (relevant only in Uvalde County)	6/26/2017
Austin Chalk	No drawdown (including exempt and non-exempt use) (relevant only in Uvalde County)	6/26/2017
Leona Gravel	No drawdown (including exempt and non-exempt use) (relevant only in Uvalde County)	6/26/2017
