NECHES AND TRINITY VALLEYS GROUNDWATER CONSERVATION
DISTRICT MISSION STATEMENT

Neches and Trinity Valleys Groundwater Conservation District (District) will strive for the conservation, preservation, and prevention of waste of groundwater reservoirs over which the District has jurisdiction. The District will implement water conservation and management strategies to prevent the extreme decline of water levels for the benefit of all water users, water rights owners, the economy, or citizens, and the environment of the territory inside the District.

TIME PERIOD FOR THIS PLAN

This District management plan becomes effective November 6, 2003, following adoption by the District Board of Directors and certification by the Texas Water Development Board (TWDB) affirming the plan is administratively complete. This District management plan will remain in effect for a period of ten (10) years as a minimum planning period, or until a revised or amended plan may be certified, whichever comes first.

STATEMENT OF GUIDING PRINCIPLES

The District recognizes that the groundwater resources of the region are of vital importance to the continued vitality of the citizens, economy, and environment within the District. The preservation of the groundwater resources can be managed and protected in the most prudent and cost effective manner through the local regulation of production as effected by the District’s well permitting and well spacing rules. This management plan is intended as a tool to direct the efforts of those individuals charged with the responsibility for the managing and execution of District activities.

GENERAL DESCRIPTION

In 2001 the Texas Legislature passed Senate Bill 1221 which authorized the creation of the Neches and Trinity Valleys Groundwater Conservation District (referred to as the “District”) as a governmental agency to regulate groundwater in order to protect it from overuse and wasteful use. This was approved by the voters in a general election in November 2001. The District includes all of Cherokee and Henderson Counties. All of Anderson County is also included except for the part in the existing Anderson County Underground Water Conservation District.

The District has an unpaid Board of Directors. The Commissioners' Court of Anderson, Henderson, and Cherokee Counties have each appointed two directors, one to represent rural water, utilities, and small municipal water supply interests; and one to represent agricultural, industrial, and landowner interests. The cities of Athens, Palestine, and Jacksonville share a seventh Director on a rotating basis.

The District is prohibited by legislation from levying taxes. It also may not exercise the power of eminent domain. It also may not issue or sell bonds in the name of the District.
GROUNDWATER RESOURCES

The Carizo-Wilcox aquifer is the primary source of groundwater within the District. The Queen City and Sparta are other minor aquifers with pumpage for use the District. Within the District, groundwater in the aquifer is under water table or unconfined conditions. The depth of occurrence of the aquifer sands are highly variable within the district. Groundwater represents 32 percent of the water source within the District with surface water being the major remaining source. The estimated water pumpage during 1999 by aquifer was 90.4% from Carizo-Wilcox; 4% from Queen City; 5.4% from Sparta; and the balance from undifferentiated aquifers.

Total water use within the District was estimated to be 49,222 acre feet in 2000 and is projected to increase to 73,215 acre feet by 2050. The major increase in demand is expected to be for steam generation of electrical power (from 9,000 acre feet in 2000 to 35,209 acre feet in 2050, a 291% increase.) Projected groundwater availability within the District are estimated (Source: Water for Texas - 2002. Texas Water Development Board) in acre feet to be:

<td></td>
</tr>
<tr>
<td><strong>ALL</strong></td>
<td>8,744</td>
<td>27,732</td>
<td>1,856</td>
<td></td>
</tr>
</tbody>
</table>

Note: The numbers are rounded to the nearest 1 acre-foot.
The District will consider methods to increase the rate of recharge. Methods to address increasing the recharge rate include supporting development of Lake East Tex or other surface water projects on appropriate streams for aquifer recharge and cooperating with studies on efforts by others to design or implement other artificial means of aquifer recharge.

**GROUNDWATER USE**

The TWDB has published groundwater annual water use survey data in "Water for Texas Today and Tomorrow", 1997. The water data in this plan have been extracted from that TWDB document and will be used until alternatives may be generated. The estimated groundwater pumpage (acre feet) within the District for 1999 (Source: Water for Texas - 2002, Texas Water Development Board) was:

**PROJECTED WATER DEMAND WITHIN THE DISTRICT**

The TWDB has published projected water demands in “Water for Texas Today and Tomorrow”, 1997. The water demand estimates in this plan have been extracted from that TWDB document and will be used until alternatives may be generated. With normal rainfall and the advent of expected conservation practices, total water demands within the District projected to be used within the District on an annual basis 2000 to 2050 in acre feet (Source: Water for Texas - 2002, Texas Water Development Board) is as follows:

<table>
<thead>
<tr>
<th></th>
<th>2000</th>

MANAGEMENT OF GROUNDWATER SUPPLIES

The District will manage the supply of groundwater within the District in order to conserve the resource while seeking to maintain the economic viability of all resource user groups, public and private. In consideration of the economic and cultural activities occurring within the District, the District will identify and engage in such activities and practices that, if implemented, would result in a reduction of groundwater use. A monitor well observation network may be established and maintained in order to evaluate changing conditions of groundwater supplies (aquifer water table levels) within the District. The District will make a regular assessment of water supply and groundwater storage conditions and will report those conditions to the Board and to the public. The District will undertake as necessary and cooperate with investigations of the groundwater resources within the District and will make the results of investigations available to the public upon adoption by the Board.

The District will enforce the terms and conditions of permits and rules of the District. The District will adopt rules, and amend rules as necessary, to regulate groundwater withdrawals by means of well spacing, well permits, and production limits. The District may deny a well permit or limit groundwater withdrawals in accordance with the guidelines stated in the rules of the District and drought contingency plan. In making a determination to deny a permit or limit groundwater withdrawals, the District will consider the public benefit against individual hardship after considering all appropriate testimony.

In pursuit of the District's mission of protecting the groundwater resources, the District may require reduction of groundwater withdrawals to amounts which will not cause harm to the aquifer. To achieve this purpose, the District may, at the Board's discretion, amend or revoke any permits after notice and hearing. The determination to seek the amendment or revocation of a permit by the District will be based on aquifer conditions observed by the District. The District will enforce the terms and conditions of permits and the rules of the District by enjoining the permit holder in a court of competent jurisdiction as provided for in Texas Water Code (TWC) 36.102.

The relevant factors to be considered in making a determination to deny a permit or limit groundwater withdrawals will include:

1) The purpose of the rules of the District.
2) The equitable distribution of the resource.
3) The economic hardship resulting from grant or denial of a permit or the terms prescribed by the permit.
4) Other factors that may be specific to the application.
DROUGHT CONTINGENCY PLAN

A contingency plan to cope with the effects of water supply shortages due to climatic or other conditions will be developed by the District and will be adopted by the Board after notice and hearing. In developing the contingency plan, the District will consider the economic effects of conservation measures upon all water resource user groups, the local implications of the degree and effect of changes in water storage conditions, the unique hydro-geologic conditions of the aquifer and the appropriate conditions under which to implement the contingency plan.

ACTIONS, PROCEDURES, PERFORMANCE, AND AVOIDANCE FOR IMPLEMENTATION OF DISTRICT MANAGEMENT PLAN AND FUTURE BOARD REVIEW

The District will implement the provisions of this plan and will utilize the provisions of the plan as a guidepost for determining the direction of priority for District activities. Operations, agreements, and planning efforts of the District will be consistent with this plan. The District will seek the cooperation of all interested parties in the implementation of this plan. The plan is for a ten-year planning period; however, the Board may review the plan annually or as desired and re-adopt the plan with or without revisions at least every five years.

REGIONAL WATER PLAN

This management plan has been adopted after the development of the regional management plan for Region 11 (East Texas RWP Group, Region 11). As required by TWC 36.1071(B) this management plan and any amendments thereon shall be consistent with the certified regional water plan. After the time a regional water plan has been adopted, the District shall address water supply needs in a manner that is not in conflict with the appropriate approved regional water plan which must be approved under Section 16.053. Senate Bill 1 intended for water management to be a bottom up approach. Therefore, the regional planning group must consider this local certified NTVGCD Management Plan in the development of the regional water plan to meet the intent of Senate Bill 1 and, consequently, result in a regional management plan which is consistent with this local management plan, resulting in the protection of the local control of groundwater management by the local people.
GOALS, MANAGEMENT OBJECTIVES, PERFORMANCE STANDARDS, AND METHODOLOGY TO EVALUATE PROGRESS

**Goal 1.0  Providing for the Most Efficient Use of Groundwater Within the District**

**Management Objective**

1A. Each year the District will provide informative speakers to schools, civic groups, social clubs, and other organizations for presentations to inform a minimum of 50 citizens on the activities and programs, the geology and hydrology of groundwater, and the principles of water conservation relating to the best management practices for the efficient use of groundwater.

**Performance Standard**

1A. Number of citizens in attendance at District presentations concerning the principals of water conservation relating to the best practices for the efficient use of groundwater each year.

**Management Objective**

1B. Each year, on four or more occasions, the District will disseminate educational information relating to the most efficient use of groundwater resources.

**Performance Standard**

1B. Number of occasions, annually, the District disseminated educational information relating to the most efficient use of groundwater resources.

**Methodology**

Annually, the District will prepare and present a report to the Board on District presentations in regards to achieving Goal 1. The report will include the number of instances each activity was engaged in during the year. The report will be maintained on file in the District Office.
**Goal 2.0 Controlling and preventing Waste of Groundwater**

**Management Objective**

2A. Each year the District will enforce District spacing rules requiring the permitting of all new non-exempt wells to prevent the waste of groundwater. The District will report to the Board intent to issue permits for all permit application requests that meet the District’s rules for spacing within 90 days of the receipt of the completed application.

**Performance Standard**

1. Number of permits issued by the District for new wells in compliance with spacing limits, each year.
2. Percent of completed applications reported to the Board within 90 days of receipt of application.

**Management Objective**

2B. The District will maintain procedures for the receipt of well permit applications. If no applications are received by the District during a reporting period, this will annually be reported to the Board.

**Performance Standard**

The procedures for the receipt of well permit applications will be maintained in District files. An annual report will be made by the District to the Board if no well permit applications are filed and completed during the year.

**Methodology**

Annually, the District will prepare and present a report to the Board on the number of permit applications in compliance with spacing limits and the percent of completed applications reported to the Board within 90 days. The report will be maintained on file in the District Office.

**Goal 3.0 Controlling and Preventing Subsidence**

THIS GOAL IS NOT APPLICABLE TO THE DISTRICT
Goal 4.0 Addressing Conjunctive Surface Water Management Issues

1a. The District will coordinate conjunctive surface water issues with the Trinity, Angelina and Neches River, and Upper Neches River Authorities through the East Texas Region Water Planning Group, Region I, by inviting officials from the Planning Group to attend District meeting at least once a year.

Performance Standard

The District will invite Planning Group officials to District meetings at least once a year.

Methodology

Annually, the District will prepare a report for the Board on actions taken to invite Planning Group officials to District meetings. The District will maintain copies or records of contacts in the District office files.

Goal 5.0 Natural Resource Issues that Impact the Use and Availability of Groundwater and are Impacted by the Use of Groundwater

THIS GOAL IS NOT APPLICABLE TO THE DISTRICT

Goal 6.0 Addressing Drought Conditions

Management Objective

A contingency plan to cope with the effects of water supply shortages due to climatic or other conditions will be developed by the District and will be adopted by the Board after notice and hearing. In developing the contingency plan, the District will consider the economic effects of conservation measures upon all water resource user groups, the local implications of the degree and effect of changes in water storage conditions, the unique hydro-geologic conditions of the aquifer and the appropriate conditions under which to implement the contingency plan.

Performance Standard

A drought contingency plan will be developed by the District and approved by the Board. The plan will be reviewed by the Board and revised as necessary every year.

Methodology

The drought contingency plan will be developed by the District and approved by the Board. The plan and revisions will be maintained in the District office. The Board will record result of the annual review in Board records and maintain the report in the District office.
Goal 7.0 Addressing Conservation

Management Objective

Each year, or four or more occasions, the District will disseminate educational information relating to the conservation practices for the efficient use of water resources.

Performance Standard

Number of occasions, annually, the District disseminated educational information relating to the conservation practices for the efficient use of water resources.

Methodology

Annually, the District will prepare and present a report to the Board on District performance in meeting this goal. The report will include the number of instances each activity was engaged in during the year. The report will be maintained on file in the District Office.
June 17, 2004

Rima Petrossian
Manager, groundwater Technical Assistance Section
Texas Water Development Board
P.O. Box 13231
1700 North Congress Avenue
Austin, Texas 78711-3231

Dear Ms. Petrossian:

Enclosed for your review is the Neches and Trinity Valleys Groundwater Conservation District Management Plan as re-adopted by the Board of Directors resolution on June 17, 2004, following public notice and a public hearing. A signed copy of the Resolution is enclosed. No changes were made to the plan. This action was in response to your e-mail correspondence to Janet Byrd, NTVGCD Manager.

As noted previously, the plan was originally approved by the Board on June 11, 2003 pending receipt of the recharge data that was to be made available by TWBD per earlier conservations with you and Randy Washington. When that data was made available it was inserted in the plan and the amended plan was adopted by the Board on December 17, 2003. No further changes have been made to the plan.

It is our understanding that submission of the Resolution fulfills all of the information requested by you for this plan.

If you have any questions, please contact me at 903-549-2907 or e-mail at royrodgerscpa@aol.com.

Sincerely,

Roy J. Rodgers
NTVGCD Board Secretary

Steve Musick, Leader
Groundwater Planning and Assessment Team
MC-147
Texas Commission on Environmental Quality
P.O. Box 13087
Austin, Texas 78711-3087

Dear Mr. Musick:

In response to your letter of June 2, 2004 concerning the Neches and Trinity Valleys Groundwater Conservation District Management Plan, we are enclosing a copy of the Plan and Board Resolution dated June 17, 2004, re-adopting the plan following public notice and hearing. Also enclosed is copies of correspondence with the TWBD staff concerning this plan.

We believe we have met all TWDB requirements concerning this plan in a timely manner.

The plan was originally approved by the Board on June 11, 2003 pending receipt of the recharge data that was to be made available by TWBD. When that data was finally made available it was inserted in the plan and the amended plan was adopted by the Board on December 17, 2003. No further changes have been made to the plan.

It is our understanding that submission of the Resolution fulfills all of the information requested by TWDB for this plan.

If you have any questions, please contact me at 903-549-2907 or e-mail at royrodgerscpa@aol.com.

Sincerely,

[Signature]

Roy J. Rodgers
NTVGCD Board Secretary

COPY
RESOLUTION

BE IT RESOLVED by the Board of Directors of the Neches and Trinity Valleys Groundwater Conservation District that:

Having considered the requirements of Texas Water Code, Section 36.1071 and in the interest of complying therewith, the Board re-approves and re-adopts the District's Management Plan as amended to incorporate information necessary to satisfy the requirements of Texas Water Code, Section 36.1071(e)(3).

SIGNED this the 17th day of June, 2004.

Sue Harris, President

ATTEST:

Ray J. Rakef
Secretary
RESOLUTION

BE IT RESOLVED by the Board of Directors of the Neches and Trinity Valleys Groundwater Conservation District that:

Having considered the requirements of Texas Water Code, Section 36.1071 and in the interest of complying therewith, the Board re-approves and re-adopts the District’s Management Plan as amended to incorporate information necessary to satisfy the requirements of Texas Water Code, Section 36.1071(e)(3).

BEFORE ME, the undersigned authority, personally appeared this day, Bill Morgan known
to me to be the Publisher of the Athens Daily Review/Cedar Creek Pilot, who, upon oath,
deposes and says that the Public Notice was published in the Athens Daily Review as
requested. Said publication appearing on:
the 11th day of June 2004

Signed ___________________________________
Bill Morgan, Publisher, Athens Daily Review/Cedar Creek Pilot

Subscribed and sworn to me this 17th, day of June, 2004.

Anita A. Alexander, Notary Public, Henderson County, State of Texas
The Neches & Trinity Valleys Groundwater Conservation District propose to amend its Management Plan to incorporate groundwater and recharge data consistent with the requirements of Section 36:1071 of the Texas Water Code. The District is responsible for regulating groundwater within all of Cherokee and Henderson Counties and the portion of Anderson County not within the Anderson Underground Water Conservation District. A hearing regarding the proposed amendment to the Management Plan will be held on Thursday, June 17, 2004, at 1:30 p.m., at the offices of the West Jacksonville Water Supply Corporation, Jacksonville, Texas. Copies of the proposed amendment can be obtained at the offices of the West Jacksonville Wa-
County of Cherokee
State of Texas

Before the undersigned, a notary public, in and for Cherokee County, Texas, on this day appeared Amy Miller known to me, who being by first duly sworn, deposed this oath and is the Publisher of the Jacksonville Daily Progress, a newspaper of general publication of more than one year, that the attached notice was published in said newspaper on ___

Publisher

Sworn and subscribed before me this ___ day of June A.D. 2004
By Amy Miller.

Witness my hand and official seal.

Notary Public in and for Cherokee County, Texas
NOTICE TO WEST JACKSONVILLE WATER SUPPLY CORPORATION MEMBERS

Your complete consumer confidence report is now available at the West Jacksonville Water Supply Corporation office located on CR 3419 in Cove Springs between the hours of 8am and 1pm Monday thru Friday. Please call (903) 586-7063 with any questions.

The Neches & Trinity Valleys Groundwater Conservation District proposes to amend its Management Plan to incorporate groundwater recharge data consistent with the requirements of Section 36.1071 of the Texas Water Code. The District is responsible for regulating groundwater within all of Cherokee and Henderson Counties and the portion of Anderson County not within the Anderson Underground Water Conservation District. A hearing regarding the proposed amendment to the Management Plan will be held on Thursday, June 17, 2004, at 1:30 pm, at the offices of West Jacksonville Water Supply Corporation, Jacksonville, Texas. Copies of the proposed amendment can be obtained at the offices of the West Jacksonville Water Supply Corporation, P.O. Box 1245, Jacksonville, Texas 75766 or by contacting Ms. Janet Byrd at (903) 586-7063. Monday - Friday from 9:00 a.m. to 1:00 p.m.
