

TWDB Water Utilities Technical Assistance Program Contractor Solicitation and Participant Application Period Now Open

Contractor applications due December 9

The Water Utilities Technical Assistance Program (WUTAP) is offered by the Texas Water Development Board (TWDB) to eligible water and wastewater systems to build their managerial and technical capabilities relating to applying for financial assistance from TWDB. Systems selected to participate will be matched with a pre-qualified contractor that will help create or update financial and managerial processes and procedures and other tools to put the system in a good position to apply for financial assistance for water or wastewater capital improvement projects.

Water and wastewater systems interested in participating in WUTAP must submit an application to the TWDB using this [Microsoft Form](#) or by emailing a PDF of the application to WUTAP@twdb.texas.gov. The PDF of the application can be found on the [WUTAP webpage](#).

Firms interested in being considered as contractors for the WUTAP projects must reply to the Request for Qualifications (RFQ) on the [Electronic State Business Daily website](#) **by 5:00 PM CST on December 9, 2025.**

For more information, visit the TWDB's [WUTAP webpage](#). Please contact WUTAP@twdb.texas.gov with any questions.
