

Mr. Price recently retired as the U.S. Bureau of Reclamation's Advanced Water Treatment Research Coordinator in the Office of Research and Development. Previously, he was the Water Treatment Engineering and Research Group Manager and before that a Research Chemical Engineer. He coordinated the R&D and O&M for Reclamation's Brackish Groundwater National Desalination Research Facility in Alamogordo, New Mexico; oversaw the external Desalination and Water Purification Research program; and drafted an advanced water treatment strategy across Reclamation's projects and programs. He also oversaw a \$5,000,000 cooperative agreement with New Mexico State University for water treatment research, education, and outreach; and was responsible for cooperative agreements with the WateReuse Research Foundation, which funded a \$42,000,000 research portfolio.

He has served on the WateReuse Research Foundation's Research Advisory Committee, the National Water Research Institute's Research Advisory Board, on the steering committee for the WHO Guidance Document on Desalination for a Safe Water Supply, and on the boards of the American Membrane Technology Association and the International Desalination Association. He was the U.S. government's Country Technical Representative to the Middle East Desalination Research Center and worked with MEDRC since its inception in 1996. He has worked with European, Middle Eastern, North African, and Asian countries in desalination and reuse and is one of the two primary authors of the Desalination and Water Purification Technology Roadmap. He currently serves as a member of the Science Advisory Board for the NSF Engineering Research Center for Re-inventing the Nation's Urban Water Infrastructure.

He graduated from the College of Idaho with a BS in Zoology, from Columbia University with an MS in Chemical Engineering, and from the University of Denver with an MBA in Finance.
