REVISED

Veteran's Preference

Veterans, Reservists or Guardsmen with an MOS or additional duties that fall in the fields of 25B – Information Technology Specialist, IT – Information Systems Technician, 26 – Information Resources Management, 3DOX4 Computer Systems Programming or other related fields pertaining to the minimum experience requirements may meet the minimum qualifications for this position and are highly encouraged to apply.

Additional Military Crosswalk information can be accessed at
http://www.hr.sao.texas.gov/Compensation/MilitaryCrosswalk/MOSC_InformationTechnology.pdf).

Job Description Summary

Performs complex (journey-level) to highly complex (senior-level) computer programming and software development work. Work involves assisting the project manager in coordinating programming projects and developing and maintaining existing and new internal software and web applications used by TWDB; planning and analyzing user requirements, procedures and problems to automate processes and to improve existing systems; and analyzing and proposing computer applications and providing technical assistance. Demonstrates superior technical ability to create complex SQL queries, views, and stored procedures. Creates informative and aesthetically pleasing reports in Microsoft SQL Server Reporting Services using SQL queries, stored procedures, parameters, grouping, and sub-reports. May train others. Works under general to limited supervision; with moderate to considerable latitude for the use of initiative and independent judgment. Reports to the Manager of the Application Development Department.

Essential Job Functions

- Codes, tests, and debugs computer application programs and/or geospatial viewers as outlined by technical and functional requirements.
- Assists in the identification and scheduling of project deliverables, milestones, and required tasks.
- Generates project requirements and provides effort estimates and resource requirements.
- Develops, analyzes, and revises system design procedures, program code, test procedures, and quality standards.
- Codes, tests, and debugs computer application programs as outlined by technical and functional requirements.
- Uses current software design and development methodologies and techniques to ensure quality and maintainability of applications and systems.
- Prepares unit test plans and test data for the applications being modified or created.
- Develops diagrams and flowcharts to represent operations and data flow for applications.
- Works with systems analyst to create technical documentation for applications.

Female and minority applicants are encouraged to apply.

Males born on or after January 1, 1960, will be required to present proof of Selective Service registration on the first day of employment or proof of exemption from Selective Service registration requirement. All offers of employment are contingent upon the candidate having legal authorization to work in the United States. Failure to present such authorization within the time specified by the U.S. Department of Labor will result in the offer being rescinded. Candidates must be eligible to work in the United States without requiring sponsorship. Only applicants interviewed will be notified of their selection or non-selection. Resumes will not be accepted in place of a completed State of Texas application unless indicated.

HR-002 (Non-Supervisory)
Revised 12/18/2018

The Texas Water Development Board does not discriminate on basis of race, color, national origin, sex, religion, age, or disability in employment or provision of services, programs, or activities. Please visit TWDB Career Page: <http://www.twdb.texas.gov/jobs/> for more information.

TWDB participates in E-Verify! Information from each new employee's Form I-9 will be provided to the Social Security Administration (SSA) and, if necessary, the Department of Homeland Security (DHS) to confirm work authorization.

Job Vacancy Notice (cont.)
