COLORADO COUNTY
WITH
WATER WELL NUMBERING GRID

Explanation of Water Well Numbering System

LOCATION OF GRID CELL
78 - 1-degree quadrangle
28 - 7 1/2 minute quadrangle
5 - 2 1/2 minute quadrangle

WELL-NUMBERING SYSTEM
To facilitate the location of wells and avoid duplication of well numbers, a numbering system is used throughout the state. This system is based on the division of the state into a grid of 1-degree quadrangles formed by degree of latitude and longitude. Each 1-degree quadrangle is sub-divided into the following:

- The 1 degree quadrangle is divided into four 1 1/2-degree quadrangles, each of which is divided into 1 1/2 minute quadrangles.
- Each 1 1/2 degree quadrangle is divided into four 1 1/2 minute quadrangles (1 degree quadrangle, 2 1/2 degree quadrangle and 2 1/2 minute quadrangle

- The 1 1/2 minute quadrangle is divided into four 7 1/2 minute quadrangles.

Each 7 1/2 minute quadrangle is numbered and identified by the following:

- The first and second digits identify the degree and minute quadrangle.
- The third digit identifies the 1 1/2 degree quadrangle.
- The fourth digit identifies the 7 1/2 minute quadrangle, and the fifth digit identifies the 1 degree quadrangle.

*All mapped data (except grid) is from TIGER 2000 Census data.
