The first 2 digits of a well number identify the State and the 2 1/2-minute quadrangles within each State has been assigned an identification number. Each 1-degree quadrangle in the Texas is further divided into nine 2 1/2-minute quadrangles. Each 1-degree quadrangle is divided into 9 latitudes and longitude and the repeated division shown on the following diagram. To facilitate the location of wells and avoid confusion, this map is color-coded as follows:

- Green = High potential for water
- Yellow = Low potential for water
- Red = No information available

*All mapped data (except grid) is from TIGER 2000 Census data.

Map created by Mark Hayes, May 17, 2004
