WATER WELL NUMBERING GRID

Explanation of Water Well Numbering System

LOCATION OF GRID CELL

Tw - 1 degree quadrangle
Th - 1 1/2 minute quadrangle
S - 5 1/2 minute quadrangle

WELL-NUMBERING SYSTEM

To facilitate the location of wells and assist distribution of well numbers, a coordinate well-numbering system based on division of the State into a grid of 1-degree quadrangles is used. Each 1-degree quadrangle is divided into four 1 1/2-minute quadrangles, each of which is divided into two 5 1/2-minute quadrangles. Each 1 1/2-minute quadrangle is further divided into four 7 1/2-minute quadrangles. The 7 1/2-minute quadrangles are numbered sequentially from the southwest corner of each 5 1/2-minute quadrangle and all 7 1/2-minute quadrangles within a 1 1/2-minute quadrangle. The first digit identifies the 1-degree quadrangle; the second and third digits, the 1 1/2-minute quadrangle; and the fifth digit, the 7 1/2-minute quadrangle.
