LOCATION OF GRID CELL
100 1-degree quadrangle
20 1/2-minute quadrangle
5 1/10-minute quadrangle

WELL-NUMBERING SYSTEM
To facilitate the location of wells and water wells, a water well numbering system has been adopted. It is based on division of the State into a grid of 1-degree quadrangles and the further division of these quadrangles into squares as shown on the following map. The square grid is divided into 1/10-minute quadrangles and 1/2-minute quadrangles, the latter of which is further sub-divided into 1/10-minute quadrangles. The 1/2-minute quadrangles are divided into 1-degree quadrangles. The 5 1/2-minute quadrangles with north, south, east, and west edges on these boundaries are designated as 1-degree quadrangles, the third and fourth digits of the 1-degree quadrangle number representing the 5 1/2-minute quadrangle number as shown on the following map.
