JACKSON COUNTY WITH WATER WELL NUMBERING GRID

Explanation of Water Well Numbering System

LOCATION OF GRID CELL
76 W 4
- 76 - 1 degree quadrangle
- 7 1/2 minute quadrangle
- 1/4 degree quadrangle
- 2 1/4 minute quadrangle
- 1/8 degree quadrangle

WELL-RUNBERING SYSTEM
To facilitate the location of wells and to assist in the evaluation of yield, water level, depth to water table, etc., the county is divided into 5 degree, 7 1/2 minute, and 1/4 degree quadrangles. Each well location is shown within the smallest 7 1/2 minute quadrangle. The 7 1/2 minute quadrangle is divided into 4 1/4 degree quadrangles. The next level of detail is the 1/4 degree quadrangle, divided into 16 1/8 degree quadrangles, and so on. The 1/8 degree quadrangle is divided into 36 1/16 degree quadrangles. The first digit of the well number identify the 7 1/2 minute quadrangle, the second and third digits identify the 1/4 degree quadrangle, and the fourth and fifth digits identify the 1/8 degree quadrangle.
