WITH
WATER WELL NUMBERING GRID

**Explanation of Water Well Numbering System**

- **LOCATION OF GRID CELL:**
  - 78 - 1 degree quadrangle
  - 28 - 1/2 minute quadrangle
  - 2 1/2 minute quadrangles
- **WELL NUMBERING SYSTEM:**
  - To facilitate the location of wells and avoid duplication of grid numbers, a well numbering system has been adopted. It is based on the U.S. Bureau of Land Management grid system and uses the following specific instructions on the upper left-hand corner of the 1-degree quadrangles.
  - Each 1-degree quadrangle is divided into 36 sections, numbered consecutively from left to right, beginning in the upper left-hand corner of the 1-degree quadrangle.
  - Grid cells are colored orange and numbered from 1 to 36, beginning with the upper left-hand corner.
  - The first digit of a well section identifies the 1-degree quadrangle, and the second digit identifies the 1/2-degree quadrangle.

**Disclaimer:**

This map was generated by the Texas Water Development Board using GIS (Geographical Information Systems) software.
