LIBERTY COUNTY WITH WATER WELL NUMBERING GRID

Explanation of Water Well Numbering System

LOCATION OF GRID CELL

1  1 degree quadrangle
50  1/4 degree quadrangle
2  1/2 minute quadrangle
8  1/10 minute quadrangle

WELL NUMBERING SYSTEM

To avoid confusion and duplication of well names, a system of naming wells is used. A well is identified by a letter and numeral combination that is unique in the given seven number sequence. Each 1 degree quadrangle has its own well numbering plan. The letters A through Z identify the quadrangle. The 1 degree quadrangles located by degrees of latitude and longitude and the quadrangle system of seven number identification are shown on the following diagram.

A well may be located anywhere in a 1/4 degree quadrangle by knowing the number of the well within that 1/4 degree quadrangle. A well may be located anywhere in a 1/2 minute quadrangle by knowing the number of the well within that 1/2 minute quadrangle. The seven number identification of a well is the first two letters of the quadrangle, the first and last digits of the 1 degree quadrangle, and the eight digit number that identifies the 1/2 minute quadrangle.
