Explanation of Water Well Numbering System

LOCATION OF GRID CELL

90-90-90-90-90-90

16 - 1 degree quadrangle

9 - 2 1/2 minute quadrangle

WELL-NUMBERING SYSTEM

To facilitate the location of water and wastewater systems within the state, the water well numbering system is based on divisions of the state into a grid of square mileage quadrangles. The quadrangles are designated by the upper left-hand corner of the 1-degree quadrangle they represent. The first 2 digits of a well number identify the 1-degree quadrangle. The first 3 digits together identify the 2 1/2-minute quadrangle. The last 2 digits identify the 1-Degree Quadrangles

1-Degree Quadrangles

2 1/2 Minute Quadrangles

6-2 1/2 minute quadrangles within each 1-degree quadrangle are similarly numbered.

The 1 1/2 - 2 1/2 minute quadrangle are similarly numbered.

All mapped data (except grid) is from TIGER 2000 Census data.
