This map was generated by the Texas Water Development Board using GIS (Geographical Information Systems). The data used in this map were made available by the Texas General Land Office and the Texas Water Development Board. The map displays the water well numbering system used in Presidio County, Texas. The grid system is used to locate water wells and their water quality data. The map includes the following features:

- 1-Degree Quadrangles
- 7.5-Minute Quadrangles
- Water Well Numbering System

**Explanation of Water Well Numbering System**

The water well numbering system is used to locate water wells in Presidio County, Texas. The system uses a grid of 1-degree and 7.5-minute quadrangles to assign unique numbers to each water well. The grid system helps in organizing and tracking water well data, making it easier for water resource management and monitoring.

**Location of Grid Cell**

- 78 - 7-degree quadrangle
- 38 - 7.5-minute quadrangle
- 2 - 1/2-minute quadrangle

**Well-Numbering System**

- Includes the location of wells and provides a systematic method for assigning water well numbers. The system uses a combination of the upper left-hand corner of the 1-degree quadrangle and the upper right-hand corner of the 7.5-minute quadrangle, followed by a number sequence to uniquely identify each well.

**7 1/2-Minute Quadrangles**

- The 7.5-minute quadrangles are numbered similarly to the 1-degree quadrangles. Each 1-degree quadrangle contains 4 7.5-minute quadrangles, and the numbering scheme for the 7.5-minute quadrangles follows the same principles as the 1-degree quadrangles.
