Subject: Marvin Nichols

I am opposed to the development of Marvin Nichols as a water source for Texas because there is a feasible alternative. Region D has proposed raising the level of Lake Wright Patman to provide an increase in water supply for northeast Texas and future needs of Region C. This would also prevent the removal of valuable forests which are important in our economy in northeast Texas. Raising the level of Lake Wright Patman would not take in private land as the Army Corp of Engineers has 265 m.s.l. available for this expansion.

Sincerely,

James & Carolyn Turchi
