Subject: Against proposed Marvin Nichols Lake

Dear SirL

Please consider the removal of Marvin Nichols Lake from the 2007 Draft water plan. It is not consistent with protecting the agricultural, natural, and water resources of Northeast Texas and would do great damage to the timber industry and other aspects of the economy.

According to the figures in the draft State Water Plan Marvin Nichols isn't needed to meet future water demands when Lake Texoma, Wright Patman and Toledo Bend have more than ample water that is being unused.

Thank You,

Al Capizzo
Troup, Tx
