Subject: Texas Water Development Board - Marvin Nichols Lake Proposal

Dear Mr. Roberts,

I am requesting that the Marvin Nichols Lake Project be removed from the State Water Plan. This proposal is not consistent with protecting the agricultural, natural, and water resources of Northeast Texas and, in my opinion, would do great damage to the timber industry and other aspects of the economy. According to the figures in the draft State Water Plan Marvin Nichols is not required to meet future water demands when Lake Texoma, Wright Patman and Toledo Bend have more than ample water that is being unused. It is my hope that you will drop the Marvin Nichols Lake Proposal from the State Water Plan.

Thank you,
Kathleen E. Brown
