We as land owners in Northeast Texas, Red River County oppose the plan to take millions of acres of land for the purpose of water for the Dallas Fort Worth area. This lake would destroy our way of life in this rural, farming, timber, cattle community. There would be farms lost that has been in the same family for hundreds of years, ways of life would cease to exist. The amount of land and tax revenue taken out of the county would make it impossible for the county to still exist. Even those who did not lose their homes to the lake would lose due the vast amount of tax increase. Thank you, please vote NO to Marvin Nichols.
