Subject: Comments on State Water Plan

Dear Mr. Roberts, I am deeply concerned about the State Water Plan. I am concerned because it includes too many new water projects. The worst examples are the planned new reservoirs in the North East of the State. We do not need these and the people of that region do not want them in their region. The Plan also does not do near enough for Water Conservation. There is a great deal we can do to conserve water that this Plan does not do. Please take it back to the drawing board and plan for the future health and well being. Thank you, Donna Hoffman, 1500 Gregory, Austin, TX 78702
