Dear Members of the Board,

I would like to express my concerns about the Water Plan of 2007. I am against the building of more reservoirs. This brings up a few issues, not leaving enough water for wildlife, and spending money unnecessarily. These are my two main concerns.

If we don't conserve water for the wildlife, the wildlife along the coast will die. If we build too many reservoirs the rivers near the ocean will get too salty. The fresh water from the inland rivers dilute saltiness so the animals can tolerate it. People also do not have the extra money to spend on these reservoirs. Conserving water is cheaper than building reservoirs. Plus, water conservation is a lot better for our environment.

Thank you for your consideration of my concerns. I urge you to take action against this misuse of water.

Sincerely,

Erin Kathleen Wolter
