

D/s do not sacrifice the proposed
① Neches River w/ life Refuge with a new
reservoir —

② Reg. C. water use in 2060 appears
to be based on continued use of 197 p.p.
per person today. This would be unacceptable
& unrealistic going forward. State mandate
proposes numbers of ~~147~~ 147 p.p. — 2000 —

③ There is attention should be given to
conservation measures & future technological
innovations re reuse etc.

Thank you —
