BULLETIN 5610

RECORDS OF WATER-LEVEL MEASUREMENTS IN
COMAL AND GUADALUPE COUNTIES, TEXAS

1933 TO MARCH 1956

Compiled by

C. R. Follett, Engineer
Texas Board of Water Engineers

From records of the Texas Board of Water Engineers,
and the Geological Survey, United States Department of the Interior

April 1956

CONTENTS

Introduction.	1
List of Publications.	2
Water-level measurements in Comal County.	6
Water-level measurements in Guadalupe County.	30

ILLUSTRATIONS

Map showing location of observation wells in Comal and Guadalupe Counties.	5
Hydrographs of water levels in wells, Comal County, and annual precipitation at New Braunfels, Texas.	31
Hydrographs of water levels in two wells, Comal County, and the flow of Comal Springs at New Braunfels, Texas.	32

RECORDS OF WATER-LEVEL MEASUREMENTS IN COMAL AND GUADALUPE COUNTIES, TEXAS

1933 TO MARCH 1956

Compiled by
C. R. Follett, Engineer
Texas Board of Water Engineers
April 1956

INTRODUCTION

The Texas Board of Water Engineers is charged with making independently or in cooperation with other state and federal agencies, scientific investigations of the source, amount and quality of ground-water supplies. To evaluate effects of ground-water development in relation to available supply, periodic measurements of water levels are made in principal reservoirs of the state through an observation well program financed cooperatively by the Texas Board of Water Engineers and the United States Geological Survey.

Water levels in some observation wells are published annually in Water-Supply Papers of the Geological Survey. County water-level reports are published periodically by the Texas Board of Water Engineers and include all recorded water levels in selected observation wells. This bulletin contains measurements of the depth of water in feet below land-surface datum in 83 wells in Comal County and two wells in Guadalupe County. These records cover the period from 1933 to March 1956. During 1936-37, an inventory of wells in Comal County made by E. J. Michal and the results published by the Texas Board of Water Engineers in 1937. During parts of the period 1941-46, a detailed study of the geology and water resources of Comal County was made by W. O. George and the results published by the Texas Board of Water Engineers in 1947. The same data, with some additions, was published in 1952 by the Geological Survey. During 1935-36, an inventory of wells in Guadalupe County was made and the results published by the Texas Board of Water Engineers in 1937. Water-level measurements in the selected observation wells made during the time of the investigations, as well as interim measurements, are included in this bulletin.

The water levels are reported in feet below land-surface datum. The accompanying map shows the locations of the observation wells. The well numbers on the map correspond to those outside the parentheses in the table of measurements. Where there is a number inside the parentheses, it is a number assigned to this well in some publications prior to Water-Supply Paper 1138. Hydrographs showing the fluctuation of water levels in five wells, the monthly average flow of Comal Springs in New Braunfels, and the precipitation at New Braunfels are given on pages 31 and 32. Records of water wells, geologic data, and discussion of ground-water conditions may be found in the included list of publications.
