

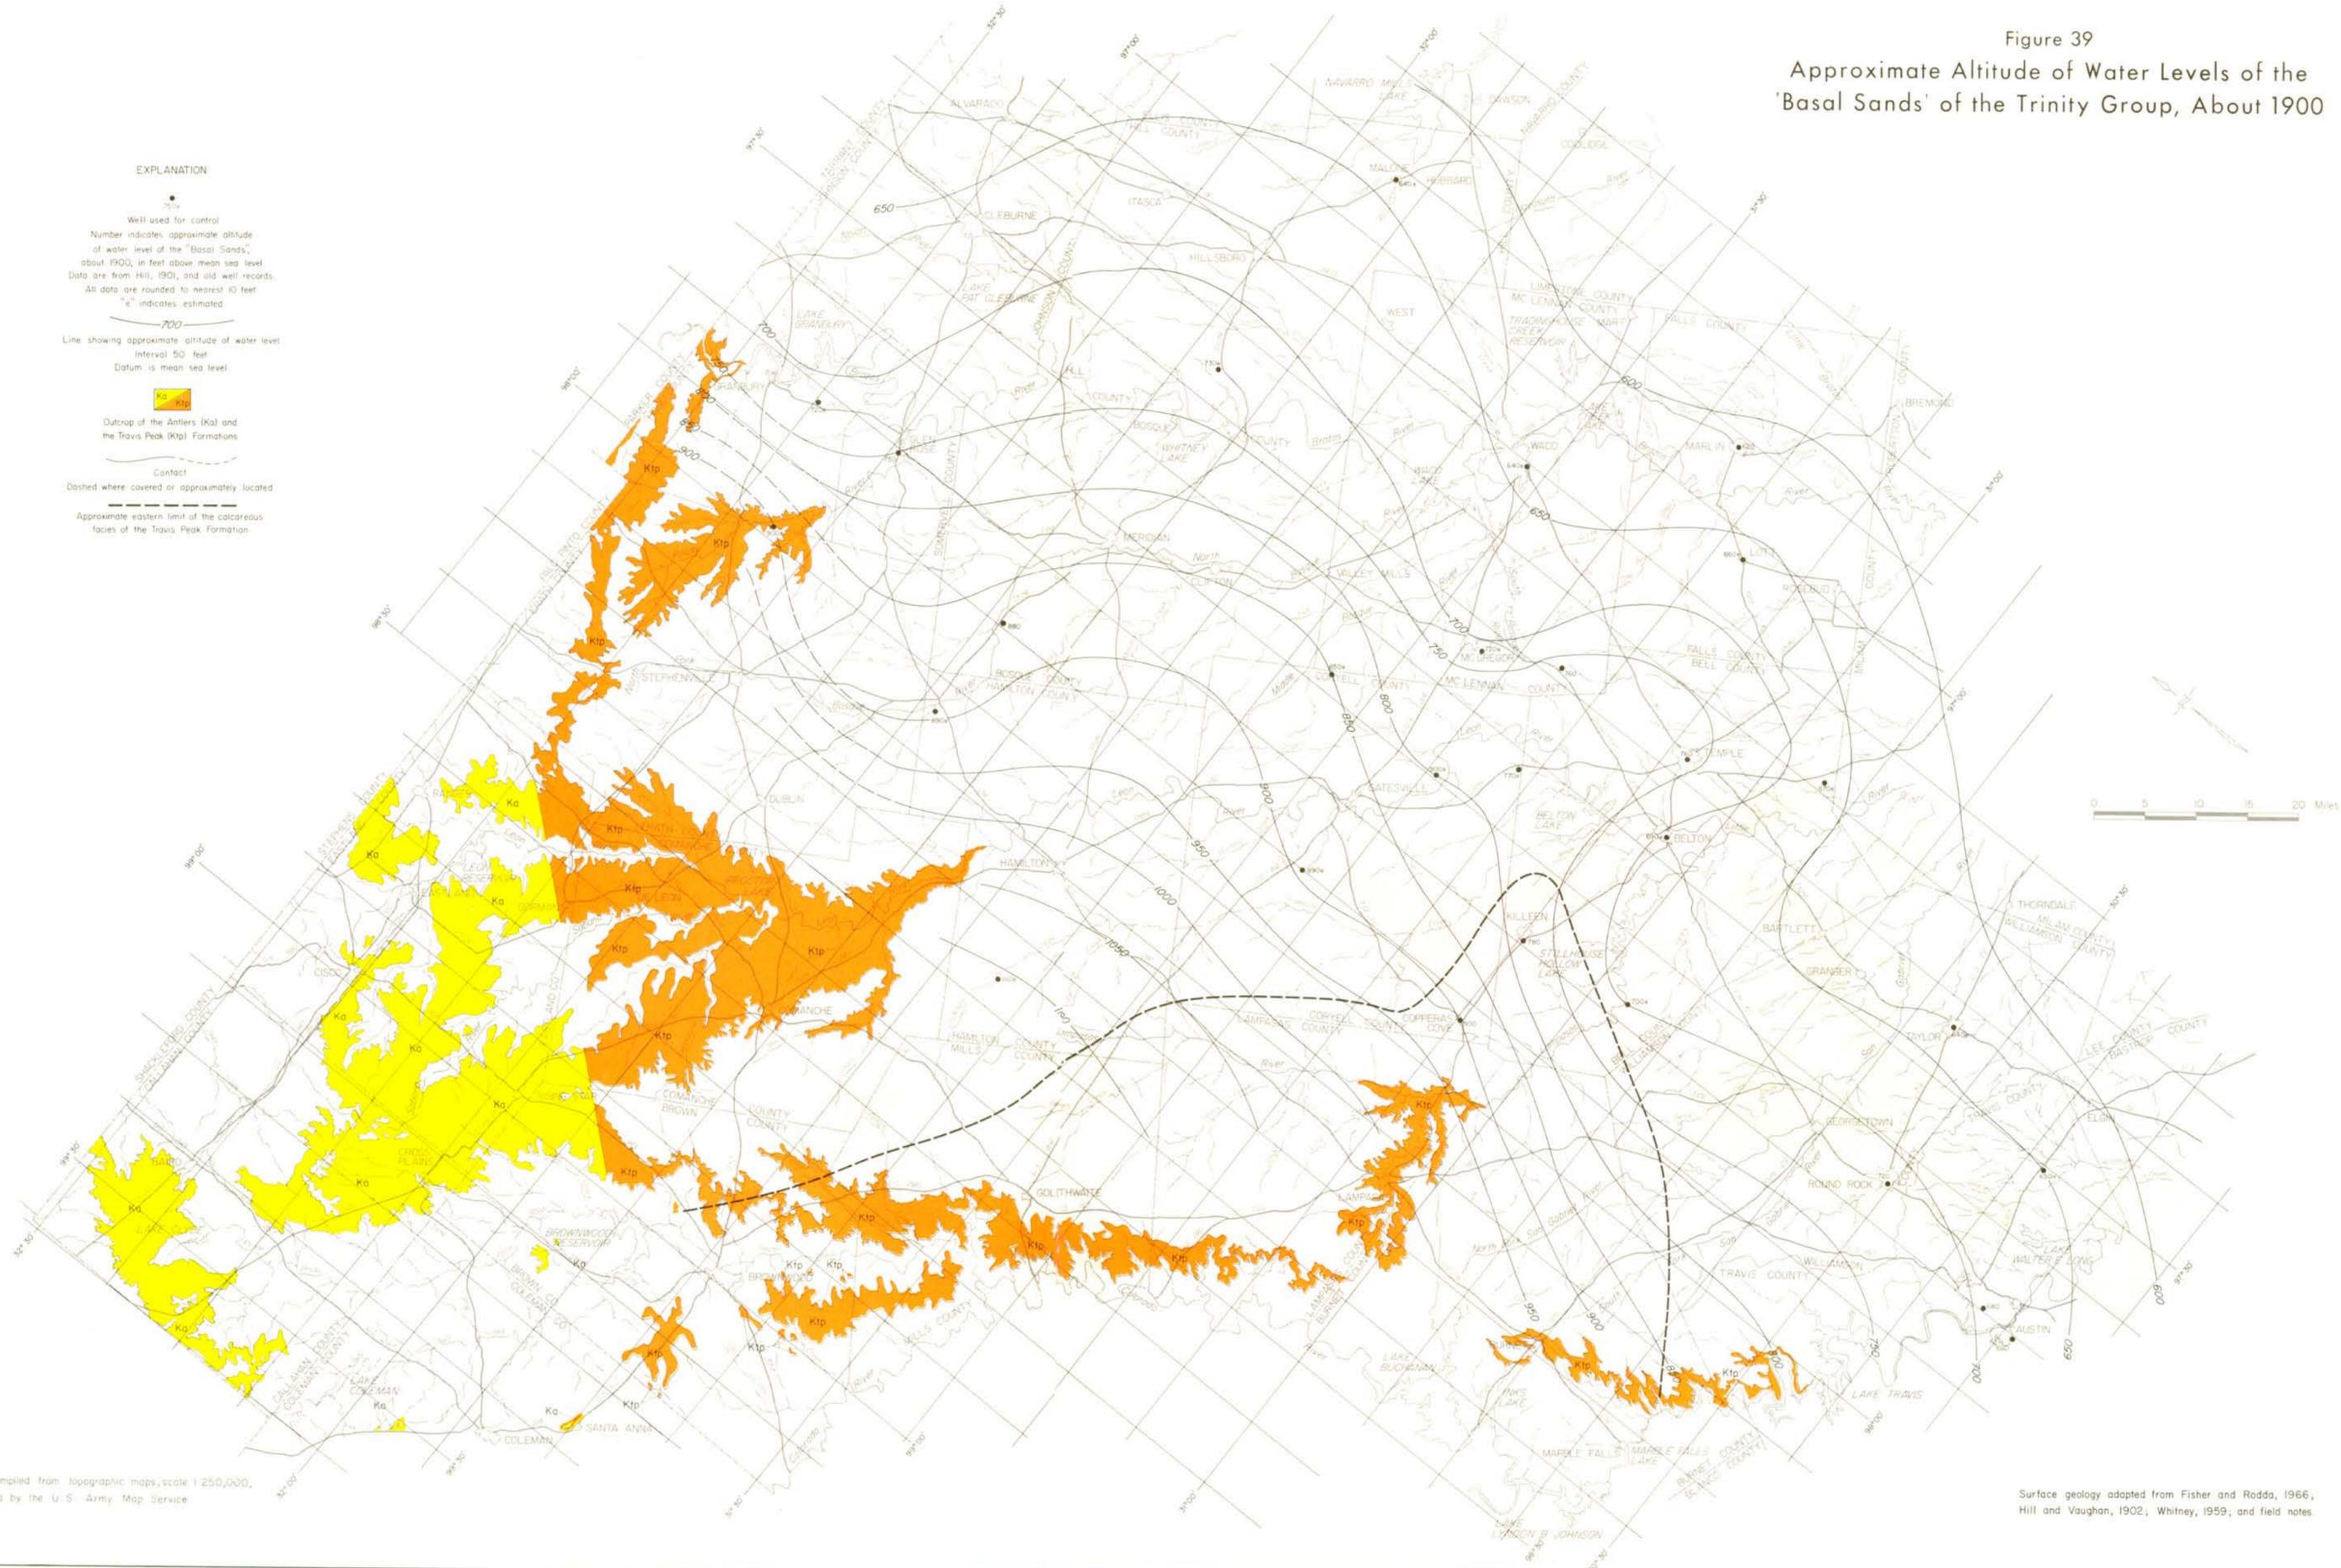

Figure 39  
 Approximate Altitude of Water Levels of the  
 'Basal Sands' of the Trinity Group, About 1900

EXPLANATION

- Well used for control
- Number indicates approximate altitude of water level of the 'Basal Sands', about 1900, in feet above mean sea level. Data are from Hill, 1901, and old well records. All data are rounded to nearest 10 feet. "e" indicates estimated.
- 700— Line showing approximate altitude of water level. Interval 50 feet. Datum is mean sea level.
- Ka ■ Ktp Outcrop of the Antlers (Ka) and the Travis Peak (Ktp) Formations
- - - Contact
- - - Dashed where covered or approximately located
- - - Approximate eastern limit of the calcareous facies of the Travis Peak Formation

Base compiled from topographic maps, scale 1:250,000, produced by the U.S. Army Map Service

Surface geology adapted from Fisher and Rodda, 1966, Hill and Vaughan, 1902, Whitney, 1959, and field notes
