

EXPLANATION

- 800 Well used for control
- Number indicates depth to top of Carrizo aquifer, in feet below land surface
- x Surface contact used for control
- 500- Line showing approximate altitude of top of Carrizo aquifer
- - - Dashed where control is absent or limited
- Interval is 100 feet
- Datum is mean sea level
- Ec Outcrop of the Carrizo Sand
- - - Contact
- · · Dotted where concealed or approximately located
- - - Fault, dashed where approximately located
- D, downthrown side; U, upthrown side
- - - - - Approximate down dip limit of fresh to slightly saline water (less than 3,000 milligrams per liter dissolved solids) in the Carrizo aquifer

Figure 8
Approximate Depth to and Altitude of the
Top of the Carrizo Aquifer

Base compiled from Army Map Service Maps, Corps of Engineers, U.S. Army, Washington D.C.
