

Figure 8
 Approximate Change of Water Levels in the
 Edwards-Trinity (Plateau) Aquifer
 From 1957-59 to 1971-73

EXPLANATION

●-80
 Well used for control
 Number indicates decline (-) or rise (+) of water level, in feet

—+150—
 Line showing approximate change in water level
 Dashed where control is absent or limited
 Interval is 10 and 50 feet

Southern Pecos County and Terrell County are not included because water levels in this area have not changed significantly during the period of record.

—
 Line showing approximate extent of the Edwards-Trinity (Plateau) aquifer

Base map from general highway maps of the Texas State Department of Highways and Public Transportation.
