

PLATEAU WATER PLANNING GROUP

REQUEST FOR TEXAS WATER DEVELOPMENT BOARD RESEARCH AND PLANNING FUNDS

Requested by
Upper Guadalupe River Authority
June 13, 2008

**REQUEST FOR TEXAS WATER DEVELOPMENT BOARD
RESEARCH AND PLANNING FUNDS**

**BY
THE UPPER GUADALUPE RIVER AUTHORITY**

**ON BEHALF OF
THE PLATEAU WATER PLANNING GROUP**

June 13, 2008

**Plateau Water Planning Group
Application for TWDB Planning Funds
June 13, 2008**

I. GENERAL INFORMATION

1. *Legal name of applicant(s).*

Upper Guadalupe River Authority

2. *Regional Water Planning Group:*

Plateau Water Planning Group (Region J)

3. *Authority of law under which the applicant was created.*

The Upper Guadalupe River Authority is a political subdivision of the State created under the Legislature through the enactment of Article 8280-124, Tex. Rev. Civ. Stat. Ann. (as amended), pursuant to Article XVI, Section 59 of the Texas Constitution. UGRA operates pursuant to its enabling legislation and Chapters 30, 49, 50, and 51 of the Texas Water Code, as well as the other applicable general laws of the State including Chapter 791 of the Texas Government Code and Chapter 402 of the Texas Local Government Code. Pursuant to these constitutional and statutory authorities and the provisions of Senate Bill No. 1, UGRA is authorized to participate in the development and implementation of a regional plan.

4. *Applicant's official representative, Name, Title, Mailing address, Phone number, Fax number, E-mail Address, and Vendor ID Number.*

Mr. Raymond L. Buck, Jr.
General Manger
Upper Guadalupe River Authority
125 Lehmann Drive, Suite 100
Kerrville, Texas 78028
Phone: 830/896-5445
Fax: 830/257-2621
e-mail: rbuck@ugra.org

Vendor I.D. # 74-1618010

5. *Is this application in response to a Request for Applications published in the Texas Register?*

Yes ✓ No

6. *If yes to No. 5 above, list document number and date of publication of the Texas Register.*

Texas Register, February 15, 2008, Vol. 33, Number 7, TRD-200800727

7. *Total proposed planning cost.*

\$311,340

8. *Cash contribution to the study.*

\$0

9. *List source of cash contribution, explanation of source of local cash contribution.*

N/A

10. *Total grant funds requested from the Texas Water Development Board.*

\$311,340

11. *Detailed statement of the purpose for which the money will be used.*

The purpose of the requested funding is to prepare the State mandated 2011 Plateau Region Water Plan. The updated water plan is intended to meet legislative and regulatory requirements while addressing changed conditions since the completion of the 2006 plan. The Plateau Region is located in a rural agricultural area of West-Central Texas. The economic base is driven by agricultural production and markets. But for State of Texas financial assistance, regional water planning will not occur.

12. *Detailed description of why state funding assistance is needed.*

The Legislature has mandated that the regional water plans be updated every five years. The Plateau Water Planning Group is expected to produce its next plan by January 2011. The Legislature has allocated funding for this effort and is expected to allocate additional funding in 2009 to provide the funds necessary to complete the 2011 regional water plans. It is appropriate for the TWDB to award funds to the Plateau Water Planning Group to enable them to meet the state-mandated requirements.

The proposed scope of work and budget for this round of planning follows state guidelines as specified in Title 31 of the Texas Administrative Code (TAC) Chapter 357 and as instructed in the TWDB document Guidelines for Regional Water Plan Development (2007-2012). Tasks outlined in this scope of work reflect changed conditions as recognized by the Plateau Water Planning Group and include suggestions provided during a public hearing held on May 28, 2008.

13. *Identify potential sources and amounts of funding available for implementation of viable solutions resulting from proposed planning.*

Viable projects are to be implemented by individual water providers and other beneficiaries not by the Plateau Water Planning Group. Funding will vary considerably depending on the type of project and the economic resources of the beneficiaries. Potential sources of funding include but are not limited to income from water sales, municipal taxes, bond sales, federal and state loan programs, state participation funds, and grants from federal programs.

II. PLANNING INFORMATION

14. *A detailed scope of work for proposed planning.*

The scope of work for the project may be found in Exhibit I.

15. *A task budget for detailed scope of work by task.*

A task budget for the project may be found in Exhibit II.

16. *An expense budget for detailed scope of work by expense category.*

An expense budget for the project may be found in Exhibit II.

17. *A time schedule for completing detailed Scope of Work by task.*

The time schedule for completing the project may be found in Exhibit III.

18. *Specific deliverables for each task in Scope of Work.*

The deliverables for each task may be found in the Detailed Scope of Work in Exhibit I.

19. *Method of monitoring study progress.*

The progress of each project will be monitored using the monthly progress reports that will be submitted to the TWDB along with the monthly invoice.

20. *Qualifications and direct experience of proposed project staff.*

The Plateau Water Planning Group approved the consultant team of LBG-Guyton Associates and Freese and Nichols, Inc. LBG-Guyton Associates will be the lead consultant. This team has worked together with the Plateau Water Planning Group since the beginning of the first round of regional water planning in 1998. The resumes for the consultants are included in Exhibit IV.

III. WRITTEN ASSURANCES

Written assurance of the following items:

1. *Proposed planning does not duplicate existing projects;*

See Exhibit V

2. *Implementation of viable solutions identified through the proposed planning will be diligently pursued and identification of potential sources of funding for implementation of viable solutions;*

See Exhibit V

3. *If a grant is awarded, written evidence that local matching funds are available for the proposed planning must be provided when the contract is executed.*

See Exhibit V

IV. PROOF OF NOTIFICATION

1. *Proof of notification*

For developing or revising regional water plans, eligible applicants requesting funds to develop or revise regional water plans must, not less than 30 days before board consideration of the application, provide notice that an application for planning assistance is being filed with the executive administrator by:

- (1) *publishing notice once in a newspaper of general circulation in each county located in whole or in part in the regional water planning area; and*
- (2) *mailing notice to each mayor of a municipality with a population of 1,000 or more or which is a county seat and that is located in whole or in part in the regional water planning area, to each county judge of a county located in whole or in part in the regional water planning area, to all districts and authorities created under Texas Constitution, Article III, §52, or Article XVI, §59, located in whole or in part in the regional water planning area based upon lists of such water districts and river authorities obtained from Texas Commission on Environmental Quality, and all regional water planning groups in the state.*

The notice must include the following:

- *Name and address of applicant and applicant's official representative;*
- *Brief description of proposed planning area;*
- *Purpose of the proposed planning;*
- *Texas Water Development Board Executive Administrator's name and address; and*
- *Statement that any comments on the proposed planning must be filed with the applicant and the Texas Water Development Board Executive Administrator within 30 days of the date on which the notice was mailed or published.*

Prior to action by the board, the applicant must provide one copy of the notice sent, a list of those to which the notice was sent, the date on which the notice was sent, copies of all notices as published showing name of the newspaper and the date on which the notice was published.

The Plateau Water Planning Group provided the required notification as outlined above. Notification documents are provided in Exhibit VI.

EXHIBIT I
DETAILED SCOPE OF WORK
FOR PROPOSED PLANNING

EXHIBIT I

**PLATEAU REGION WATER PLAN
Scope of Work
Phase II of the 3rd Round of Regional Water Planning**

This round of planning is an update to the 2006 Plateau Region Water Plan. Since this third round of planning takes place during an "off-census cycle", the Texas Water Development Board will not be developing new population and water demand projections with the exception of steam electric power demands. Thus the 2011 plan will not require a complete revision, but rather an update to changed conditions. The proposed scope of work and budget for this round of planning follows state guidelines as specified in Title 31 of the Texas Administrative Code (TAC) Chapter 357 and as instructed in the TWDB document Guidelines for Regional Water Plan Development (2007-2012). Tasks outlined in this scope of work reflect changed conditions as recognized by the Plateau Water Planning Group and include suggestions provided during a public hearing held on May 28, 2008.

In the task descriptions below, Base Funded Tasks are those that can be achieved with the provided base funding from the TWDB. Additional Funded Tasks are those that will require additional funding to achieve. Additional Funded Task descriptions that are preceded with a double-asterisk symbol (**) are tasks that the Regional Planning Group considers essential task necessary to achieve the base level expected of this planning period.

Chapter 1. Description of the Region

Base Funded Tasks:

1. Update Chapter 1 text to reflect current conditions.
2. Discuss uniqueness of the Plateau Region as it relates to unaccounted water use by absentee landowners, tourists, hunters, and other water users in rural areas.
3. Recognize and provide summaries of two interim projects conducted during 2007 and 2008.
4. Update colonia information.
5. Review and add as needed discussion on municipal water loss audits as provided by the TWDB pursuant to 31 TAC §358.6.
6. Prepare draft chapter documents for planning group review.

Base Funding Request\$10,000

Deliverables:

- Updated Chapter 1 text, tables, and figures including discussions and updates of items listed in scope of work.
- Summaries of interim projects.
- Updated colonia information.

Chapter 2. Population and Water Demand

Base Funded Tasks:

1. Review and update water demands for water user groups and wholesale water providers based on changes in contracts and other changed conditions.

Additional Funded Tasks:

- 2A. ** Update TWDB-DB12 database.
- 2B. ** Prepare draft chapter documents for planning group review.
- 2C. Discuss alternative population growth pattern for the City of Kerrville as developed by the City's Comprehensive Plan Update Committee.
- 2D. Discuss potential new water demands in Kinney County as a consequence of recent permit requests. This discussion is not intended as a strategy level evaluation at this time.
- 2E. Survey and quantify unaccounted, non-system transient water use by absentee landowners, tourists, hunters, and other transient water users (county-other category) in rural areas as discussed in Chapter 1. Sales tax revenues, utility hookups, and well permits will be surveyed to estimate unaccounted water use.
- 2F. Determine the quantity of unaccounted water use (livestock category) by large numbers of unsurveyed exotic game in the region. Numerous wells are being drilled to provide water to animals held within fenced areas that prevent their ability to migrate to surface water sources.
- 2G. Evaluate recent increases in water use by the petroleum exploration industry (mining category) in Kerr, Edwards, and Real Counties.

Base Funding Request (Including Tasks 2A and 2B)\$6,000

Additional Funding Request (Tasks 2C-2G)\$45,500

Deliverables:

- Updated Chapter 2 text, tables, and figures including discussions and updates of items listed in scope of work.
- Updated TWDB-DB 12 database.
- Discussions on City of Kerrville population and Kinney County export permit requests.
- Survey and report on unaccounted, non-system water use.
- Survey and report on unaccounted exotic game water use.
- Evaluation of increased petroleum exploration activity and related water use.

Chapter 3. Regional Water Supply Sources

Base Funded Tasks:

1. Update supplies to water user groups and wholesale water providers based on changes in contracts, new supplies from strategies that have been implemented since the last plan, and other changed conditions.
2. Discuss current status of the "Pecos River Basin Assessment" project by the Texas AgriLife Extension Service and others.

Additional Funded Tasks:

- 3A. ** Review and update municipal well field discussions.
- 3B. ** Update TWDB-DB12 database.
- 3C. ** Prepare draft chapter documents for planning group review.
- 3D. ** Identify and quantify supply availability from specific shallow alluvial aquifers where a significant number of wells are known to exist in all counties except Val Verde. Develop appropriate maps and update tables as needed.
- 3E. Drill and core up to five wells to better develop hydrogeologic characterization of the Edwards-Trinity and Trinity aquifers within the Plateau Region. Information developed from this project will benefit work proposed by the Kinney County Groundwater Conservation District and the proposed ASR project in Kerr County. Further detail on this project will be provided upon request.

Base Funding Request (Including Tasks 3A -3D)\$15,000

Additional Funding Request (Task 3E)\$100,000

Deliverables:

- Updated Chapter 3 text and figures including discussions and updates of items listed in scope of work.
- Updated TWDB-DB 12 database.
- Evaluation of water supply availability from significant shallow-aquifers including map of aquifer extents.
- Report on the drilling, coring, and testing of five Edwards-Trinity and Trinity wells.

Chapter 4. Water Management Strategies

Base Funded Tasks:

- 1. Reevaluate and revise as needed all retained water management strategies in the 2006 Plan (Table 4-3) as required by Section 4 of the *General Guidelines for Regional Water Plan Development*. Consider possible revisions and additions of strategies previously developed for the City of Kerrville and County Other (UGRA) based on results of the Study 2 interim project.

Additional Funded Tasks:

- 4A. ** Revise water needs analysis (Table 4-1) for water user groups and wholesale water providers with changed demands as identified in Chapter 2 or changed supplies identified in Chapter 3.
- 4B. ** Consider possible development of alternative strategies for the City of Bandera based on results of the Study 2 interim project.
- 4C. ** Update capital and annual cost estimates (Table 4-4) to 2007 dollars for all strategies.
- 4D. ** Update Chapter 4 text, tables and figures as needed to reflect changed conditions.
- 4E. ** Update TWDB-DB12 database.
- 4F. ** Prepare draft chapter documents for planning group review.

- 4G. Revise discussion in Section 4.7 to include concerns of declining land management and stewardship activities in the region and their impact on water resources.
- 4H. Explore the potential benefits of a "cloud-seeding" program in the Plateau Region counties.

Base Funding Request (Including Tasks 4A-4F).....\$24,060
Additional Funding Request (Tasks 4G and 4H).....\$5,500

Deliverables:

- Updated Chapter 4 text and figures including discussions and updates of items listed in scope of work.
- Updated TWDB-DB 12 database.
- Updated capital and annual cost estimates.
- New strategies for entities with water deficits based on changed conditions.
- Revised retained strategies as needed.
- Possible alternative strategy for the City of Bandera.
- Discussion on potential benefits of a "cloud seeding" program in the region.

Chapter 5. Water Quality Impacts and Impacts on Moving Water from Agricultural Areas

Base Funded Tasks:

- 1. Review and update impacts as needed, considering new water management strategies and changed conditions.

Additional Funded Tasks:

- 5A. ** Prepare draft chapter documents for planning group review.
- 5B. ** Develop a water-quality description and table for the new "shallow aquifer" identified in Chapter 3.

Base Funding Request (Including Tasks 5A and 5B)\$3,000

Deliverables:

- Updated Chapter 5 text and figures including discussions and updates of items listed in scope of work.
- Water quality discussion and map of the new designated "Shallow aquifer".

Chapter 6. Water Conservation and Drought Contingency

Base Funded Tasks:

- 1. Revise water conservation management and drought contingency plans as needed.
- 2. Revise groundwater conservation district management plans as needed.
- 3. Prepare draft chapter documents for planning group review.

Base Funding Request\$24,060

Deliverable:

- Updated Chapter 6 reflecting revisions to water conservation and drought contingency plans.

Chapter 7. Plan Consistency

Base Funded Tasks:

- 1. Review and revise Chapter 7 text to reflect changed conditions and new water management strategies.
- 2. Prepare draft chapter documents for planning group review.

Base Funding Request\$10,000

Deliverable:

- Updated Chapter 7 including discussion on plan consistency as reflected in changed conditions and new strategies.

Chapter 8. Recommendations

Base Funded Tasks:

- 1. Review and revise Planning Group recommendations and policy issues as needed.
- 2. Prepare draft chapter documents for planning group review.

Base Funding Request\$15,000

Deliverable:

- Updated Chapter 8 including revised recommendations and policy issue discussion.

Chapter 9. Water Infrastructure Funding

Base Funded Tasks:

- 1. Send infrastructure financing survey developed by the TWDB to each water user group with a recommended water management strategy.
- 2. Revise the infrastructure financing report based on received responses to the survey.

3. Prepare draft chapter documents for planning group review.

Base Funding Request\$600

Deliverable:

- Updated Chapter 9 including revised infrastructure finance survey and report.

Chapter 10. Public Participation and Plan Adoption

Base Funded Tasks:

1. Post public notice and hold public meeting to gather input on scope of work and regional priorities.
2. Prepare scopes of work, budgets and grant application. Submit application for funding to TWDB.
3. Coordinate and facilitate public meetings of the planning group, including securing meeting spaces with adequate public access, and ensuring adequate copies of meeting materials are available for public inspection prior to and following public meetings.
4. Prepare and distribute public information material for the purpose of encouraging public participation, including response to individual inquiries, meeting summaries, press releases, and information of water planning related activities within the region, and posting and distributing public notices. Develop and maintain public contact mail and e-mail databases to transmit planning related materials directly to interested parties and to individuals and entities designated in statute. Provide copies of any draft and final reports resulting from planning group activities to libraries, public officials, planning group members, and interest groups.
5. Print and deliver the Initially Prepared Plan (IPP) to the TWDB. Make IPP available to the public for review and comment.
6. Respond to IPP comments. Prepare, print and deliver final adopted plan to the TWDB.
7. Provide administration, financial oversight and reporting associated with reimbursement of members’ travel expenses, sub-consultant contracts and other eligible political subdivision administrative expenses.

Base Funding Request\$65,680

Deliverable:

- Updated Chapter 10 including revised discussion on public participation activities and plan adoption procedures.

Total	\$122,340	\$122,340	\$189,000

** Signifies additionally funded tasks that the Regional Planning Group considers essential tasks necessary to achieve the base level expected of this planning period.

Expense Budget

Category	Total Amount
Salaries & Wages ¹	
Fringe ²	
Travel	
Other Expenses ³	\$ 10,662
Subcontract Services	\$ 295,660
Overhead ⁴	
Voting Planning Member Travel ⁵	\$ 5,018
Profit	
Total	\$ 311,340

¹Salaries and Wages is defined as the cost of salaries of engineers, draftsmen, stenographers, surveyors, clerks, laborers, etc., for time directly chargeable to this contract.

²Fringe is defined as the cost of social security contributions, unemployment, excise, and payroll taxes, employment compensation insurance, retirement benefits, medical and insurance benefits, sick leave, vacation, and holiday pay applicable thereto.

³Other Expenses are defined to include expendable supplies, communications, reproduction, postage, and costs of public meetings.

⁴Overhead is defined as the costs incurred in maintaining a place of business and performing professional services similar to those specified in this contract. These costs shall include the following:

- Indirect salaries, including that portion of the salary of principals and executives that is allocable to general supervision;
- Indirect salary fringe benefits;
- Accounting and legal services related to normal management and business operations;
- Travel costs incurred in the normal course of overall administration of the business;
- Equipment rental;
- Depreciation of furniture, fixtures, equipment, and vehicles;
- Dues, subscriptions, and fees associated with trade, business, technical, and professional organizations;
- Other insurance;
- Rent and utilities; and
- Repairs and maintenance of furniture, fixtures, and equipment.

⁵ Voting Planning Member Travel Expenses is defined as eligible travel expenses incurred by regional water planning members that cannot be reimbursed by any other entity, political subdivision, etc.

EXHIBIT IV
RESUMES OF PROPOSED PROJECT STAFF

EXHIBIT IV

RESUMES OF PROPOSED PROJECT STAFF

John Ashworth - LBG-Guyton Associates

Andres Salazar - Freese and Nichols, Inc.

John Ashworth has a wide range of experience with water-supply evaluations and water-resource management planning in his 23 years of working for the Texas Water Development Board, and now for LBG-Guyton Associates. He currently directs the firm's water management planning activities for several of the Texas regions designated by Senate Bill 1. The regional water management plans involve analyses of available water supplies to meet short- and long-term water needs for all water-use categories. The plans also provide for drought contingency water-supply strategies.

His experience as a geologist with the Texas Water Development Board involved the supervision of the agency's ground-water availability studies. This duty included the identification, characterization and supply analysis of the major and minor aquifers in the state. Additional duties included the supervision of the Priority Ground Water Management Area (Critical Area) Program, Texas/Mexico Border Ground-Water Program, technical assistance to underground water conservation districts and other public entities, and involvement with the Aquifer Storage and Recovery Pilot Program. Technical duties with regard to the above programs consisted of water-supply planning, subsurface mapping, test hole drilling, pumping tests, water-quality sampling, well construction analysis, and geophysical log analysis. His experience included project management of a number of multi-county ground-water availability studies requiring extended field reconnaissance, design of monitoring well networks, research of existing data, drilling and coring of test holes, computer modeling, subsurface geophysical studies and subsurface mapping. He also authored much of the ground-water availability segment of current and previous State Water Plans, and was significantly involved in establishing the agency's Senate Bill 1 policies relating to the certification guidelines of underground water conservation district management plans.

He also authored much of the ground-water availability segment of previous State Water Plans, and was significantly involved in establishing the agency's Senate Bill 1 policies relating to the certification guidelines of underground water conservation district management plans.

Mr. Ashworth's experience with Gas Log Inc. included the evaluation of gas shows during oil field drilling operations and correlation with geophysical log interpretations. This activity resulted in his familiarity with large-scale drilling operations.

EDUCATION

B.S. in Geology, 1973, Lamar University, Beaumont, Texas

SUMMARY OF PROFESSIONAL EXPERIENCE

2000 to present:

Associate with LBG-Guyton Associates, Austin, Texas

1997 to 1999

Senior Consultant with LBG-Guyton Associates, Austin, Texas

1991:

Instructor, Concordia Lutheran College, Austin, Texas

1974 to 1997:

Geologist, Texas Water Development Board, Austin, Texas

1973 to 1994:

Geologist, Gas Log Inc., Houston, Texas

SPECIFIC EXPERIENCE IN GROUND-WATER SUPPLY

Central Texas

Principal investigator and author of a study and report evaluating the ground-water resources of part of south-central Texas (11 "Hill Country" counties), with emphasis on lower Cretaceous Trinity formations. The general scope of work included the collection, compilation, and analysis of ground-water data, test hole drilling, subsurface mapping, and the presentation of the data, conclusions, and recommendations in a published report. Much of this region was later declared a "critical area" due to its limited ground-water availability and rapidly increasing water demand. Later work included monitoring water-level trends during normal and drought climatic conditions. Also, participated in numerous public meetings to provide educational assistance to the citizens of the region. Is currently the project manager for the Senate Bill 1 Region J water planning process. Region J is an area that includes six counties stretching from Kerr to Val Verde County.

Texas High Plains

Participated in a regional ground-water study of the High Plains aquifer (principally the Ogallala Formation) in Texas as part of a nationwide (eight-state) study to improve the existing ground-water data base and to develop a computer model capable of predicting future aquifer conditions. Primary area of responsibility was the drilling, coring, and testing of 41 test holes to ascertain permeability and specific yield of the aquifer. Later involvement with the High Plains region included the monitoring of water-level changes over time, continued improvement to the computer model.

East Texas

Principal investigator and author of a regional ground-water availability study of the Nacatoch aquifer in 10 northeast Texas counties. The study included the collection, compilation, and analysis of ground-water data, test hole drilling, subsurface mapping, and a published report. Also, assisted in a regional availability study of the Blossom aquifer in the same region.

West Texas

Principal investigator and author of several regional ground-water availability studies including the following aquifers:

- Hueco-Mesilla Bolsons Aquifer - El Paso and Hudspeth Counties
- Bone Spring-Victorio Peak Aquifer - Dell City area of Hudspeth County
- Cenozoic Pecos Alluvium Aquifer - Reeves, Loving, Pecos, Ward, and Winkler Counties
- Salt Basin of the West Texas Bolsons Aquifer - Culberson, Jeff Davis, and Presidio Counties
- Edwards-Trinity (Plateau) Aquifer - Midland, Reagan, Upton, and Glasscock Counties
- Dockum Aquifer - numerous southern High Plains and northern Edwards Plateau Counties
- Igneous Aquifer - Brewster, Jeff Davis and Presidio Counties

Conducted the following local ground-water availability studies:

- Balmorhea/Toyahvale - Jeff Davis and Reeves Counties.
- Ryan Flat - Jeff Davis and Presidio Counties.
- Garden City - Glasscock County.
- Oil field - Central Sterling County.

John B. Ashworth (continued)

Also, conducted an inventory of all public water supply well fields in 18 West Texas counties.

Currently the project manager for the Senate Bill 1 and 2 Region E water planning process. Region E is an area of Far West Texas that includes seven counties and stretches from El Paso to beyond the Big Bend area.

Also, is currently working with a team of consultants in the establishment of a desalination facility that will provide fresh water for the City of El Paso and the Fort Bliss Army Post.

Texas-Mexico Border

Project manager and co-author of a regional study of the Hueco Bolson and Rio Grande Alluvium aquifers as they occur in Texas, Mexico, and New Mexico. The study included a bi-national agreement to exchange government approved ground-water data and resulted in a data report presented in both English and Spanish and a major aquifer evaluation report. Additional work included attending numerous meetings concerning water issues as they relate to the Free Trade Agreement and the International Boundary Environmental Plan.

Regional Ground-Water Supply Analysis for the State Water Plan of Texas

Supervised and participated in the ongoing appraisal of the ground-water availability of the major and minor aquifers in the State. The scope of this assessment encompasses regional aquifer studies, aquifer computer models, and water-level and water-quality monitoring. Results are continuously reevaluated and applied to the most current State Water Plan. Principal author of the ground-water availability segment of previous and current State Water Plans.

Priority Ground-Water Management Area Program

Responsible for the Texas Water Development Board's contribution to the legislatively mandated Priority Ground-Water Management Area Program (formerly referred to as the Critical Area Program). Assisted in the identification of areas to consider for designation. Conducted studies and authored reports on four of the 16 areas identified for consideration. Studies consisted of an evaluation of existing ground-water data to determine if the area was currently having water supply or quality degradation problems or if such problems were anticipated in the coming 20 years.

Andres A. Salazar, P.E., Ph.D.

Years Experience: 10
Education: Ph.D., Civil Engineering, Texas A&M University
M.S., Civil Engineering, Universidad de los Andes
B.S., Civil Engineering, Universidad de los Andes
Registration: Professional Engineer, Texas #95010

Dr. Salazar serves as a modeler for water availability analysis, water rights applications, reservoir system operations, river basin management and water quality modeling. He actively participated in the development of the 2006 Regional Water Plans in Texas. He has developed research in hydrologic modeling and conditional probability analyses. He has experience with computer modeling programs for river basin management, including such programs as the Water Rights Analysis Package, TCEQ Water Availability Models, and RiverWare. He also has developed computer models for water resources.

- Senate Bill 1, Region F/K Subordination Analysis – Analyzed the water available to and impacts on existing water rights as a result of a potential subordination agreement between senior water rights in the Lower Colorado Basin (Region K) and 17 reservoirs in the Upper Basin (Region F). Created an accounting method for the transferring of water among water rights. Modeling was developed using the Water Availability Modeling of the Colorado Basin and included the evaluation of naturalized flows for the 1998 – 2004 drought period.
- Senate Bill 1, Regional C 2006 Regional Water Plan – Calculated surface water supplies for Region C using the Water Availability Models of the Trinity, Sabine, Red, and Sulphur River Basins. Adjusted the models to reflect conditions expected during the planning horizon to include sedimentation rates and proposed reservoir operating policies. Evaluated availability for proposed reservoirs including environmental flows restrictions.
- Senate Bill 1, Region I 2006 Regional Water Plan - Evaluated surface water availability for Region I (East Texas) using the Water Availability Model of the Sabine and Neches River Basins. Developed detailed evaluation for Lake Columbia and Toledo Bend Reservoir. Coordinated with TCEQ and the Angelina-Neches River Authority the modeling of a subordination of Sam Rayburn Reservoir and its impact on water supplies. Analyzed several operation options for Sam Rayburn-Steinhagen system to meet hydropower and water supplies in the lower Neches Basin. Evaluated impact on streamflows due to implementation of the proposed plan.
- Senate Bill 1, 2006 Panhandle Regional Water Plan – Evaluated surface water availability for Region A (Texas Panhandle) using the Water Availability Model of the Canadian and Red River Basins. Extended the hydrology of the model of the Canadian Basin to include the recent drought. Developed a channel loss study in the Canadian River. Developed a conditional reliability assessment for Lake Meredith and Lake Palo Duro.
- Senate Bill 1, 2006 Far West Texas Regional Water Plan – Served as a Project Manager since February 2002. Evaluated water supplies using the Rio Grande Water Availability Model. Developed and compared six potential water management strategies that would meet the required water needs for the County of El Paso. Evaluation of strategies included projection of water supply and demand, conjunctive use, environments impacts, socioeconomic impacts, water quality, and costs.

Andres A. Salazar, cont.

- Drought Modeling, North Texas Municipal Water District (NTMWD) – Developed a computer model to evaluate the reliability of the District’s reservoir system under drought conditions. Model included operation of Lakes Lavon, Texoma, and Chapman; two large pipelines; additional water from the East Fork reuse project and Lake Tawakoni or other sources; and drought contingency planning.
- Reuse Permit Application, NTMWD – Assisted the District on the technical evaluation of water availability for the reuse project on the East Fork of the Trinity River.
- Reservoir System Permit Application, Brazos River Authority – Developed a model of the Authority's 12-reservoir system using the TCEQ's Water Availability Model of the Brazos Basin to support a system operation permit application. Evaluated additional yield available as a result of system operation, basin-wide impacts on existing water right diversions, and environmental impacts on regulated flows.
- System Operation Assessment of Wright Patman and Jim Chapman Lakes, U.S. Army Corps of Engineers – Developed a model to assess the performance of Jim Chapman and Wright Patman Lakes when operated as a reservoir system. Evaluated alternatives for the operation of a potential pump station and pipeline from Wright Patman Lake to Jim Chapman Lake.
- Raw Water Supply System Operation, NTMWD – Developed a model of water supply system of the North Texas Municipal Water District using RiverWare. Model included operation strategies for the multi-source system, water quality, water accounting, and energy costs. Analyzed different operational policies and made recommendations for efficient system operation considering reliability and compliance with water rights.

EXHIBIT V
WRITTEN ASSURANCES

EXHIBIT V

WRITTEN ASSURANCES

1. Written assurance that the proposed planning does not duplicate existing projects.

The Upper Guadalupe River Authority, on behalf of the Plateau Water Planning Group, certifies that the proposed planning does not duplicate existing projects. The proposed projects will incorporate available information from existing plans, including the *2006 Plateau Region Water Plan* developed in the last round of regional water planning and current ongoing studies. The projects are responsive to guidance and requirements developed by the Texas Water Development Board for the development of a regional water plan.

Raymond L. Buck, Jr.
General Manager for UGRA
Plateau Water Planning Group
June 13, 2008

2. Written assurance that implementation of viable solutions identified through the proposed planning will be diligently pursued and identification of potential sources of funding for implementation of viable solutions.

The Plateau Water Planning Group has no authority to implement or ensure implementation of projects recommended in the plan. However, the members of the Plateau Water Planning Group are committed to continuing to work with entities seeking to implement projects that have been recommended in any way that they reasonably can. Implementation of projects is a step beyond the regional water planning process and is the responsibility of others who are responsible for seeking funding for their particular project.

Raymond L. Buck, Jr.
General Manager for UGRA
Plateau Water Planning Group
June 13, 2008

3. Written assurance that if a grant is awarded, written evidence that local matching funds are available for the proposed planning must be provided when the contract is executed.

None of the proposed projects in this application require matching funds. However, if it is determined by the TWDB that matching funds are required, the entities making such requests for the projects will be asked to provide written documentation during the contract negotiation phase.

Raymond L. Buck, Jr.
General Manager for UGRA
Plateau Water Planning Group
June 13, 2008

EXHIBIT VI
PUBLIC NOTICE

EXHIBIT VI
PUBLIC NOTICE

The Plateau Water Planning Group published a notice regarding the public meeting to take input on the scope of work. The public notice also provided information regarding the intent of the Plateau Water Planning Group to develop and submit a grant application for Texas Water Development Board funding. The following documents are included:

- A copy of the notice published in the newspapers
- Notice of public meeting registered with the Office of the Secretary of State
- A copy of the notice sent to each mayor of a municipality with a population of 1,000 or more or which is a county seat and that is located in whole or in part in the regional water planning area, and to each county judge of a county located in whole or in part in the regional water planning area.
- A copy of the mailing list to which the material was sent.

LEGALS/PUBLIC NOTICES
NOTICE OF INTENTION TO CONDUCT WEATHER MODIFICATION OPERATIONS IN THE STATE OF TEXAS
 Date of the first of three weekly publications of this notice: April 14, 2008, in the San Antonio Express News, published in Dimmit, Duval, Frio, Jim Hogg, Kinney, Salle, Maverick, McMullen, Uvalde, Webb, Zapata, and Zavala Counties, Texas.
 1. Notice is hereby given that the Southwest Texas Rain Enhancement Association, P. O. Box 1433, Carrizo Springs, Texas 78834 has filed an application with the Texas Department of Licensing and Regulation (TDLR) for a State permit to conduct weather modification operations to change, or attempt to change, the natural development of clouds for the purpose, objective, period, and by the method summarized herein below.
 2. The Southwest Texas Rain Enhancement Association holds a valid Texas weather-modification license, issued by the State of Texas on September 1, 2007, for Fiscal Year 2008, which began on September 1, 2007.
 3. The purpose of the proposed weather-modification operation is to increase rainfall to affect water resources and agriculture and to decrease hailfall from large thunderstorms within the target area of the Southwest Texas Rain Enhancement Association. The requested period of the permit is four (4) years from the date of issuance of the permit.
 4. The proposed weather-modification operation is to be carried out in both an operational area and a target area, to cause the intended effect(s) to occur in the target area. The operational area consists of the entire target area as well as the area within the following boundary (boundaries) of the following counties: Duval, Frio, Jim Hogg, Kinney, McMillen, and Zapata.
 5. The area to be affected by the proposed weather-modification operation is the target area. The target area is that area contained within the boundary

 Individual members of the public who wish to inquire about the information contained in this notice, or to inquire about other agency licensing and permitting procedures, may call the TDLR at (800) 803-9202 or access the TDLR website at www.tdlr.state.tx.us
NOTICE OF PUBLIC MEETING REGIONAL WATER PLANNING
 1. Notice is hereby given that the Regional Water Planning Group - Region J is seeking input on the scope of the Third Planning Cycle of Regional Water Planning. Written and oral comments (not to exceed five (5) minutes per speaker) regarding the scope of work will be taken at a Public Meeting at 10:00 a.m. on Wednesday, April 28, 2008 at the Arts, History, Music and Theatre Association (AHMATA), 104 N. Leon Klink Ave. in Camp Wood, TX.
 2. Notice is also given that the Upper Guadalupe River Authority (UGRA) will submit an on or before June 13, 2008, a grant application for financial assistance to the Texas Water Development Board (TWDB) to behalf of Region J. To be half of Region J. To carry out the scope of work, Region J includes the following counties: Kerr, Kinney, Real & Val Verde.
 Copies of the grant application may be obtained from UGRA when it becomes available. Written comments on the grant application must be filed by July 31, 2008, with both UGRA and the TWDB as follows:
 Ray Buck
 General Manager
 Upper Guadalupe River Authority
 125 Lehmann Drive
 Suite 100
 Kerrville, TX 78028
 J. Kevin Ward
 Executive Administrator

LEGALS/PUBLIC NOTICES
NOTICE OF INTENTION TO CONDUCT WEATHER MODIFICATION OPERATIONS IN THE STATE OF TEXAS
 Date of the first of three weekly publications of this notice: April 14, 2008, in the San Antonio Express News, published in Dimmit, Duval, Frio, Jim Hogg, Kinney, Salle, Maverick, McMullen, Uvalde, Webb, Zapata, and Zavala Counties, Texas.
 1. Notice is hereby given that the Southwest Texas Rain Enhancement Association, P. O. Box 1433, Carrizo Springs, Texas 78834 has filed an application with the Texas Department of Licensing and Regulation (TDLR) for a State permit to conduct weather modification operations to change, or attempt to change, the natural development of clouds for the purpose, objective, period, and by the method summarized herein below.
 2. The Southwest Texas Rain Enhancement Association holds a valid Texas weather-modification license, issued by the State of Texas on September 1, 2007, for Fiscal Year 2008, which began on September 1, 2007.
 3. The purpose of the proposed weather-modification operation is to increase rainfall to affect water resources and agriculture and to decrease hailfall from large thunderstorms within the target area of the Southwest Texas Rain Enhancement Association. The requested period of the permit is four (4) years from the date of issuance of the permit.
 4. The proposed weather-modification operation is to be carried out in both an operational area and a target area, to cause the intended effect(s) to occur in the target area. The operational area consists of the entire target area as well as the area within the following boundary (boundaries) of the following counties: Duval, Frio, Jim Hogg, Kinney, McMillen, and Zapata.
 5. The area to be affected by the proposed weather-modification operation is the target area. The target area is that area contained within the boundary
