

Prioritizations of Recommended Water Management Strategy Projects in the 2016 Regional Water Plans

As of February 13, 2020

This file consists of the 16 prioritizations of all recommended water management strategy projects with capital costs in the 2016 regional water plans, as developed and submitted by the regional water planning groups December 1, 2015. These 16 regional water plan prioritizations are based on the Uniform Standards that were developed and adopted by the HB4 Stakeholder Committee (SHC). The Uniform Standards were adopted by the SHC on 11/14/2013 and approved by the Texas Water Development Board (TWDB) on 12/5/2013. The SHC reconvened 11/28/2018 and adopted revised Uniform Standards. The revised Uniform Standards were approved by the TWDB Board on 2/25/2019.

A project's prioritization by the regional water planning group is one of the criteria that the TWDB uses to rank projects seeking SWIFT funding. Please note that each project prioritization score is based on a maximum of 1,000 possible points.

This list has been updated to include the following amendments to the 2017 State Water Plan:

- Region G (approved by the TWDB on July 7, 2016)
- Regions G, K, & L (approved by the TWDB on December 7, 2017)
- Region L (approved by the TWDB on December 13, 2018)
- Region C (approved by the TWDB on February 13, 2020)
