**REGION C WATER SUPPLY ALTERNATIVES
CORRESPONDENCE LOG FOR AGENCY CONTACT**

| |
|--|
| |
| OUTCOME |
| Not likely to have anything; GLO manages mainly subsurface mineral rights, groundwater and coastal lands. Mentioned desalination/groundwater rights studies, but mainly in west Texas and along the coast. |
| |
| Mentioned National Reservoir Inundation Study (1981). The report was not relevant to this study due to date published. No other recommendations. |
| |
| Referred our request to Texas Parks and Wildlife Department |
| |
| left message |
| |
| Discussed available report and other contacts |
| |
| Provided Clean Rivers Report |
| Provided info on source of info in Region C & I reports, verified yield sources, provided usage numbers, etc. |
| |
| Provided yield report, usage data, info on Sabine River Compact |
| |
| Referred to link for USGS Texas Online Publications: http://tx.usgs.gov/publications/pubsrecent.html |
